*Firms and Industrial Organization in Japan* Y. Miwa, 1995-12-18 Miwa is one of the leading young Japanese scholars debunking the myths all too common in the west but eagerly promoted in Japan also about the distinctive Japanese way. He soberly examines the roles of government and banks, firms and networks, workers and managers. The result is a fine analysis of how, where and why the Japanese economic system fundamentally resembles that in the west, with a clear explanation of the few areas where it significantly differs. Leslie Hannah, London School of Economics and Political Science. Professor Miwa has earned quite a name for himself in Japan for his brilliant but biting iconoclastic views. Now Western readers will learn what the fuss has been about. Self-styled authorities on the Japanese economy will squirm for Miwa takes no prisoners; his logic is relentless, merciless and inevitably right. J. Mark Ramseyer, the University of Chicago Law School. This is a monumental work demystifying the Japanese economy and contesting the conventional view that Japan is different. In doing so, Professor Miwa paves the way for a new era of comparative study. Kazuo Koike, Hosei University, Tokyo. Professor Miwa no longer an enfant terrible, has established himself as one of the most far-reaching researchers of the contemporary Japanese industrial organisation. His argument is always pointed, provocative, outrageous but illuminating and productive. Yutaka Kosai, Japan Center for Economic Research, Tokyo. We love Japan but many of us, for wrong reasons. Studies of Japan's economy are full of misconceptions described by such keywords as dual structure, keiretsu, corporate groups, main banks, subcontract and industrial policy. Without using these keywords, the author demonstrates that Japan has for a long time been a world of exchange by agreement rather than by coercion and that the standard principles of economics explain the dominant patterns of the Japanese economic phenomena. Providing detailed information on firms and industrial organization in Japan, this volume is a doorway both to proper understanding of Japan's economy and the study of actual firms and the market in general.

Japanese Industrial Targeting William R. Nester, 2016-07-27 Japan achieved its present economic position by rejecting free trade theory and instead mastering neomercantilist policies which target strategic industries for development with a range of government-sponsored cartels, subsidies, import barriers and export incentives. These policies stimulated an economic growth rate which averaged ten percent before 1973 and five percent since, rates four and two times greater than America's during the same periods. This book analyzes the policy-making process, implementation, successes, occasional shortcomings and challenges posed by Tokyo's

neomercantilist policies toward its trade rivals      *Policy Space Conflicts in Global Trade Politics* Qinyi Xu, Chuanjing Guan, 2025-06-30 *Policy Space Conflicts in Global Trade Politics* delves into the structure driving forces and contemporary influencing factors of trade relations dynamics providing insights into the present and future trajectories of the global trade order The post pandemic global governance challenges combined with the concurrent if not concomitant escalation of economic rivalries between great powers are catalysing a weakening of the liberal international order undermining the very foundations upon which contemporary global production network is built With the return of geopolitical tensions the conflict over global governance versus state governance has again become the nexus where global trade politics are contested and negotiated This book presents the Policy Space Conflict framework an analytical framework that diverges from extant concepts of policy diffusion power transition socialisation and neo liberal institutionalist models of analyses and is instead advanced as a framework that renews the classic concept of policy space the space left for one to freely use preferred national policy instruments when integrated into the globalisation and institutionalisation process in the past decades The tensions inherent in and arising from policy space can be captured in the term policy space conflict illuminating the dynamic shifts regarding the convergence of rules under globalisation and de convergence concerns of states This book emphasises the underlying logic and motivating rationale that lie beneath the evolution of policy space conflict by theoretically revisiting the concept providing an overview of its forms in history since the Bretten Woods and transitions from market oriented to strategy based This exploration is examined using case studies drawn from real world trade politics which encompasses discussions on the decline of multilateralism the asymmetry in development between the Global South and Global North and China US institutional contestation This book will be of interest to scholars in the fields of international relations law political economy political science economics and international trade as well as a broad range of audiences who are concerned of global trade politics in times of global uncertainty      *Government and Business: American Political Economy in Comparative Perspective* Richard Lehne, 2012-03-23 In this thoroughly updated edition Lehne takes a comparative approach evaluating the U S political economy with respect to those of Great Britain Germany Japan and the EU The book provides detailed historical context for and a conceptual understanding of the business government environment and then clarifies the roles of the major actors and outlines the regulatory and policy frameworks Along the way Lehne probes some of the most crucial dilemmas facing government and business today      **Monetary and Fiscal Policy: Politics** Torsten Persson, Guido Enrico Tabellini, 1994 This is the first of two volumes on a theory of macroeconomic policy that analyzes which policies are credible or politically feasible Instead of looking at policy as an end product the contributors approach policy as an ongoing process of revised goals changes in tactics and political pressures They consider what kinds of incentives within different institutional settings drive policy making and the behaviour of policy makers The approach explains why certain monetary and fiscal policies are implemented and provides insights into situations that occur repeatedly in macroeconomic policy such as the

**Japan's Environmental Politics and Governance** Yasuo Takao, 2016-11-03 Environmental issues stretch across scales of geographic space and require action at multiple levels of jurisdiction including the individual level community level national level and global level Much of the scholarly work surrounding new approaches to environmental governance tends to overlook the role of sub national governments but this study examines the potential of sub national participation to make policy choices which are congruent with global strategies and national mandates This book investigates the emerging actors and new channels of Japan's environmental governance which has been taking shape within an increasingly globalized international system By analysing this important new phenomenon it sheds light on the changing nature of Japan's environmental policy and politics and shows how the links between global strategies national mandates and local action serve as an influential factor in Japan's changing structures of environmental governance Further it demonstrates that decision making competencies are shared between actors operating at different levels and in new spheres of authority resulting from collaboration between state and non state actors It highlights a number of the problems challenges and critiques of the actors in environmental governance as well as raising new empirical and theoretical puzzles for the future study of governance over environmental and global issues Finally it concludes that changes in the tiers and new spheres of authority are leading the nation towards an environmentally stable future positioned within socio economic and political constraints Demonstrating that bridging policy gaps between local action national policy and global strategies is potentially a way of reinventing environmental policy this book will be of interest to students and scholars of Environmental Studies Environmental Politics and Japanese Politics
