Political History Principles And Practice:

Political History Geoffrey Rudolph Elton, 1970 *The Oxford Handbook of Modern British Political History, 1800-2000*
David Brown, Robert Crowcroft, Gordon Pentland, 2018-03-29 The two centuries after 1800 witnessed a series of sweeping changes in the way in which Britain was governed the duties of the state and its role in the wider world Powerful processes from the development of democracy the changing nature of the social contract war and economic dislocation have challenged and at times threatened to overwhelm both governors and governed Such shifts have also presented challenges to the historians who have researched and written about Britain's past politics This Handbook shows the ways in which political historians have responded to these challenges providing a snapshot of a field which has long been at the forefront of conceptual and methodological innovation within historical studies It comprises thirty three thematic essays by leading and emerging scholars in the field Collectively these essays assess and rethink the nature of modern British political history itself and suggest avenues and questions for future research The Oxford Handbook of Modern British Political History thus provides a unique resource for those who wish to understand Britain's political past and a thought provoking long view for those interested in current political challenges

History as a Science Jan van der Dussen, 2020-05-11 Since its appearance in 1981 History as a Science by Jan van der Dussen has been welcomed as a coherent and comprehensive study of the many aspects of Collingwood's philosophy of history including its development and reception The book was the first to pay attention to Collingwood's unpublished manuscripts and to his work as an archaeologist and historian herewith opening up a new angle in Collingwood studies The republication of this volume meets an increasing demand to make the book available for future Collingwood scholars and people interested in Collingwood's philosophy The present edition of History as a Science includes updated references to the published manuscripts and an added preface

Methodology and Method in History (RLE Accounting) Lee D. Parker, Finley O. Graves, 2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small Hence the references in this bibliography are drawn from the literature of general history economic and business history legal and social history and philosophy The scope and range of its contents are broad references are taken from texts as well as papers published in over 450 journals

Writing History 7-11 Hilary Cooper, 2014-06-05 Writing History 7-11 supports students and primary teachers helping them to explore ways in which activities involving the talk that underpins historical enquiry can be developed into reading and exciting extended reflective writing The step that teachers and pupils take from talk for learning to talk for writing is a

vital one In this book the authors argue that all aspects of historical enquiry leading to writing involve discussion and dialogue which permeate every aspect of doing history From this perspective they set out a theoretical framework for understanding the role of talk and reading in developing pupils critical thinking and confident reflective writing then demonstrate through a series of case studies in which teachers university lecturers and pupils work together how the theory is put into practice in the classroom Themes include How to support children in writing in a variety of interesting genres How to make links between the National Curriculum 2013 for History and for English How to plan for breadth and depth studies in the new National Curriculum How activities in History 5 11 can be developed into exciting extended writing The second half of the book draws upon case studies from a number of real primary classrooms with children of different ages Each case study shows how teaching was planned to develop children s confidence and enjoyment in discussion and to scaffold reasoned written explanation and argument Topics presented are all relevant to the new curriculum framework and include talking and reading about Time change and significance over 6000 years writing a television script Celtic Britain and the Roman Army writing a travel brochure about Celtic Britain The destruction of Roman towns writing a Saxon poem An archaeological investigation of a body in a Danish peat bog writing a newspaper report Did any countries benefit from WW11 writing an argued viewpoint The expansion westwards of European settlers writing a flap book exploring different perspectives This indispensable book provides not only sources for pupils to use in their writing but also models and exemplars of different styles and voices to draw upon

Elton,Geoffrey Rudolph Elton,2003-02-13 This volume continues the publication of Professor Elton s collected papers on topics in the history of Tudor and Stuart England All appeared between 1973 and 1981 As before they are reprinted exactly as originally published with corrections and additions in footnotes They include the author s four presidential addresses to the Royal Historical Society and bring together his preliminary findings in the history of Parliament

and its records Several of them which appeared in various collections and Festschriften have been difficult to find and some are taken from locations in Germany and the United States unfamiliar to English readers The eight lengthy reviews here republished examine some of the major questions in the history of the age and throw light on the principles of investigation which underlie the author's own research

The Study of History, 1988 The chief objective of this text is to provide a handy reference guide for teachers students and researchers of modern European economic and social history Since the bibliography covers only works written in the English language it will probably be of less use to the last named group at least insofar as those within it are already seasoned researchers on a particular country or topic However it would have been quite impossible from the point of view of length to have included all the literature in foreign languages while to have done so would have defeated the essential aim of the volume namely that of providing a reasonably convenient guide for those who teach and study the subject but who are not primarily specialists in the field

Past Futures Ged Martin, 2004-01-01 In Past Futures Ged Martin advocates examining the decisions that people take most of which are not the result of a process but are reached intuitively

Understanding History Jonathan Gorman, 1992 Has any question about the historical past ever been finally answered Of course there is much disagreement among professional historians about what happened in the past and how to explain it But this incisive study goes one step further and brings into question the very ability of historians to gather and communicate genuine knowledge about the past Understanding History applies this general question from the philosophy of history to economic history of American slaveholders Do we understand the American slaveholders Has the last word on the subject been said Both the alleged profitability of slavery and the purported causes of the American Civil War are philosophically analyzed Traditional narrative history and econometric history are examined and compared and their different philosophical assumptions made explicit The problem of justifying historical methodologies is first set in the wider context of the philosophical problem of knowledge then lucidly explained and resolved along pragmatic lines The novelty of Gorman's approach lies in its comparison of narrative with econometric history its analysis of empathetic understanding in terms of cost benefit analysis and its elucidation of the metaphysical presuppositions of empiricism It stands out especially for the clarity rigor and simplicity of its arguments
