**Information Circular** University of Illinois at Chicago Circle. Library, Presidentialism, Parliamentarism, and Democracy Jose Antonio Cheibub, 2006-11-20 This book addresses the following question why are presidential democracies more likely to break down than parliamentary ones Conventional wisdom among political scientists points to the incentives generated by the form of government itself the independence of the executive and legislature that defines presidentialism generates incentives that are not conducive to the consolidation of democracy On the basis of a data set that covers all democracies between 1946 and 2002 this book demonstrates that this is not the case the incentives generated by presidentialism are as conducive to the consolidation of democracy as the ones generated by parliamentarism The book argues that what kills presidentialism is the fact that it exists in countries where democracies of any type are not likely to survive This book will be of interest to academic researchers graduates and advanced undergraduates enrolled in courses on comparative politics and political economy *Books Added Recently* William Allen White Memorial Library, 1948-06
