Developing Multilingual Education Policies Michal Tannenbaum, Elana Shohamy, 2023-02-23 Multilingual policies are increasingly important and required in educational settings worldwide, yet a solid experimental body of theory, research, and practice providing guidance for the development of policies is lacking. The Israeli context presented in this book serves as a case study or a model that could be used by bodies or entities seeking to devise a multilingual policy. The authors begin by addressing the general notion of a multilingual education policy with specific reference to the Israeli context. The book then focuses on specific challenges confronting the new policy that have been explored in empirical studies and concludes with a proposed framework for a new multilingual education policy related to the core theoretical topics and empirical findings discussed in the previous chapters. This framework includes principles and strategies for implementing the process described in the book in other contexts, ensuring wide applicability and relevance.
