Now in a Longman Classics Edition, it features a new Foreword by Keith Reeves of Swarthmore College.

Political Participation and American Democracy William J. Crotty, 1991-10-30 This volume addresses the recurring problem of the non participation of significant numbers of citizens in the political process of the US political system. Specifically, the book explores the reasons why half of eligible voters fail to exercise their basic right to vote. **Participation in America** Sidney Verba, Norman H. Nie, 1987-01-16 Participation in America represents the largest study ever conducted of the ways in which citizens participate in American political life. Sidney Verba and Norman H. Nie address the question of who participates in the American democratic process, how and with what effects. They distinguish four kinds of political participation: voting, campaigning, communal activity, and interaction with a public official to achieve a personal goal. Using a national sample survey and interviews with leaders in 64 communities, the authors investigate the correlation between socioeconomic status and political participation. Recipient of the Kammerer Award 1972, Participation in America provides fundamental information about the nature of American democracy. **Engaging the Public** Thomas J. Johnson, Carol E. Hays, Scott P. Hays, 1998 This volume of original essays by leading political scientists and media scholars examines the nature of political disengagement among the public and offers concrete solutions for how the government and media can stimulate public engagement in the political process. **The Unheavenly Chorus** Kay Lehman Schlozman, Sidney Verba, Henry E. Brady, 2012-04-09 Why American democracy favors the affluent and educated. Politically active individuals and organizations make huge investments of time, energy, and money to influence everything from election outcomes to congressional subcommittee hearings to local school politics, while other groups and individual citizens seem woefully underrepresented in our political system. The Unheavenly Chorus is the most comprehensive and systematic examination of political voice in America ever undertaken, and its findings are sobering. The Unheavenly Chorus is the first book to look at the political

participation of individual citizens alongside the political advocacy of thousands of organized interests membership associations such as unions professional associations trade associations and citizens groups as well as organizations like corporations hospitals and universities Drawing on numerous in depth surveys of members of the public as well as the largest database of interest organizations ever created representing more than thirty five thousand organizations over a twenty five year period this book conclusively demonstrates that American democracy is marred by deeply ingrained and persistent class based political inequality The well educated and affluent are active in many ways to make their voices heard while the less advantaged are not This book reveals how the political voices of organized interests are even less representative than those of individuals how political advantage is handed down across generations how recruitment to political activity perpetuates and exaggerates existing biases how political voice on the Internet replicates these inequalities and more In a true democracy the preferences and needs of all citizens deserve equal consideration Yet equal consideration is only possible with equal citizen voice The Unheavenly Chorus reveals how far we really are from the democratic ideal and how hard it would be to attain it

Berry,2002-09-13 In an era when government seems remote and difficult to approach participatory democracy may seem a hopelessly romantic notion Yet nothing is more crucial to the future of American democracy than to develop some way of spurring greater citizen participation In this important book Jeffrey Berry Ken Portney and Ken Thompson examine cities that have created systems of neighborhood government and incorporated citizens in public policymaking Through careful research and analysis the authors find that neighborhood based participation is the key to revitalizing American democracy The Rebirth of Urban Democracy provides a thorough examination of five cities with strong citizen participation programs Birmingham Dayton Portland St Paul and San Antonio In each city the authors explore whether neighborhood associations encourage more people to participate whether these associations are able to promote policy responsiveness on the art of local governments and whether participation in these associations increases the capacity of people to take part in government Finally the authors outline the steps that can be taken to increase political participation in urban America Berry Portney and Thomson show that citizens in participatory programs are able to get their issues on the public agenda and develop a stronger sense of community greater trust in government officials and more confidence in the political system From a rigorous evaluation of surveys and interviews with thousands of citizens and policymakers the authors also find that central governments in these cities are highly responsive to their neighborhoods and that less conflict exists among citizens and policymakers The authors assert that these programs can provide a blueprint for major reform in cities across the country They outline the components for successful participation programs and offer recommendations for those who want to get involved They demonstrate that participatio

Asian American Political Participation Janelle S. Wong, S. Karthick Ramakrishnan, Taeku Lee, Jane Junn, Janelle Wong, 2011-10-01 Asian Americans are a small percentage of the U.S. population but their numbers are steadily rising from less than a million in 1960 to more than 15 million today. They are also a remarkably diverse population representing several ethnicities, religions, and languages, and they enjoy higher levels of education and income than any other U.S. racial group. Historically, socioeconomic status has been a reliable predictor of political behavior. So why has this fast-growing American population, which is doing so well economically, been so little engaged in the U.S. political system? *Asian American Political Participation* is the most comprehensive study to date of Asian American political behavior, including such key measures as voting, political donations, community organizing, and political protests. The book examines why some groups participate while others do not, why certain civic activities are deemed preferable to others, and why Asian socioeconomic advantage has so far not led to increased political clout. *Asian American Political Participation* is based on data from the authors' groundbreaking 2008 National Asian American Survey of more than 5,000 Chinese, Indian, Vietnamese, Korean, Filipino, and Japanese Americans. The book shows that the motivations for and impediments to political participation are as diverse as the Asian American population. For example, native-born Asians have higher rates of political participation than their immigrant counterparts, particularly recent adult arrivals who were socialized outside of the United States. Protest activity is the exception, which tends to be higher among immigrants who maintain connections abroad and who engaged in such activity in their country of origin. Surprisingly, factors such as living in a new immigrant destination or in a city with an Asian American elected official do not seem to motivate political behavior; neither does ethnic group solidarity. Instead, hate crimes and racial victimization are the factors that most motivate Asian Americans to participate politically. Involvement in non-political activities such as civic and religious groups also bolsters political participation. Even among Asian groups, socioeconomic advantage does not necessarily translate into high levels of political participation. Chinese Americans, for example, have significantly higher levels of educational attainment than Japanese Americans but Japanese Americans are far more likely to vote and make political contributions. And Vietnamese Americans, with the lowest levels of education and income, vote and engage in protest politics more than any other group. Lawmakers tend to favor the interests of groups who actively engage the political system and groups who do not participate at high

levels are likely to suffer political consequences in the future Asian American Political Participation demonstrates that understanding Asian political behavior today can have significant repercussions for Asian American political influence tomorrow *Handbook on Political Trust* Sonja Zmerli, Tom W.G. van der Meer, 2017-01-27 Political trust in government parliament or political parties has taken centre stage in political science for more than half a century reflecting ongoing concerns with the legitimacy and functioning of representative democracy To provide scholars students and policy makers with a tool to navigate through the complexity of causes and consequences of political trust this Handbook offers an excellent overview of the conceptual theoretical methodological and empirical state of the art complemented by accounts of regional particularities and authored by international experts in this field
