Ezrow, Erica Frantz, 2011-02-24 Dictators and Dictatorships is a qualitative enquiry into the politics of authoritarian regimes It argues that political outcomes in dictatorships are largely a product of leader elite relations Differences in the internal structure of dictatorships affect the dynamics of this relationship This book shows how dictatorships differ from one another and the implications of these differences for political outcomes In particular it examines political processes in personalist military single party monarchic and hybrid regimes The aim of the book is to provide a clear definition of what dictatorship means how authoritarian politics works and what the political consequences of dictatorship are It discusses how authoritarianism influences a range of political outcomes such as economic performance international conflict and leader and regime durability Numerous case studies from around the world support the theory and research presented to foster a better understanding of the inner workings of authoritarian regimes By combining theory with concrete political situations the book will appeal to undergraduate students in comparative politics international relations authoritarian politics and democratization The Great Betrayal Fawaz A. Gerges, 2025-04-29 A history of the political instability in the Middle East driven largely by great power conflict and predictions for the future of the region The Sykes Picot Agreement of 1916 divided the Middle East into states with unnatural boundaries drawn by colonial powers with short term interests and no consideration for the people or future of the region The century that followed saw bad governance systemic corruption geopolitical rivalries and endless foreign intervention and meddling effectively redrawing borders by force While there is no singular cause for instability in the Middle East Gerges s analysis explains the origins of numerous past and ongoing conflicts to draw conclusions about where the region is heading using the past to predict the future of Arab politics religion and life The Hundred Years War for the Middle East introduces Gerges s new Middle East shaped by the changes and discontinuity of present day He presents five major predictions for the next century state collapse and the emergence of new states the present state system enduring with minor alteration durability of political authoritarianism a new social contract based on

constitutional arrangements and a combination of both constitutionalism and political authoritarianism From the Sykes Picot Agreement to the rise of ISIS our modern understanding of the key actors non state organizations like Al Qaeda and ISIS and dominant forces allows us to examine how changing relationships and rising tensions will shape the next century

The African Charter on Human and Peoples' Rights Volume 2 Nat Rubner,2023 Landmark study of the African Charter on Human and Peoples Rights Documents on one side the international community s inability to foist a human rights system upon Africa and on the other the process within the OAU now African Union that eventually brought it into being and determined its content The African Charter on Human and Peoples Rights ACHPR which was proposed in 1979 adopted in 1981 and came into effect in 1986 was the first non Western declaration of human rights and the first official statement of an African human rights perspective With Africa largely absent in 1948 when the Universal Declaration of Human Rights UDHR was adopted it stands in stark historical reproach to the Western conception of universal human rights as a pivotal document in the decolonisation of the continent This book for the first time presents a comprehensive account of the development of the ACHPR which is key to a proper understanding of its fundamental nature Through documenting its process of construction it becomes possible to understand how Africans themselves understood the process and the issues involved and how the ACHPR became a political text asserted by African leaders and not a continuum of a so called universal human rights tradition The result is a radical repositioning of the underlying context of the ACHPR one of the most important documents in modern African history of how it came to be and how it should therefore be understood Volume 2 describes the process through which the ACHPR came into being Analysing the role of Western governments the UN and NGOs it shows that contrary to the prevailing view of African human rights commentators their influence was limited and at times counter productive That in fact the formulation of the ACHPR was a profoundly political process that was primarily a product of an African desire to instigate its own human rights perspective as a counter to the human rights universalism advanced by the Western post war human rights tradition

Islamists of the Maghreb Jeffry Halverson,Nathaniel Greenberg,2017-10-05 In 2011 the Maghreb occupied a prominent place in world headlines when Sidi Bouzid Tunisia became the birthplace of the so called Arab Spring Events in Tunisia sparked huge and sometimes violent uprisings Longstanding dictatorships fell in their wake The ensuing democratic reforms resulted in elections and the victory of several Islamist political parties in the Arab world This book explores the origins development and rise of these Islamist parties by focusing on the people behind them In doing so it provides readers with a concise history of Sunni Islam in North Africa the violent struggles against European colonial occupation and the subsequent quest for an affirmation of Muslim identities in its wake Exploring Islamism as an identity movement rooted in the colonial experience this book argues that votes for Islamist parties after the Arab Spring reflected a universal human need for an authentic sense of self This view contrasts with the popular belief that support for Islamists in North Africa reflects a dangerous fundamentalist view of the world that seeks to simply impose archaic religious

laws on modern societies Rather the electoral success of Islamists in the Maghreb like Tunisia s Ennahdha party is rooted in a reaffirmation of the Arab Islamic identities of the Maghreb states long delayed by dictatorships that mimicked Western models and ideologies e g Socialism Ultimately however it is argued that this affirmation is a temporary phenomenon that will give way in time to the fundamental need for good governance accountability and a stable growing economy in these countries Written in an accessible format and providing fresh analytical perspectives on Islamism in the Maghreb this book will be a valuable tool for students and scholars of Political Islam and North African Politics From Independence to Revolution Gillian Kennedy,2017 Argues that the relationship between a divided Islamist movement and the state create a pattern of instability within Egypt *State and Society in Iraq* Benjamin Isakhan,Shamiran Mako,Fadi Dawood,2017-03-17 The activities of ISIS since 2014 have brought back to centre stage a series of very old and very troubling questions about the integrity and viability of the Iraqi state However most analysts have framed recent events in terms of their immediate past and without the contextual background to explain their evolution *State and Society in Iraq* moves beyond a short sighted analysis to place the complex and contested nature of Iraqi politics within a broader and deeper historical examination In doing so the chapters demonstrate that beyond the overwhelming emphasis on failed occupations cruel tyrants ethnic separatists and violent religious fanatics is an Iraqi people who have routinely agitated against the state advocated for legitimate and accountable government and called for inter communal harmony When the authors maintain the Iraqi people are given agency in the complex process of consent negotiation and resistance that underpin successful state society relations the nation can move beyond patterns of oppression and cruelty of dangerous rhetoric and divisive politics and towards a cohesive peaceful and prosperous future despite the many difficulties and the steep challenges that lie ahead Financial reforms, stabilization and development in 21st-century Turkey Haluk Haksal,2019-03-28 The central argument of this book is that while central bank independence can contribute to stabilization inflation targeting monetary policy is quite powerless in promoting economic development The basic message is simple Policy makers should not strive to achieve price stability at any cost as stability in product markets does not necessarily translate into economic development The recent experience of Turkey is illuminating and other developing countries in particular those using inflation targeting monetary policy framework can draw useful lessons from this experience Early chapters summarize the deregulation process from 1980 to 2001 The Turkish Central Bank is placed at the center of the analysis as monetary policies have a significant impact both on stability and development Although the 1994 and 2001 financial crises have been extensively studied elsewhere they are nevertheless summarized to underscore the importance of central bank independence Later chapters investigate the impact of an independent central bank on stabilization and development from 2001 onwards Upon visiting the Turkish Central Bank s website readers are greeted with the following statement The primary objective of the Bank is to achieve and maintain price stability By the end of this book the reader should be able to assess the relative merits of a

monetary policy that focuses on price stability versus an alternative where price stability is accompanied by other objectives targeting development for instance monitoring also unemployment rates which would undermine its independence to some degree The study aims to provide a perspective on the need for such an alternative in line also with the vision of some international agencies on development such as the UNCTAD and the ILO This is the first book length study examining the financial reforms Turkey undertook in its path towards EU accession This unique work will be of interest to economists and other experts in financial history de regulation institutional economics and economic development as well as a broad range of scholars interested in the dramatic transformation of Turkey s economy and society in the 21st century **Historical**

Dictionary of Morocco Aomar Boum, Thomas K. Park, 2016-06-02 A historical reference work on Morocco must take as its subject al maghrib al aqsa the far west as the Arabic scholars have generally referred to the approximate region of present day Morocco roughly the north west corner of Africa but at times including much of the Iberian peninsula because the modern nation state is a relatively recent creation owing much to events in the late 19th and early 20th centuries External influences on Morocco tend to come across the narrow straits of Gibraltar to the north from the east along the Mediterranean litoral or up from the Sahara In each case access is constrained by geography and continued control from outside the region has been difficult to manage over the long term Although many of the dynasties that came to power in Morocco conquered much broader regions history and topology have so conspired that there is still more coherence to an historical focus on al maghrib al aqsa than is the case for most modern nation states This third edition of Historical Dictionary of Morocco contains a chronology an introduction a glossary and an extensive bibliography The dictionary section has over 600 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Morocco **Oil** Xiaobing Li, Michael Molina, 2014-10-14 Despite ongoing efforts to find alternatives oil is still one of the most critical and valuable commodities on earth This two volume set provides extensive background information on key topics relating to oil profiles countries that are major producers and consumers of oil and examines relevant political issues Aside from air and water oil is perhaps the most valuable natural resource Oil supplies the tremendous energy needs of the modern world What exactly is oil where does it come from how does it get consumed and who is using it This encyclopedia provides clear answers to these questions and more offering students entries on the fundamentals of the oil industry and profiles of the countries that play a major role in oil production and consumption Volume 1 presents topical entries on critical concepts key terms major oil spills and disasters and important organizations and individuals relating to the oil industry Entries define terms such as barrel and reserve cover incidents such as the BP oil spill and explain the significance of organizations such as OPEC The second volume spotlights specific countries that are major producers consumers exporters and importers of oil from the United States to Russia to Saudi Arabia to Venezuela Each profile shows readers the importance of oil in that country through a brief
