what we confront in politics and society live claims for us to confront in our own with the stakes of that confrontation being live as well they originate a dialectic with one another and with us their readers Cicero called rhetoric a liberal art necessary for every citizen of a free republic In the polities of ancient Greece and Rome rhetoric was politically potent because oratory was the regular means of political decision Words were decisive often a matter of life and death not merely for individuals but for peoples In human milieux where human speech is so politically decisive reflection upon its nature became keen The selections of this sourcebook have been arranged in three sequences The first two sequences comprise philosophical dialogues on the ends of rhetoric Selections from Plato's Gorgias Phaedrus and Apology examine the rhetorician or teacher of rhetoric and then Cicero's De oratore offers us a dialectic among practitioners about its practice The philosophical dialogues on the art's intended ends and causative effects provide the theoretical and ethical context for examining its means These philosophical dialogues are thus propaedeutic to the third sequence which focusses on the art itself with selections from Aristotle's treatise On Rhetoric paired with orations from Thucydides History of the Peloponnesian War

Diachrony José M. González,2015-12-14 Not a few of the more prominent and persistent controversies among classical scholars about approaches and methods arise from a failure to appreciate the fundamental role of time in structuring the interpretation of Greek culture Diachrony showcases the corresponding importance of diachronic models for the study of ancient Greek literature and culture Diachronic models of culture reach beyond mere historical change to the systemically evolving dynamics of cultural institutions practices and artifacts The papers collected here illustrate the construction and proper use of such models They emphasize the complementarity of synchronic and diachronic perspectives and highlight the need to assess how well diachronic models fit history The contributors to this volume strive to be methodologically explicit as they tackle a wide range of subjects with a variety of diachronic approaches Their work shows both the difficulty and the promise of diachronic analysis Our incomplete knowledge of Greek antiquity throughout time and the Greeks own preoccupation with the past in the construction of their present make diachronic analysis not just invaluable but indispensable for the study of ancient Greek literature and culture
