Patrone, Paul Formosa, Avery Goldman, 2014-04-15 This volume critically examines and elucidates the complex relationship between politics and teleology in Kant's philosophical system Examining this relationship is of key philosophical importance

since Kant develops his political philosophy in the context of a teleological conception of the purposiveness of both nature and human history Kant's approach poses the dual task of reconciling his normative political theory with both his priori moral philosophy and his teleological philosophy of nature and human history The fourteen essays in this volume by leading scholars in the field explore the relationship between teleology and politics from multiple perspectives Together the essays explore Kant's normative political theory and legal philosophy his cosmopolitanism and views on international relations his theory of history his theory of natural teleology and the broader relationship between morality history nature and politics in Kant's works This important new volume will be of interest to a wide audience including Kant scholars scholars and students working on topics in moral and political philosophy the philosophy of history political theory and political science legal scholars and international relations theorists as well as those interested broadly in the history of ideas

De Nike,1997

*Germany and the Baltic Problem After the Cold War* Kristina Spohr Readman,2004-06-10 Questions how a unified Germany will use its great power status Draws on numerous confidential interviews with key political actors and on unprecedented access to still classified material *Handbook of Globalization, Governance, and Public Administration* Ali Farazmand,Jack Pinkowski,2006-07-25 Globalization transcends borders and cultures as it develops both from the natural flow of information and communication technologies and as a directed and driven quest for global hegemony by self serving corporations and world political heavyweights It bears a multifaceted web of influence that manifests in inequalities in growth prosperity and *German National Identity in the Twenty-First Century* R. Wittlinger,2010-10-01 Wittlinger takes a fresh look at German national identity in the 21st century and shows that it has undergone considerable changes since unification in 1990 Due to the external pressures of the post cold war world and recent domestic developments Germany has re emerged as a nation which is less hesitant to assert its national interest *Jacob Burckhardt's Social and Political Thought* Richard Franklin Sigurdson,2004-01-01 Contrary to his usual portrayal as a disinterested aesthete Swiss cultural historian Jacob Burckhardt is characterised as an original social and political thinker in Richard Sigurdson's timely book *Jacob Burckhardt's Social and Political Thought* Burckhardt's thinking on a number of ideas including the relationship

between the individual and the mass the tension between the ideals of equality and human excellence and the role of the intellectual in the modern state is the subject of insightful analysis thus providing a rare investigation into Burckhardt s culture critique of the nineteenth century Other important aspects of Burckhardt s life that undoubtedly influenced both his historical and political thought such as his ambiguous relationship with Friedrich Nietzsche are carefully scrutinised in this groundbreaking analysis of the Swiss historian Known primarily as an historian Burckhardt s historical writings provide not only a powerful critique of his own times but also a broad ranging political philosophy that can be placed within the larger German tradition of evaluating politics according to the values and standards of art and culture Although Burckhardt himself expressed his scepticism towards general theories and claimed to be devoid of a personal philosophical position through an examination of his works Sigurdson argues that both implicit and explicit political reflections and theories are recognisable

**International Development Governance** Ahmed Shafiqul Huque,Habib Zafarullah,2017-09-25 The establishment of good governance is a major challenge for the developing world along with the need to sustain the progress resulting from developmental efforts Although there are numerous studies on the development and governance of emerging nations few volumes make a serious effort to bring together these two critical concepts International Development Governance combines the two concepts development and governance by examining the issues and problems faced by nations in their attempts to establish sustainable governance This textbook also initiates discussions on the concept of development governance in an international context The book fills the gap in existing literature by drawing upon the experience and expertise of scholars from a broad spectrum of knowledge Their views explain the issues and problems with reference to a number of tools that could establish development governance and sustain it The text offers in depth examinations of developmental sectors resulting in a textbook that will inspire future public officials policy makers and consultants to contribute to the betterment of life for citizens of developing countries

[A History of Modern Political Thought in East Central Europe](#) Balázs Trencsenyi, Michal Kopeček, Luka Lisjak Gabrijelčić, Maria Falina, Mónika Baár, 2018-10-18 A History of Modern Political Thought in East Central Europe is a synthetic work authored by an international team of researchers covering twenty national cultures and 250 years It goes beyond the conventional nation centered narratives and presents a novel vision especially sensitive to the cross cultural entanglement of political ideas and discourses Its principal aim is to make these cultures available for the global market of ideas and revisit some of the basic assumptions about the history of modern political thought and modernity as such The present volume is the final part of the project following Volume I Negotiating Modernity in the Long Nineteenth Century and Volume II Part I Negotiating Modernity in the Short Twentieth Century 1918 1968 OUP 2018 Its starting point is the defeat of the vision of socialism with a human face in 1968 and the political discourses produced by the various consolidation or normalization regimes It continues with mapping the exile communities and domestic dissidents critical engagement with the local democratic and anti democratic traditions as well as with global trends Rather than achieving the coveted end of history however the liberal democratic order created in East Central Europe after 1989 became increasingly contested from left and right alike Thus instead of a comfortable conclusion pointing to the European integration of most of these countries the book closes with a reflection on the fragility of democracy in this part of the world and beyond
