

A similar progression may be seen in other terms. *Mentally retarded*, an accurate term, has been replaced by the euphemism *mentally challenged* and in some cases with the advanced euphemism *having learning difficulties*. Again, each step in this devolution of language has involved a move toward greater euphemism and dishonesty. Everyone has learning difficulties at some time because learning can be difficult. This difficulty applies both to people who are mentally retarded and to those who are not. The difference between the former and the latter is not that the former have difficulties, whereas the latter cruise through life learning effortlessly. No, the difference is that the former are mentally impaired and simply cannot do some of the things that the latter can do.

As the foregoing examples illustrate, political correctness follows a kind of Gresham's Law for language, with each iteration of word replacement bringing to the fore a term that is vaguer and more euphemistic than its predecessor. In recent times, we have seen a serious degeneration in language, with adine terms such as *differently abled* being thrust upon an eye-rolling public.

Politically Correct Language as a Fashion Accessory

Terminological devolution involving such concepts are driven almost exclusively by the practitioners of political correctness, who fancy themselves as fashionistas on the cutting edge of this season's language. As in Parisian fashion houses, they show their style and class by adorning themselves in the latest creations, while only the uncivilized and boorish are caught with last season's merchandise.

The constant change in politically correct terms follows directly from a false dichotomy at the root of this movement and its attempts to monopolize polite conversation: the view that descriptions of people consist exclusively of two categories: politically correct euphemisms and horrible insults. When Toyibec defends the "inelegant circumlocutions" of politically correct language by saying that "inelegance is better than bile," she unwittingly states the belief at the heart of the politically correct: your only two options are politically correct euphemisms and bile.

For the politically correct cline on the cutting edge of this season's language fashions, it is impossible to conceive of a person's using the word *retarded* in a perfectly accurate way without harboring hatred or lack of sympathy toward mentally retarded people. The use of this word to describe accurately the process of slowed or diminished cognitive functioning shocks them because it fails to keep up with the latest trend—it is a last season.

Recall Toyibec's assertion that the term *political correctness* was "born as a coded cover for all who still want to say *Paki*, *spastic* or *queer*." Now consider these terms in detail. Observe that all of them were once neutral descriptors without negative connotations. "*Paki*" is short for "*Pakistani*," a person from Pakistan. *Spastic* was a medical term used to refer to someone with problems of the central nervous system that make them unable to control their muscle movements properly. The term
