Educational Policy and the Politics of Change Miriam Henry,Bob Lingard,Fazal Rizvi,Sandra Taylor,2013-01-11

Governments around the world are trying to come to terms with new technologies new social movements and a changing global economy As a result educational policy finds itself at the centre of a major political struggle between those who see it only for its instrumental outcomes and those who see its potential for human emancipation This book is a successor to the best selling *Understanding Schooling* 1988 It provides a readable account of how educational policies are developed by the state in response to broader social cultural economic and political changes which are taking place It examines the way in which schools live and work with these changes and the policies which result from them The book examines policy making at each level from perspectives both inside and outside the state bureaucracy It has a particular focus on social justice Both undergraduate and postgraduate students will find that this book enables them to understand the reasoning behind the changes they are expected to implement It will help to prepare them to confront an uncertain educational world whilst still retaining their enthusiasm for education

Systems of Education Sohan Modgil,Mal Leicester,2005-07-28 Volume 1 is concerned with the theoretical and conceptual framework for reflecting about values culture and education and thus provides an introduction to the series as a whole It provides state and policy level analysis across the world *Political Philosophy, Educational Administration and Educative Leadership* Reynold Macpherson,2013-10-01 In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice research and theory of educational administration and educational leadership Divided into four parts the book introduces the sub

discipline of political philosophy to the field of educational administration management and leadership. It does this by clarifying the knowledge domain of each and identifying how four political ideologies specifically pragmatism, communitarianism, communicative rationalism, and egalitarian liberalism have primarily informed and surreptitiously provided contestable justifications for power in the development of practice research and theory in the field of study. The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems. Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy. The final part uses the sub-discipline to critique the author's decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology it favours: neo-pragmatism. **Political Philosophy, Educational Administration and Educative Leadership** will provide practitioners, researchers, and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions, limits, and tools of political philosophy.

The Search for Better Educational Standards
 Martin Thrupp, 2017-08-22. This book deals with the development of New Zealand's standards system for primary school achievement: Kiwi Standards, which took effect from 2010 onwards and is becoming increasingly embedded over time. The approach, where teachers make Overall Teacher Judgements based on a range of assessment tools and their own observations rather than using any particular national test, has created predictable problems with moderation within and across schools. It has been claimed that this bold Kiwi Standards approach avoids the narrowed curriculum and mediocre outcomes of high stakes assessment in other countries. Yet this book suggests it just produces another variant of the same problems and demonstrates that even a relatively weak high stakes assessment approach still produces performative effects. The book provides a blow-by-blow account of the development of a policy including the continuous repositioning of New Zealand's Government as it has sought to justify the policy in the face of opposition from educators. Indeed, the Kiwi Standards tale provides a world-class example of teachers fighting back against policy with the help of academics. There is an indigenous Māori aspect to the story as well. Finally, this book also provides comparative international perspectives including responses from well-known US, English, and Australian academics.

Schooling Reform in Hard Times Bob Lingard, John Knight, Paige Porter, 2003-09-02. Based on research carried out under Labour governments throughout the 1990s in Western Australia, the authors consider the social, political, and economic conditions under which policy is formulated, understood, and enacted. They look at how the state structure affects the content and nature of policy statements and provide an outline of the history of policy developments and point to future possibilities and probabilities. Outcomes within funding ceilings, accountability frameworks, and national guidelines are but some of the changes referred to. The emergence of competency-based standards in education and training in schools, workplaces, and the professions is evident throughout Australia at state

level but the concern is whether issues of education should be played out within the state and outside civil society The authors argue for the mediation in implementation of policy rather than a lambasting of policy formulation and implementation This text is intended for heads of education departments PGCE BEd MEd students and researchers interested in education policy and planning Education policymakers and educational historians

A Companion to Research in Teacher Education Michael A. Peters, Bronwen Cowie, Ian Menter, 2017-05-31 This state of the art Companion assembles and assesses the extant research available on teacher education and provides clear guidelines on future directions It addresses an important need in a collection that will be of value for teachers teacher educators policymakers and politicians There has been little sustained long term or systematic research to provide empirical support for the broad aspects of teacher education policy largely because such research has been chronically underfunded and based on traditional practitioner knowledge Many of the changes to teacher education are contentious and yet are occurring in rapid succession These policies and movements have important consequences for education teacher quality and the future of the teaching profession At the same time the policies and initiatives that support these changes seem to be based more on ideology business interests and tradition than on research and empirical findings The nature quality and effectiveness of teacher preparation have increasingly become a central focus for education policy worldwide in a fiercely argued debate among governments think tanks world policy agencies education researchers and teacher organisations
