Democratic Governance and European Integration Ronald Holzhaacker, Erik Albæk, 2007-01-01

As the power and scope of the European Union moves further beyond traditional forms of international cooperation between sovereign states it is important to analyse how these developments are impacting upon national institutions and processes of democratic representation and legitimacy in the member countries. The authors in this book identify four core processes of democratic governance present in any democratic political system that link societal and state processes of decision making, opinion formation, interest intermediation, national executive decision making and national parliamentary scrutiny. From a normative perspective they discuss what impacts this process of Europeanization has on democracy in the evolving system. They conclude that more changes are seen within the state-centric than in the societal-centred processes of democracy, thus the public seems to have been left behind in the process of constructing Europe. The empirical research and normative discussion presented in this book are designed to further our knowledge concerning the Europeanization of social and state processes of democracy and to contribute to the continuing dialogue on democracy in the European Union. This book will be of great interest to academics and researchers of political science, public policy and international relations as well as those interested in European studies and comparative politics.

Routledge Handbook on Elections in the Middle East and North Africa Francesco Cavatorta, Valeria Resta, 2023-03-31 This Handbook analyzes elections in the Middle East and North Africa and seeks to overcome normative assumptions about the linkage between democracy and elections. Structured around five main themes, contributors provide chapters detailing how their case studies illustrate specific themes within individual country settings. Authors disentangle the various aspects informing elections as a process in the Middle East by taking into account the different contexts where the electoral contest occurs and placing these into a broader comparative context. The findings from this Handbook connect with global electoral developments, empirically demonstrating that there is very little that is exceptional about the Middle East and North Africa when it comes to electoral contests. Routledge Handbook on Elections in the Middle East and North Africa is the first book to examine all aspects related to elections in the Middle East and North Africa. Through such comprehensive coverage and systematic analysis, it will be a key resource for students and scholars interested in politics, elections and democracy in the Middle East and North Africa.

The Internet and Politics Sarah Oates, Diana Owen, Rachel K. Gibson, 2006-03-22 This volume explores the nature of the Internet's impact on civil society, addressing the following central questions: is the Internet qualitatively different from the more traditional forms of the media? Has the Internet demonstrated real potential to improve civil society through a wider provision of information and an enhancement of communication between government and citizen or via better state transparency? Does the Internet pose a threat to the coherence of civil society as people are encouraged to abandon shared media experiences and pursue narrow interests? In authoritarian states, does the Internet function as a beacon for free speech or as another tool for propaganda?
