The Struggle for Redress Jessie Barton-Hronešová, 2020-08-05 This book explores pathways to redress for main groups of victims survivors of the 1992-5 Bosnian war families of missing persons victims of torture survivors of sexual violence and victims suffering physical disabilities and harm The author traces the history of redress making for each of these groups and shows how differently they have been treated by Bosnian authorities at the state and subnational level In Bosnia and Herzegovina thousands of war victims have had to suffer re-traumatizing ordeals in order to secure partial redress for their suffering during 1992-1995 and after While some such as victims of sexual violence have been legally recognised and offered financial and service based compensation others such as victims of torture have been recognized only recently with a clear geographical limitation The main aim of the book is to explore the politics behind recognizing victimhood and awarding redress in a country that has been divided by instrumentalized identity cleavages widespread patronage and debilitating war legacies It shows how war victims survivors navigate such fragmented and challenging public landscape in order to secure their rights

The Equitable Forest Carol J. Pierce Colfer, 2010-09-30 While there continues to be refinement in defining and assessing sustainable management there remains the urgent need for policies that create the conditions that support sustainability and can halt or slow destructive practices already underway Carol Colfer and her contributors maintain that standardized solutions to forest problems from afar have failed to address both human and environmental needs Such approaches they

argue often neglect the knowledge that local stakeholders have accumulated over generations as forest managers and do not address issues involving the diversity and well being of groups within communities The contributors note that these problems persist despite clear evidence that equity and social relationships including gender roles are important factors in the ways that communities adapt to change and manage forest resources overall The Equitable Forest offers an alternative to traditional externally organized strategies for forest management Termed adaptive collaborative management ACM the approach tries to better acknowledge the diversity complexity and unpredictability of human and natural systems ACM works to strengthen local institutions and use the knowledge and capacity of groups in local communities to enhance the health and well being of both forests and the people who live in and around them The Equitable Forest provides a detailed explanation of the descriptive analytical and methodological tools of ACM along with accounts of early stages of its implementation in tropical regions of Asia Africa and Latin America Although the contributors make it clear that it is too soon to evaluate the efficacy of ACM their work is supported by evidence that rural communities do make important contributions when involved in formal forest management that management strategies are most effective when flexible and tailored to local contexts and that efforts by outside governmental and nongovernmental organizations to support local management are feasible from the policymaking perspective and desirable for their impact on human economic and environmental well being

Rhetoric of the Greensboro Truth and Reconciliation Commission explores rhetorical attempts to authorize the Greensboro Truth and Reconciliation Commission a grassroots U S based truth commission created in 2004 to redress past injustices in the city Through detailed rhetorical analyses the book demonstrates that the development of the field of transitional justice has given rise to a transnational rhetorical tradition that provides those working in the field with series of enabling constraints The book then shows how Greensboro stakeholders attempted to reaccentuate this rhetorical tradition in their rhetorical performances to construct authority and bring about justice even as the tradition shaped their discourse in ways that limited the scope of their responses Calling attention to the rhetorical interdependence among practitioners of transitional justice this study offers insights into the development of transitional justice in the United States and in grassroots contexts in other liberal democracies The volume is a relevant guide to scholars and practitioners of transitional justice as it brings into relief mechanisms of transitional justice that are frequently overlooked namely rhetorical mechanisms It also speaks to any readers who may be interested in the communicative strategies tactics that may be employed by grassroots transitional justice initiatives
