**Public Policy and Program Evaluation** Evert Vedung, 2017-07-12 Evaluation is a controversial and little understood strategy of public governance

control and decision making As early as classical antiquity scholars were summoned to court to counsel kings Public policy and program evaluation is a recent addition to the great chain of attempts to use the brainpower of scholars and scientists to further the interests of the state Evaluation scholars are asked to provide retrospective assessments of the implementation output and outcome of government measures in order to effect deeper understanding and well grounded decisions on the part of those in charge of government operations Evaluation is the process of distinguishing the worthwhile from the worthless the precious from the useless evaluation implies looking backward in order to be able to steer forward better Written from a political science perspective Public Policy and Program Evaluation provides an overview of the possibilities and limits of public sector evaluation Evert Vedung examines evaluation as a mechanism for monitoring systematizing and grading government activities and their results so that public officials in their future oriented work will be able to act as responsibly creatively and efficiently as possible Topics discussed include Evaluation Rationality and Theories of Public Management Models of Evaluation Internal or External Evaluation Impact Assessment as Tryout and Social Experimentation Process Evaluation and Implementation Theory The Eight Problems Approach to Evaluation and Uses and Users of Evaluation All evaluation rests upon the idea that perceptions opinions intentions judgments in short everything concerned with the world of human consciousness play such interesting roles in political and administrative action that their functions are worth investigating Through experience humans may learn from past actions The interventions of the modern state are so extensive their execu

**Policy Studies Review**, 1996 Some vols include special issues The Science of Public Policy: Policy process, part II Tadao Miyakawa, 1999 Advances in Policy Studies Since 1950 William N. Dunn, Rita Mae Kelly, This latest volume of the Policy Studies Review Annual series brings together leading policy scientists in a comprehensive review of the field s achievements since its professionalization some forty years ago If an advance is defined as an improvement in theory methodology information or practice how does the field measure up And what should its next goals be This unusual compendium of entirely new essays and articles helps to answer such questions On balance the contributors show the record is mixed Policy sciences draw on the theoretical foundations of many disciplines but have not themselves contributed theoretical advances We have more information but information in itself does not constitute an advance Despite improved interaction between academia and government it is difficult to identify new or better policies that have resulted On the other hand there have been impressive advances in methodology procedures for conducting inquiry that yield reliable and relevant policy knowledge In its candid assessment of trends controversies and unsolved problems this volume charts new directions for the policy sciences

Pressman, Aaron Wildavsky, 1984-06-05 This book confronts the widespread impression that policy or program implementation should be easy arguing instead that implementation even under the best of circumstances is exceedingly difficult Using the Oakland Project as a case study this book discusses each stage of the process of implementation demonstrating that completion of what might seem to be a simple sequence of events will in fact depend on a complex chain of reciprocal interactions Each part of the chain must be built with the others in view so the separation of policy design from implementation is fatal The first four chapters illustrate the movement from simplicity to complexity Chapter 5 discusses the number of decision points throughout the process giving an indication of the magnitude of the task Chapter 6 examines why project targets may be set even if they are unlikely to be met considering both the position of those who set targets top federal officials who wish large accomplishments from small resources in a short time and those who must implement them career bureaucrats and local participants characterized by high needs and low cohesion The last chapter discusses the relationship between the evaluation of programs and the study of their implementation arguing that tendencies to assimilate the two should be resisted      **The Public Sector** Franz-Xaver Kaufmann, 2015-06-03 No detailed description available for The Public Sector      *After Divestiture* Paul Eric Teske, 1990-01-01 This book analyzes the politics of state regulatory decision making in telecommunications after the AT T divestiture in 1984 The author takes a political economy approach that explains how interest groups and institutional factors have shaped different state policies He shows that the structure and composition of state regulatory institutions have important effects on pricing and competition in the telecommunications industry The innovative methodology of this work combines qualitative empirical analysis from the entire U S with case studies of eight states It identifies the deregulation winners and losers by examining the impact of changes in local and long distance price structures on different groups including users of telecommunications services small businesses residential consumers and rural residents The book includes recommendations for improving state policy      **Future Survey Annual 1983** Michael Marien, 1984-01-01      **Summing Up** Richard J.
