Ludwig, 2013-07-24 People may choose to ignore their animal heritage by interpreting their behavior as divinely inspired socially purposeful or even self serving all of which they attribute to being human but they masticate fornicate and procreate much as chimps and apes do so they should have little cause to get upset if they learn that they act like other primates when they politically agitate debate abdicate placate and administrate too *King of the Mountain* presents the startling findings of Arnold M Ludwig's eighteen year investigation into why people want to rule The answer may seem obvious power privilege and perks but any adequate answer also needs to explain why so many rulers cling to power even when they are miserable trust nobody feel besieged and face almost certain death Ludwig's results suggest that leaders of nations tend to act remarkably like monkeys and apes in the way they come to power govern and rule Profiling every ruler of a recognized country in the twentieth century over 1 900 people in all Ludwig establishes how rulers came to power how they lost power the dangers they faced and the odds of their being assassinated committing

suicide or dying a natural death Then concentrating on a smaller sub set of 377 rulers for whom more extensive personal information was available he compares six different kinds of leaders examining their characteristics their childhoods and their mental stability or instability to identify the main predictors of later political success Ludwig s penetrating observations though presented in a lighthearted and entertaining way offer important insight into why humans have engaged in war throughout recorded history as well as suggesting how they might live together in peace

**Reform In Francophone Africa** John F Clark,2018-02-07 Most African states experienced only a few fleeting years of democratic rule after independence before succumbing to authoritarianism During the 1970s and 1980s Africans and Westerners alike came to view dictatorship to be as much a part of the region s social landscape as its grinding poverty Yet the end of the Cold War and the sharpening of the economic crisis at the end of the 1980s have breathed new life into campaigns for democracy in Africa shaking the foundations of many long standing autocracies In some cases dramatic transitions took place though the fate of the new democracies is far from certain This volume explores the origins and evolution of political reform movements in several states of francophone Africa The authors first make the case for the distinctiveness of francophone Africa based on the influences of colonial history language and France s contemporary role in Africa then survey the challenges of reform including the problems of transition from authoritarianism and consolidation of democratic regimes Case studies of thirteen former French and Belgian colonies follow organized by level of reform achieved peaceful regime change incremental reforms repressed reform efforts and reform in the midst of war **Africa Air**
