The Politics of Defense Contracting Gordon Adams, 2020-02-18 This is the first systematic study of the relationship between government and defense contractors examining in detail the political impact of the eight most powerful defense contractors It details ways in which Boeing General Dynamics Grumman McDonnell Douglas Northrop Rockwell International and United Technologies influence government from their basic contract activity corporate structure and research efforts to their Washington offices Political Action Committee campaign contributions hiring of government personnel and membership on federal advisory committees Adams concludes with specific recommendations for changes in disclosure requirements that would curb some of the political power corporations can wield It also suggests specific ways in which the Iron Triangle can be made subject to wider congressional and public scrutiny *Democracy with Justice/La juste democratie* Alain-G.

*Lobbying Bibliography* Frederick M. Herrmann, 1998 *Political Equality* Charles R. Beitz, 1989 In this revised edition of his 1979 classic *Political Theory and International Relations* Charles Beitz rejects two highly influential conceptions of

international theory as empirically inaccurate and theoretically misleading In one international relations is a Hobbesian state of nature in which moral judgments are entirely inappropriate and in the other states are analogous to persons in domestic

society in having rights of autonomy that insulate them from external moral assessment and political interference Beitz postulates that a theory of international politics should include a revised principle of state autonomy based on the justice of a

state s domestic institutions and a principle of international distributive justice to establish a fair division of resources and wealth among persons situated in diverse national societies **Economic Books**, 1980 **Fluctuating Fortunes** David

Most of the essays in this volume have appeared in scholarly journals or in books edited by others. A few are published here for the first time. None has been taken from one of my books. A reader would have to go to much trouble to find them; that is the reason for bringing them together. Collections of essays are frequently miscellanies. This one is not. Except for the final two chapters, all deal with some aspect of the American political system. Some have to do with the structure and functioning of the federal system, others with the nature of public and incidentally other organization, and still others with the causes and supposed cures of the social problems that government is nowadays expected to solve or cope with. The two final chapters are about the relationship between economics and political science. For lack of a better term, they may be methodological.

**Party Politics in Canada** Hugh G. Thorburn, 1985. Aimed at upper level undergraduate and graduate classes at the university level, this collection of 33 essays provides a broad range of perspectives on Canada's diverse and dynamic political climate. It is a classic political studies reader that combines the strengths of tradition and innovation: papers by distinguished political experts are combined with the perspectives of modern scholars to create a thoroughly updated text.
