

### **The Political Ecology of Water: An Introduction\***

*By Barbara Rose Johnston*

#### **1. Introduction**

The perception of water scarcity now in play in policy circles and in the media is often manufactured and at times purposefully manipulated to support various agendas (of water companies, corrupt officials and governments, and others). Our ability to develop effective responses to current water crises and avoid the exacerbation and emergence of new crises is complicated by the contradictions between agendas and actions that value water as a public good and human right, and those that value water as an essential and profitable commodity.

✈ The United Nations, the World Commission on Dams, the scientific community and civil society attempt to apply through international law and regulatory policy a rights-based approach that includes decentralization and place-based water resource development, and management reflecting human environmental conditions and needs. At the same time, the political mechanisms of trade agreements and financial institution and government lending policies push through with incredible speed and authority privatization processes and projects. These contradictions suggest a future of messy conflict.

**A Tribal Order** Shelagh Weir, 2009-08-17 2008 British Kuwait Friendship Prize in Middle Eastern Studies British Society for Middle Eastern Studies A Tribal Order describes the politico legal system of Jabal Razih a remote massif in northern Yemen inhabited by farmers and traders Contrary to the popular image of Middle Eastern tribes as warlike lawless and invariably opposed to states the tribes of Razih have stable structures of governance and elaborate laws and procedures for maintaining order and resolving conflicts with a minimum of physical violence Razihi leaders also historically cooperated with states provided the latter respected their customs ideals and interests Weir considers this system in the context of the rugged environment and productive agricultural economy of Razih and of centuries of continuous rule by Zaydi Muslim regimes and latterly the republican governments of Yemen The book is based on Weir's extended anthropological fieldwork on Jabal Razih and on her detailed study of hundreds of handwritten contracts and treaties among and between the tribes and rulers of Razih These documents provide a fascinating insight into tribal politics and law as well as state tribe relations from the early seventeenth to the late twentieth century A Tribal Order is also enriched by case histories that vividly illuminate tribal practices Overall this unusually wide ranging work provides an accessible account of a remarkable Arabian society through time

**The Evolution of Social Institutions** Dmitri M. Bondarenko, Stephen A. Kowalewski, David B. Small, 2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World from prehistory to the present This approach is based on examining social evolution through the evolution of social institutions Evolution is defined as the process of structural change Within this framework the society or culture is seen as a system composed of a vast number of social institutions that are constantly interacting and changing As a result the structure of society as a whole is also evolving and changing The authors posit that the combination of evolving social institutions explains the non linear character of social evolution and that every society develops along its own pathway and pace Within this framework society should be seen as the result of the compound effect of the interactions of social institutions specific to it Further the transformation of social institutions and relations between them is taking place not only within individual societies but also globally as institutions may be trans societal and even institutions that operate in one society can arise as a reaction to trans societal trends and demands The book argues that it may be more productive to look at institutions even within a given society as being parts of trans societal systems of institutions since despite their interconnectedness societies still have boundaries which their members usually know and respect Accordingly the book is a must read for researchers and scholars in various disciplines who are interested in a better understanding of the origins history successes and failures of social institutions

**Political Ecology and Tourism** Sanjay Nepal, Jarkko Saarinen, 2016-02-26 Political ecology explicitly addresses the relations between the social and the natural arguing that social and environmental conditions are deeply and inextricably linked Its emphasis on the material state of nature as the outcome

of political processes as well as the construction and understanding of nature itself as political is greatly relevant to tourism. Very few tourism scholars have used political ecology as a lens to examine tourism centric natural resource management issues. This book brings together experts in the field with a foreword from Piers Blaikie to provide a global exploration of the application of political ecology to tourism. It addresses the underlying issues of power ownership and policies that determine the ways in which tourism development decisions are made and implemented. Furthermore, contributions document the complex array of relationships between tourism stakeholders including indigenous communities and multiple scales of potential conflicts and compromises. This groundbreaking book covers 15 contributions organized around four cross-cutting themes of communities and livelihoods, class representation and power, dispossession and displacement, and environmental justice and community empowerment. This book will be of great interest to students and scholars in tourism, geography, anthropology, sociology, environmental studies, and natural resources management. *Green Politics* Dustin

Mulvaney, 2011-06-28 Colorful bracelets, funky brooches, and beautiful handmade beads: young crafters learn to make all these and much more with this fantastic step-by-step guide. In 12 exciting projects with simple steps and detailed instructions, budding fashionistas create their own stylish accessories to give as gifts or add a touch of personal flair to any ensemble. Following the successful Art Smart series, Craft Smart presents a fresh, fun approach to four creative skills: knitting, jewelry making, papercrafting, and crafting with recycled objects. Each book contains 12 original projects to make using a range of readily available materials. There are projects for boys and girls, carefully chosen to appeal to readers of all abilities. A special techniques and materials section encourages young crafters to try out their own ideas while learning valuable practical skills.

Rivers Lost, Rivers Regained Martin Knoll, Uwe Lubken, Dieter Schott, 2017-06-13 Many cities across the globe are rediscovering their rivers. After decades or even centuries of environmental decline and cultural neglect, waterfronts have been revamped and become focal points of urban life again; hidden and covered streams have been daylighted while restoration projects have returned urban rivers in many places to a supposedly more natural state. This volume traces the complex and winding history of how cities have appropriated, lost, and regained their rivers. But rather than telling a linear story of progress, the chapters of this book highlight the ambivalence of these developments. The four sections in *Rivers Lost, Rivers Regained* discuss how cities have gained control and exerted power over rivers and waterways far upstream and downstream; how rivers and floodplains in cityscapes have been transformed by urbanization and industrialization; how urban rivers have been represented in cultural manifestations such as novels and songs; and how more recent strategies work to redefine and recreate the place of the river within the urban setting. At the nexus between environmental, urban, and water histories, *Rivers Lost, Rivers Regained* points out how the urban river relationship can serve as a prime vantage point to analyze fundamental issues of modern environmental attitudes and practices. **Groundwater Governance in the**

The Political Ecology of Climate Change Adaptation Marcus Taylor, 2014-11-17 This book provides the first systematic critique of the concept of climate change adaptation within the field of international development Drawing on a reworked political ecology framework it argues that climate is not something out there that we adapt to Instead it is part of the social and biophysical forces through which our lived environments are actively yet unevenly produced From this original foundation the book challenges us to rethink the concepts of climate change vulnerability resilience and adaptive capacity in transformed ways With case studies drawn from Pakistan India and Mongolia it demonstrates concretely how climatic change emerges as a dynamic force in the ongoing transformation of contested rural landscapes In crafting this synthesis the book recalibrates the frameworks we use to envisage climatic change in the context of contemporary debates over development livelihoods and poverty With its unique theoretical contribution and case study material this book will appeal to researchers and students in environmental studies sociology geography politics and development studies

**Diverting the Flow** Margreet Zwarteveen, Sara Ahmed, Suman Rimal Gautam, 2014-03-11 Across the South Asian region water determines livelihoods and in some cases even survival However water also creates exclusions Access to water and its social organisation are intimately tied up with power relations This book provides an overview of gender equity and water issues relevant to South Asia The essays empirically illustrate and theoretically argue how gender intersects with other axes of social difference such as class caste ethnicity age and religion to shape water access use and management practices Divided into six thematic sections each of which starts with an introduction of relevant concepts debates and theories the book looks at laws and rights policies technologies and intervention strategies In all the book clearly shows how understanding and changing the use distribution and management of water is conditional upon understanding and accommodating gender relations Published by Zubaan

**Water, Knowledge and the Environment in Asia** Ravi Baghel, Lea Stepan, Joseph K.W. Hill, 2017-03-31 The dramatic transformation of our planet by human actions has been heralded as the coming of the new epoch of the Anthropocene Human relations with water raise some of the most urgent questions in this regard The starting point of this book is that these changes should not be seen as the result of monolithic actions of an undifferentiated humanity but as emerging from diverse ways of relating to water in a variety of settings and knowledge systems With its large population and rapid demographic and socioeconomic change Asia provides an ideal context for examining how varied forms of knowledge pertaining to water encounter and intermingle with one another While it is difficult to carry out comprehensive research on water knowledge in Asia due to its linguistic political and cultural fragmentation the topic nevertheless has relevance across boundaries By using a carefully chosen selection of case studies in a variety of locations and across diverse disciplines the

book demonstrates commonalities and differences in everyday water practices around Asia while challenging both romantic presumptions and Eurocentrism Examples presented include class differences in water use in the megacity of Delhi India the impact of radiation on water practices in Fukushima Japan the role of the King in hydraulic practices in Thailand and ritual irrigation in Bali Indonesia International Public Health Policy and Ethics Michael Boylan,2023-11-29 This second edition of *International Public Health Policy and Ethics* complements the popular first edition with contemporary problems in international public health It brings together philosophers and practitioners to address the foundations and principles upon which public health policy may be advanced especially in the international arena What is the basis that justifies public health in the first place Why should individuals be disadvantaged for the sake of the group How do policy concerns and clinical practice work together and work against each other Can the boundaries of public health be extended to include social ills that are amenable to group dynamic solutions What about political issues How can international finance make an impact These are some of the crucial questions that form the core of this volume of original essays sure to cause practitioners to engage in a critical re evaluation of the role of ethics in public health policy With a targeted new essay dealing with COVID and public health issues in Africa this second edition provides a resource building on the first edition *Handbook of Critical Environmental Politics* Pellizzoni, Luigi,Leonardi, Emanuele,Asara, Viviana,2022-10-20 This timely Handbook offers a comprehensive outlook on global environmental politics providing readers with an up to date view of a field of ever increasing academic and public significance Its critical perspective interrogates what is taken for granted in current institutions and social and power relations highlighting the issues preventing meaningful change in the relationship between human societies and their biophysical underpinnings This title contains one or more Open Access chapters *Water Security, Justice and the Politics of Water Rights in Peru and Bolivia* Miriam Seemann,2016-04-08 The author scrutinizes the claim of policy makers and experts that legal recognition of local water rights would reduce water conflict and increase water security and equality for peasant and indigenous water users She analyzes two distinct top down and bottom up formalization policies in Peru and Bolivia neoliberal the former indigenist socialist the latter The policies have intended and unintended consequences and impact on marginalized peasants and the complex inter legal systems for providing water security on the ground This study seeks to debunk the official myth of the need to create state centric top down legal security in complex pluralistic water realities The engagement between formal and alternative water securities and controversial notions of rightness is interwoven and contested a complex setting is unveiled that forbids one size fits all solutions Peru s and Bolivia s case studies demonstrate how formalization policies while aiming to enhance inclusion in practice actually reinforce exclusion of the marginalized Water rights formalization is certainly no panacea Geography of British Columbia, Third Edition Brett McGillivray,2011-01-01 Why is British Columbia unique within Canada What forces have made its landscape so rugged its population so diverse How have its resources been exploited and managed in the past and in the present Brett

McGillivray adopts mainly a thematic rather than a regional approach to answer these questions Beginning with a regional overview and introduction to geographic concepts he then moves to discuss the physical processes that produced a spectacular variety of mountains lakes fjords forests and minerals His thematic exploration traces the province s historical geography including First Nations lifeways colonization Asian immigration and institutionalized racism Detailed accounts of BC s economic geography forestry fisheries mining energy supply and demand agriculture water and tourism culminate in a discussion of contemporary issues such as urbanization economic development and resource management This fully revised edition is enhanced by updated figures maps and graphs and by new discussions including how globalization climate change and recession are influencing the province and its people
