**Understanding Politics and Society** Fabio de Nardis, 2020-03-26 This textbook presents political sociology as a connective social science that studies political phenomena by creating fruitful connections with other perspectives. The relationship between politics and society is more complex than ever due to the emergence of new power structures, forms of conflict organization and management and social practices of political participation. Several scholars describe this historical phase as the de-politicization of representative politics. The book addresses classical themes of and approaches to political sociology but also dedicates several chapters to contemporary developments within political sociology including for instance the role of the internet and bottom up political communication in social movements. In addition the volume acts as a professional tool for those scholars and researchers that are beginning to study political processes from a sociological perspective

Encyclopedia of Human Geography Barney Warf, 2006-05-16 Publisher description

*Geofinance between Political and Financial Geographies* Silvia Grandi, Christian Sellar, Juvaria Jafri, 2019-12-27 This edited collection explores the boundaries between political and financial geographies focusing on the linkages between the changing strategies, policies and institutions of the state. It also investigates banks and other financial institutions affected by both state policies and a globalizing financial system and the financial resources available to firms as well as households. In so doing the book highlights how an empirical focus on the semi periphery of the financial system may generate new perspectives on the entanglement between geo-politics and finance

*Handbook on the Changing Geographies of the State* Sami Moisiö, Natalie Koch, Andrew E.G. Jonas, Christopher Lizotte, 2020-10-30 This authoritative Handbook presents a comprehensive analysis of the spatial transformation of the state, a pivotal process of globalization. It explores the state as an ongoing project that is always changing, illuminating the new spaces of geopolitics that arise from these political, social, cultural and environmental negotiations

**Marx's Capital, Capitalism and Limits to the State** Raju J Das, 2022-06-01

Marx's Capital, Capitalism and Limits to the State examines the capitalist state in the abstract and as it exists in advanced capitalism and peripheral capitalism, illustrating the ideas with evidence from the North and the South. The volume unpacks the capitalist state's functions in relation to commodity relations, private property and the crisis-ridden production of surplus value as a part of the capital circuit M-C-M'. It also examines state's political and geographical forms. It argues that no matter how autonomous it is, the state cannot meet the pressing needs of the masses significantly and sustainably. This is not because of so-called capitalist constraints but because the state is inherently capitalist. Each chapter begins with Capital volume 1. And each chapter ends with theoretical/practical implications of the ideas which taken together counter existing state theory's focus on state autonomy and reforms and point to the necessity for the masses to establish a new transitional democratic state. But the book goes beyond Marx too as it deploys the combined Marxism of 19th and 20th centuries. Marx's Capital, Capitalism and Limits to the State will interest scholars researching state-society-economy relations. It is suitable for

university students as well as established scholars in sociology political science heterodox economics human geography and international development      Introduction to Geopolitics Colin Flint,2016-10-06 This new updated edition of Introduction to Geopolitics presents the overarching themes of geopolitical structures and agents in an engaging and accessible manner which requires no previous knowledge of theory or current affairs Using new pertinent case studies and guided exercises the title explains the contemporary global power of the United States and the challenges it is facing the persistence of nationalist conflicts migration cyberwar terrorism and environmental geopolitics Case studies of the rise of the so called Islamic State the South China Sea disputes the Syrian civil war the Korean conflict and Israel Palestine emphasize the multi faceted nature of conflict The book raises questions by incorporating international and long term historical perspectives and introduces readers to different theoretical viewpoints including feminist contributions The new edition features expanded sections on network geopolitics and non state actors a new section on geopolitics of transnational business cyberwar an interpretation of ISIS within historical geopolitical trends as well as expanded discussion of the relevance of Boserup and neo Malthusians to environmental geopolitics Introduction to Geopolitics will provide its readers with a set of critical analytical tools for understanding the actions of states as well as non state actors acting in competition over resources and power Both students and general readers will find this book an essential stepping stone to a deeper and critical understanding of contemporary conflicts      **Regional Development: Theory and Practice** Baleshwar Thakur,H.S. Sharma,Suresh Misra,S.

Chattopadhyay,Surendra Singh,2017-01-01 The Five Volume Series on Regional Development Theory and Practice is a festschrift dedicated to Professor R P Misra a distinguished scholar widely recognized as one of the pioneers who initiated and promoted Regional Planning studies in India This five volume series with over one hundred research papers on different aspects of regional development is a fitting tribute to the scholar who spent much of his life time thinking researching and writing about development in general and regional development in particular These five volumes each dealing with a specific aspect of regional development Vol 1 Concept of Regional Development Vol 2 Measuring Development Vol 3 Development Patterns and Structures Vol 4 Development Policies and Vol 5 Development Challenges Each of the five volumes begins with an introduction which is unique in the sense that this is not merely an introduction to the contributions contained in the volume but also talks of the theory of regional development contemporary development in the discipline and the contrarian views expressed by various academics and policy makers Another significant aspect of these introductions is the global view and a comparative scenario of the developed developing and under developed economies of the world that the editors have kept in view in a debate seeking an universal theory of regional development Regions are specifics and often unique and regional development implies focusing on the assets of the territory its potential and constraints      The Remake of a State: Post-conflict Challenges and State Building in Nepal Bishnu Raj Upreti,Sagar Raj Sharma,Kailash Nath Pyakuryal,Safal Ghimire,2010-06-01 Contributed articles      *A Research Agenda for Regional and Local Government* Mark Callanan,John

Loughlin,2021-05-28 This insightful Research Agenda takes a thematic approach to analysing reform in regional and local government exploring central concepts such as devolution Europeanisation and globalisation Expert contributors address key trends in structural change and reorganisation subnational autonomy and decentralisation metropolitan governance and multi level governance **Le gouvernement des ressources naturelles: science et territorialités de l'État québécois, 1867-1939**

Stéphane Castonguay,2021-04-15 The Government of Natural Resources explores scientific and technical activity in Quebec from Confederation until the eve of the Second World War Scientific and technical personnel are an often quiet presence within the state but they play an integral role At the turn of the twentieth century the provincial government created geology forestry fishery and agronomy services These new services drew from recently established university technical programs to amass a corps of skilled employees to support their mission exploiting resources and occupying territory St phane Castonguay traces the history of mining logging hunting fishing and agriculture in Quebec to reveal how territorial and environmental transformations thus became a tool of government By helping to define and shape such interventions scientific activity contributed to state formation and expanded administrative capacity The lessons that this thoughtful reconceptualization of resource development offers reach well beyond provincial borders **Power and Identity in the Post-Soviet Realm**

Steven Bottlik, Zsolt Berki, Marton Jobbitt,2021-02-16 With the dissolution of the Soviet Union and the demise of the Cold War s bipolar world order Soviet successor states on the Russian periphery found themselves in a geopolitical vacuum and gradually evolved into a specific buffer zone throughout the 1990s The establishment of a new system of relations became evident in the wake of the Baltic States accession to the European Union in 2004 resulting in the fragmentation of this buffer zone In addition to the nations that are more directly connected to Zwischeneuropa i e In Between Europe historically and culturally Belarus Moldova Ukraine countries beyond the Caucasus Azerbaijan Georgia Armenia as well as the states of former Soviet Central Asia Kazakhstan Uzbekistan Kyrgyzstan Turkmenistan Tajikistan have also become characterized by particular developmental pathways Focusing on these areas of the post Soviet realm this collected volume examines how they have faced multidimensional challenges while pursuing both geopolitics and their place in the world economy From a conceptual point of view the chapters pay close attention not only to issues of ethnicity which are literally intertwined with a number of social problems in these regions but also to the various socio spatial contexts of ethnic processes Having emerged after the collapse of Soviet authority the so called post Soviet realm might serve as a crucial testing ground for such studies as the specific social and regional patterns of ethnicity are widely recognized here Accordingly the phenomena covered in the volume are rather diverse The first section reviews the fundamental elements of the formation of national identity in light of the geopolitical situation both past and present This includes an examination of the relative strength and shifting dynamics of statehood the impacts of imperial nationalism and the changes in language use from the early modern period onwards The second section examines the trans formation of the identities of small nations

living at the forefront of Tsarist Russian geopolitical expansion in particular in Central Asia the Caucasus and the Southern Steppe Finally in the third section the contributors discuss the fate of groups whose settlement space was divided by the external boundaries of the Soviet Union a reality that resulted in the diverging developmental trajectories of the otherwise culturally similar communities on both sides of the border In these imperial peripheries Soviet authority gave rise to specifically Soviet national identities amongst groups such as the Azeris Tajiks Karelians Moldavians and others The book also includes more than 30 primarily original maps graphs and tables and will be of great use not only for human geographers particularly political and cultural geographers and historians but also for those interested in contemporary issues in social science
