Political Theory And Praxis New Perspectives:

Political Theory and Praxis Terence Ball, 1977 **Reconstructing Nonviolence** Roberto Baldoli, 2018-09-03 Nonviolent methods of action have been a powerful tool since the early twentieth century for social protest and revolutionary social and political change and there is diffuse awareness that nonviolence is an efficient spontaneous choice of movements individuals and whole nations Yet from a conceptual standpoint nonviolence struggles to engage with key contemporary political issues the role of religion in a post secular world the crisis of democracy and the use of supposedly nonviolent techniques for violent aims Drawing on classic thinkers and contemporary authors in particular the Italian philosopher Aldo Capitini this book shows that nonviolence is inherently a non systematic and flexible system with no pure immaculate thought at its core Instead at the core of nonviolence there is praxis which is impure because while it aims at freedom and plurality it is made of less than perfect actions performed in an imperfect environment by flawed individuals Offering a more progressive transformative and at the same time pluralistic concept of nonviolence this book is an original conceptual analysis of political theory which will appeal to students of international relations global politics security studies peace studies and democratic theory Introduction to Political Theory Devoreaux Ford, 2018-11-19 Political Theory at Stanford approaches the study of justice legitimacy and power by conjoining normative theory positive theory and the intellectual history of political thought Among the topics with which our faculty and students are concerned are democracy equality global justice international relations realism and idealism education deliberation institutional innovation and the organization of knowledge This book on Political Theory examines a fairly wide range of issues on political theory and explores the major issues of it by presenting the perspectives of major theorists This gracefully structured intellectually rigorous book gives students necessary historical background while examining basic themes and assessing the validity of basic arguments It elaborates the nature and significance of political theory presented in a clear direct style which can be easily understood by the students with little previous exposure to political science Rather than simply presenting an abstract of the major issues of political theory it examines leading arguments with all the major concepts It is particularly designed to cater to the need of the students and teachers of several universities colleges and for the students preparing for various competitive examinations e **Making the Political** Leigh K. Jenco, 2010-06-03 Democratic political theory often sees collective action as the basis for non coercive social change assuming that its terms and practices are always self evident and accessible But what if we find ourselves in situations where collective action is not immediately available or even widely intelligible This book examines one of the most intellectually substantive and influential Chinese thinkers of the early twentieth century Zhang Shizhao 1881 1973 who insisted that it is individuals who must make the political before social movements or self aware political communities have materialized Zhang draws from British liberalism democratic theory and late Imperial Confucianism to formulate new roles for effective individual action on personal social and institutional registers In the process he offers a vision of community that

turns not on spontaneous consent or convergence on a shared goal but on ongoing acts of exemplariness that inaugurate new unpredictable contexts for effective personal action **The Political Thought of Hannah Arendt** Michael G.

Gottsegen,1994-01-01 It explicates Arendt s major works The Human Condition Between Past and Future On Revolution The Life of the Mind and Lectures on Kant s Political Philosophy and explores her contributions to democratic theory and to contemporary postmodern and neo Kantian political philosophy *Nietzsche, Epistemology, and Philosophy of Science* B.E. Babich,2013-03-09 Nietzsche Epistemology and Philosophy of Science is the second volume of a collection on Nietzsche and the Sciences featuring essays addressing truth epistemology and the philosophy of science with a substantial representation of analytically schooled Nietzsche scholars This collection offers a dynamic articulation of the differing strengths of Anglo American analytic and contemporary European approaches to philosophy with translations from European specialists notably Carl Friedrich von Weizsäcker Paul Valadier and Walther Ch Zimmerli This broad collection also features a preface by Alasdair MacIntyre Contributions explore Nietzsche s contributions to the philosophy of language and epistemology and include essays on the social history of truth and the historical and cultural analyses of Serres and Baudrillard as well as new contributions to the philosophy of science including theological and hermeneutical approaches history of science the philosophy of medicine cognitive science and technology **Aristotelian Philosophy** Kelvin Knight,2013-05-30 Aristotle is the most influential philosopher of practice and Knight s new book explores the continuing importance of Aristotelian philosophy First it examines the theoretical bases of what Aristotle said about ethical political and productive activity It then traces ideas of practice through such figures as St Paul Luther Hegel Heidegger and recent Aristotelian philosophers and evaluates Alasdair MacIntyre s contribution Knight argues that whereas Aristotle s own thought legitimated oppression MacIntyre s revision of Aristotelianism separates ethical excellence from social elitism and justifies resistance With MacIntyre Aristotelianism becomes revolutionary MacIntyre s case for the Thomistic Aristotelian tradition originates in his attempt to elaborate a Marxist ethics informed by analytic philosophy He analyses social practices in teleological terms opposing them to capitalist institutions and arguing for the cooperative defence of our moral agency In condensing these ideas Knight advances a theoretical argument for the reformation of Aristotelianism and an ethical argument for social change **The Crisis of German Historicism** Liisi Keedus,2015-02-26 A comparative intellectual history of the political thought of Hannah Arendt and Leo Strauss two influential and controversial German Jewish American political philosophers

practice How are theory and practice related What is the role of values in educational research Is a genuinely educational science possible By appealing to developments in critical theory the philosophy of science and the philosophy of the social sciences Wilfred Carr provides answers to these questions which vindicate the idea of an educational science that is not on or about education but for education a science genuinely committed to promoting educational values and ideals Looking Into Primary Headship Geoff Southworth,2002-11-01 This is both a study of leadership and a research methods text It offers an analytical description of a primary headteacher at work over the course of one school year Using a mix of participant observation and interviews the book provides a portrait of this head s approach to his work his background beliefs the school as a context what he did how he dealt with change and development power and the personal dimension of headship The portrait is matched to the contemporary literature and an hypothesis is formulated about primary headship and is then used to critique existing ideas about school leadership The book also suggests ways of developing heads and school teachers

The Pragmatic Century Sheila Greeve Davaney, Warren G. Frisina, 2006-10-12 Critically engages the work of American philosopher Richard J. Bernstein **Violence** Richard J. Bernstein, 2018-03-08 We live in a time when we are overwhelmed with talk and images of violence Whether on television the internet films or the video screen we can't escape representations of actual or fictional violence another murder another killing spree in a high school or movie theatre another action movie filled with images of violence Our age could well be called The Age of Violence because representations of real or imagined violence sometimes fused together are pervasive But what do we mean by violence What can violence achieve Are there limits to violence and if so what are they In this new book Richard Bernstein seeks to answer these questions by examining the work of five figures who have thought deeply about violence Carl Schmitt Walter Benjamin Hannah Arendt Frantz Fanon and Jan Assmann He shows that we have much to learn from their work about the meaning of violence in our times Through the critical examination of their writings he also brings out the limits of violence There are compelling reasons to commit ourselves to non violence and yet at the same time we have to acknowledge that there are exceptional circumstances in which violence can be justified Bernstein argues that there can be no general criteria for determining when violence is justified The only plausible way of dealing with this issue is to cultivate publics in which there is free and open discussion and in which individuals are committed to listen to one other when public debate withers there is nothing to prevent the triumph of murderous violence False Consciousness Guenter Lewy, 2017-07-05 In this book Guenter Lewy explains and critiques the idea of false consciousness that people living under capitalism do not know their best interests This idea was prevalent in the writings of nineteenth century Marxism modern communism and the New Left Lewy applies what German scholars call Ideologiekritik to the Marxian concept of ideology or false consciousness itself to demystify the concept of mystification He also presents an account of the historical development of the concept and the dangers of its application in society Belief in

false consciousness inspired many social scientists to propose that elite classes in capitalist countries use the media and the education system to manipulate the proletariat thus perpetuating their own power Lewy marshals social scientific evidence to refute that idea demonstrating that education and the mass media in the United States in fact often challenge accepted values and the status quo Lewy documents Soviet and Chinese brainwashing efforts to eradicate dangerous political ideas and values derived from a belief in false consciousness He also reviews attempts by Marxist and neo Marxist educators and social scientists in the Federal Republic of Germany West Germany to free young people from false consciousness by means of emancipatory pedagogy a program of intense political indoctrination Idioms of Inquiry Terence Ball, Professor of Political Science Terence Ball, 1987-01-01 Idioms of Inquiry reflects the most recent and creative thinking in the field of political theory The contributors agree that the old orthodox political theory is no longer viable arguing instead for a pluralism of approaches Each takes a particular idiom of inquiry on its own terms and analyzes its plausibility and internal limitations The idioms discussed cover the current leading theories rational choice Popperian situational analysis hermeneutics phenomenology critical theory feminism Foucauldian deconstructionism and metascientific realism

Internet Governance Ry'mone Griffin, 2018-11-20 This book has shown that Internet governance is already taking place in a variety of localized international regimes each driven by a distinct politics While any sweeping global governance regime for the Internet simultaneously raises dangers of intrusive over centralization and irrelevance we think that the problems loopholes and unsavory politics associated with certain aspects of the existing evolution of governance makes it worthwhile to take a more comprehensive look at the system as a whole The book also created a framework for the identification of public policy issues associated with Internet governance and looked in greater detail at four specific areas of policy
