Political Economy of American Hegemony Thomas Oatley, 2015-02-16 In *A Political Economy of American Hegemony* Thomas Oatley explores how America's military buildups have produced postwar economic booms that have culminated in monetary and financial crises The 2008 subprime crisis as well as the housing bubble that produced it was the most recent manifestation of this buildup boom and bust cycle developing as a consequence of the decision to deficit finance the wars in Afghanistan and Iraq Earlier instances of financial crises were generated by deficit financed buildups in the 1980s and the late 1960s The buildup boom and bust pattern results from the way political institutions and financial power shape America's response to military challenges political institutions transform increased military spending into budget deficits and financial power enables the United States to finance these deficits by borrowing cheaply from the rest of the world Oatley examines how this cycle has had a powerful impact on American and global economic and financial performance

Political Economy and Grand Strategy Mark R. Brawley, 2009-09-10 This book examines traditional balance of power theory from a political economic perspective using historical examples to draw out distinctions between the liberal and realist approach and how this affects grand strategy The realist view of the balance of power theory includes implicit assumptions that economic assets can be turned quickly into power and that states always respond to threats quickly and only with a view to the short run These assumptions drive many of the expectations generated from traditional balance of power theory discouraging realists from looking at domestic sources of power which in turn undermined their ability to frame strategic decisions properly By thinking about how power must be managed over time however we can model the choices policy makers confront when determining expenditures on defense while keeping an eye on the impact of those costs on the economy By emphasizing the role of the state identifying different causal patterns in domestic politics and demonstrating the importance of systemic competition this book aims to establish why a neo classical realist approach is not only different from a liberal approach but also superior when addressing questions on grand strategy
