Economic Objects and the Objects of Economics Peter Róna, László Zsolnai, 2018-08-21 This book examines the nature of economic objects that form the subject matter of economics and studies how they resemble or differ from the objects studied by the natural sciences It explores the question of whether economic objects created by modern economics sufficiently represent economic reality and confronts the question whether tools techniques and the methodology borrowed from the natural sciences are appropriate for the analysis of economic reality It demonstrates the unsustainability of rational choice theory It looks at economic agents such as individuals groups legally constituted entities algorithms or robots how they function and how they are represented in economics The volume further examines the extent if any that mathematics can represent the objects of the economy such as supply and demand equilibrium marginal utility or the money supply as they actually occur in the economy and as they are represented in economics Finally the volume explores whether the subject matter of economics however defined is the proper subject of theoretical knowledge whether economics is an analytic or a descriptive discipline or if it is more properly seen in the domain of practical reason Specifically the book looks at the importance and the ambiguity of the ontology of modern economics temporality reflexivity the question of incommensurability and their implications for economic policy

Which Lessons Matter? Christopher Hemmer, 2012-02-01 As policy makers turn to the lessons of history to which lessons will they turn This book offers a model of the analogical reasoning process that helps answer the important question of why some historical analogies are seen as relevant for later decisions while others are ignored It explores the previously neglected possibility that analogies can do more than simply advance the pre existing interests of decision makers but can also determine the very interests policy makers seek to further The usefulness of this approach in impacting the lessons of history is demonstrated by examining American policy toward Iran concerning American hostages from 1979 to 1987 detailing both the Carter

administration's policy during the Hostage Crisis and the Reagan administration's policy that resulted in the Iran Contra Affair *Australian National Cinema* Tom O'Regan, 2005-08-10 Situates Australian cinema in its historical and cultural perspective offering detailed critiques of key films from 1970 onwards and using them to illustrate the recent theories on the cinema industries **Introduction to the Policy Process** Birkland, 2015-05-18 Thoroughly revised reorganized updated and expanded this widely used text sets the balance and fills the gap between theory and practice in public policy studies In a clear conversational style the author conveys the best current thinking on the policy process with an emphasis on accessibility and synthesis rather than novelty or abstraction A newly added chapter surveys the social economic and demographic trends that are transforming the policy environment **National Policy-Making** Pertti Alasuutari, Ali Qadir, 2013-12-04 Notions of social change are often divided into local versus international But what actually happens at the national level where policies are ultimately made and implemented when policy making is interdependent worldwide How do policy makers take into account the prior choices of other countries Far more research is needed on the process of interdependent decision making in the world polity National Policy Making domestication of global trends offers a unique set of hybrid cases that straddle these disciplinary and conceptual divides The volume brings together well researched case studies of policy making from across the world that speak to practical issues but also challenge current theories of global influence in local policies Distancing itself from approaches that conceive narrowly of policy transfer as a one way street from powerful nations to weaker ones this book argues instead for an understanding of national decision making processes that emphasize cross national comparisons and domestic field battles around the introduction of worldwide models The case studies in this collection show how national policies appear to be synchronized globally yet are developed with distinct national flavors Presenting new theoretical ideas and empirical cases this book is aimed globally at scholars of political science international relations comparative public policy and sociology
