The Oxford Handbook of Foreign Policy Analysis Juliet Kaarbo, Cameron Theis, 2024-01-17 The Oxford Handbook of Foreign Policy Analysis repositions the subfield of Foreign Policy Analysis FPA to a central analytic location within the study of International Relations IR Over the last twenty years IR has seen a cross theoretical turn toward incorporating domestic politics decision making agency practices and subjectivity the staples of the FPA subfield This turn however is underdeveloped theoretically empirically and methodologically To reconnect FPA and IR research this handbook links FPA to other theoretical traditions in IR takes FPA to a wider range of state and non state actors and connects FPA to significant policy challenges and debates By advancing FPA along these trajectories the handbook directly addresses enduring criticisms of FPA including that it is isolated within IR it is state centric its policy relevance is not always clear and its theoretical foundations and methodological techniques are stale The Oxford Handbook of Foreign Policy Analysis provides an inclusive and forward looking assessment of this subfield Edited and written by a team of world class scholars and with a preface by Margaret Hermann and Stephen Walker the handbook sets the agenda for future research in FPA and in IR The Oxford Handbooks of International Relations is a twelve volume set of reference books offering authoritative and innovative engagements with the principal sub fields of International Relations The series as a whole is under the General Editorship of Christian Reus Smit of the University of Queensland and Duncan Snidal of the University of Oxford with each volume edited by specialists in the field The series both surveys the broad terrain of International Relations scholarship and reshapes it pushing each sub field in challenging new directions Following the example of Reus Smit and Snidal's original Oxford Handbook of International Relations each volume is organized around a strong central thematic by scholars drawn from different perspectives reading its sub field in an entirely new way and pushing scholarship in challenging new directions

Strategic Dilemmas and the Evolution of German Foreign Policy since Unification Jeffrey Lantis,2002-09-30 Lantis examines continuity and change in German foreign policy in the decade since unification Between 1949 and 1990 the Federal Republic of Germany pursued one of the most consistent foreign policy patterns of any Western power Restrictions on an assertive German military posture became deeply rooted in the public psyche in foreign policy tradition and in the Basic Law However the end of the Cold War the collapse of the Soviet Union and the unification of Germany have fundamentally changed the international and domestic parameters of German foreign policy A review of contemporary developments shows that a dramatic evolution of German foreign policy is currently underway from checkbook diplomacy in the Gulf War to the humanitarian relief mission in the Horn of Africa and from Contact Group diplomacy to airstrikes in Kosovo To explore this evolution of German foreign policy since unification Lantis presents an innovative model of external internal linkages derived

from two important areas of scholarship on the role of international crises as catalysts for foreign policy change and the importance of domestic political conditions that ultimately determine the scope and pace of such change Five original case studies place German political debates about how best to respond to challenges of the post Cold War era in social and historical context by drawing on discursive analyses of government documents parliamentary debates and elite interviews These cases illustrate the rise of a new consensus on the political left for engagement in global affairs reinterpretations of historical lessons for contemporary German policy and the constitutional challenges of global activism since unification Of particular interest to scholars students and researchers involved with German politics international security policy and comparative foreign policy

The World in Canada David Carment, David Bercuson, 2008-02-07 In response to these questions contributors trace changes in Canada's demographic make up explore the relationship between domestic politics and Canadian foreign policy across the fields of diplomacy development defense and security and immigration and determine the extent to which Quebec's sensibilities to international issues differ from those of the rest of the country The World in Canada argues that under certain conditions the motivation to pursue certain policy choices arises as much from domestic considerations as from the international conditions associated with them

National Role Conception and Neoclassical Realism Guangyi Pan, 2025-06-27 Despite China's alignment with Russia being one of the most significant factors shaping the international order the dynamics of their historic relationships and more importantly the sources of China's alignment policy remain underexplored In this book *National Role Conception and Neoclassical Realism* a synthetic exploration into the Sino Soviet alignment Guangyi Pan investigates this question by analysing the changes in China's national role conception from a cross level perspective Adding value to existing scholarly works on China's decision making logic he examines two critical and dramatic moments in the history of Beijing's alignment policy towards Moscow the Sino Soviet split in the 1960s and the normalisation in the 1980s Based on massive historic documents and archives he argues that the evolution of Beijing's approach to aligning with Moscow results from its changing perception of China's role in the world platform especially its role relationship with the Soviet Union The fundamental logic lies in how China positions itself with the Soviet Union long

serving as a mirror reflecting Beijing's desired roles during pivotal transformations. By developing a more rigorous and coherent framework to analyse role conceptions, Guangyi Pan explores unit level factors including leader images, elite cohesion and political culture alongside the impact of systemic stimuli. This approach constructs the complex process of role formation, evolution, performance and policy outcomes, offering a comprehensive understanding of China's alignment with Russia throughout modern history. Aimed primarily at scholars whose research fields include international relations theory, the Cold War history and politics of China, National Role Conception and Neoclassical Realism may also be of interest to foreign policymakers, students and political history enthusiasts.

Shaping Strategy Risa Brooks, 2018-06-05. Good strategic assessment does not guarantee success in international relations, but bad strategic assessment dramatically increases the risk of disastrous failure. The most glaring example of this reality is playing out in Iraq today. But what explains why states and their leaders are sometimes so good at strategic assessment and why they are sometimes so bad at it? Part of the explanation has to do with a state's civil-military relations. In *Shaping Strategy*, Risa Brooks develops a novel theory of how states' civil-military relations affect strategic assessment during international conflicts. And her conclusions have broad practical importance: to anticipate when states are prone to strategic failure abroad, we must look at how civil-military relations affect the analysis of those strategies at home. Drawing insights from both international relations and comparative politics, *Shaping Strategy* shows that good strategic assessment depends on civil-military relations that encourage an easy exchange of information and a rigorous analysis of a state's own relative capabilities and strategic environment. Among the diverse case studies, the book illuminates Brooks' explanation of why strategic assessment in Egypt was so poor under Gamal Abdel Nasser prior to the 1967 Arab-Israeli war and why it improved under Anwar Sadat. The book also offers a new perspective on the devastating failure of U.S. planning for the second Iraq war. Brooks argues that this failure, far from being unique, is an example of an assessment pathology to which states commonly succumb.
