**The Impact of Illness on World Leaders** Bert E. Park, M.D., 2016-11-11 In The Impact of Illness on World Leaders Bert E Park explores the relationship between leadership and neurologic illness Basing his study on a rigorous examination of primary and secondary source material from medicine history and political science Park diagnoses illnesses which affected the thinking and actions of Anthony Eden and Adolf Hitler among others He discusses the historical situations in which these political leaders functioned and the effects their illnesses might have had on the decisions they made Park argues that the impact of aging and disease on leadership abilities is an important potentially devastating problem which has been ignored by the people in a position to deal with it Physicians who attend men in power supported by government officials and politicians often disguise their patients infirmities and keep them in office long after they are able to function effectively In those few instances when the problem has been addressed it has often been done by journalists or other persons not qualified to make a medical judgment about a leader's health and they have relayed erroneous information e.g the myth of Hitler's syphilis Part of the goal of The Impact of Illness on World Leaders is to correct such popular misconceptions Park concludes his study of leadership and illness with suggestions for monitoring the health of leaders and deposing them if their health compromises their ability to lead

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille, 2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to

revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis

### **Conceived in Liberty** Jr. Tierney, 2017-07-05

Conceived in Liberty is a cultural sociological and geopolitical review of the uniquely American notion that the country and its people are exceptional While all nations have their own patriotic commitments no other people have outwardly declared their power as vigorously as have Americans especially since World War II John J Tierney Jr advances the idea that liberty is the singular source of the power of the American worldview and all other elements of this society equality patience charity justice etc are derived from liberty He

argues that this worldview comes from this one source and is responsible for the many movements that may engage the public's interest such as women's rights, civil rights and voting rights. Such movements are all positive but they could not exist in a society devoid of liberty. Conceived in Liberty also traces other main components of the American worldview: geographic expanse, immigration, energy of the populace, diversity, public policies and the elements that contribute to exceptionalism. Tierney is not blind to some of the deficiencies of the United States but he posits that the liberty it manifests is truly the political globe's last best hope.

**The Political Economy of Agricultural and Food Policies** Johan Swinnen, 2018-05-24. Winner of the European Association of Agricultural Economists Book Award. Food and agriculture have been subject to heavy handed government interventions throughout much of history and across the globe both in developing and in developed countries. Today more than half a trillion US dollars are spent by some governments to support farmers while other governments impose regulations and taxes that hurt farmers. Some policies such as price regulations and tariffs distribute income but reduce total welfare by introducing economic distortions. Other policies such as public investments in research, food standards or land reforms may increase total welfare but these policies come also with distributional effects. These distributional effects influence the preferences of interest groups and in turn influence policy decisions. Political considerations are therefore crucial to understand how agricultural and food policies are determined to identify the constraints within which welfare enhancing reforms are possible or not and finally to understand how coalitions can be created to stimulate growth and reduce poverty.
