**Choosing an Identity** Sun-Ki Chai, 2010-05-06 Social science research is fragmented by the widely differing and seemingly contradictory approaches used by the different disciplines of the social sciences to explain human action Attempts at integrating different social science approaches to explain action have often been frustrated by the difficulty of incorporating cultural assumptions into rational choice theories without robbing them of their generality or making them too vague for predictions Another problem has been the major disagreements among cultural theorists regarding the ways in which culture affects preferences and beliefs This book provides a general model of preference and belief formation addressing the largest unresolved issue in rational choice theories of action It attempts to play a bridging role between these approaches by augmenting and modifying the main ideas of the rational choice model to make it more compatible with empirical findings in other fields The resulting model is used to analyze three major unresolved issues in the developing world the sources of a

**Power without Force** Robert W. Jackman, 2010-06-02 Decolonization after World War II led to a significant global increase in the number of states Each new nation was born with high expectations But these hopes were soon eroded by the ineffectiveness and capriciousness of many of the new regimes In many states military juntas have become the order of the day and even where juntas have not taken power political differences have repeatedly degenerated into violent exchanges that do not readily lend themselves to political settlement Not only the new states have suffered from these problems indeed political solutions to conflict have become depressingly conspicuous by their absence Against this background the last decade has seen a resurgence of interest in evaluating the political capacity or strength of modern nation states In Power without Force Robert Jackman argues that political capacity has two broad components organizational age and legitimacy Thus it is essential to focus both on institutions conceived in organizational terms and the amount of compliance and consent that leaders are able to engender The emphasis on each reflects the view that political life centers on the exercise of power and that unlike physical force power is intrinsically relational Although all states have the capability to inflict physical sanctions their ability to exercise

power is the key element of their political capacity Drawing on a wide range of studies from political science sociology and political economy *Power without Force* redirects attention to the central issues of political capacity By stressing that effective conflict resolution must be addressed in political terms this volume underscores perennial issues of governance and politics that form the heart of comparative politics and political sociology
