Political Science Comparative Governance:

Comparative Governance B. Guy Peters, Jon Pierre, 2016-09-07 Decision making is at the heart of governing and governance and is a more challenging task compared to just a few decades ago as a result of increasing social complexity and globalization In this book B Guy Peters and Jon Pierre propose a new framework for the comparative analysis of governance arguing that government remains a central actor in governance By articulating the functionalist dimension of governance they show how goal setting resource mobilization decision making implementation and feedback can be performed by a combination of different types of actors Even so effective governance requires a leading role for government The framework is also applied to a taxonomy of governance arrangements and national styles of governing *Comparative Governance* advances our knowledge about governance failure and how forms of governance may change It also significantly strengthens the theory of governance showing how governance can be studied conceptually as well as empirically **Political Science**

Governance and Politics of China Tony Saich, 2017-09-07 The success or failure of China's development will impact not only its own citizens but also those of the world. China is widely recognized as a global actor on the world stage and no global challenge can be resolved without its participation. Thus it is important to understand how the country is ruled and what the policy priorities are of the new leadership. Can China move to a more market-based economy while controlling environmental degradation? Can it integrate hundreds of millions of new migrants into the urban landscape? The tensions between communist and capitalist identities continue to divide society as China searches for a path to modernization. The People's Republic is now over 65 years old, an appropriate juncture at which to reassess the state of contemporary Chinese politics. In this substantially revised fourth edition and essential guide to the subject, Tony Saich delivers a thorough introduction to all aspects of politics and governance in post-Mao China, taking full account of the changes of the 18th Party Congress and the 12th National People's Congress. Further, the rise of Xi Jinping to power and his policies are examined, as are important policy areas such as urbanization and the fight against corruption.

The Study of Comparative Government Roy C. Macridis,1955 *Toward Better Governance in China* Baogang Guo,Dennis V. Hickey,2009-11-12

Toward Better Governance in China takes a fresh look at the latest efforts made by Chinese leaders to promote governance based reform It asserts that the improvement of governance has now become one of the breakthrough points of the much anticipated political reform Although the Chinese government continues to play down expectations about political reform many small scale reform experiments have been quietly undertaken by Chinese leaders at various levels in recent years including the new round of administrative reform centered on the creation of super ministries the enlargement of inner party democracy within the Chinese Communist Party CCP the strengthening of local legislative bodies and judicial reform designed to promote judicial independence and rule of law This strategy calls for strengthening governing capacity and changing government functions One of the advantages in placing the improvement of governance first is that it is less risky than embarking upon a full scaled electoral reform Electoral democracy is undoubtedly an important element in a functional democracy But equally important is the effectiveness transparency accountability and openness of the governing process Better governance implies greater transparency open deliberation and participation and less adversarial political confrontation and conflict If constructed properly China may become the sort of democratic administration or administrative democracy that Robert Dahl discussed in 1947 Clearly political reform of this kind does not follow the conventional wisdom of a democratic transition which places heavy emphasis on electoral reform or the precedence of the electoral reform to the government reform This book is intended to shed some new light on the ongoing debate about the direction of China s political development

The Europeanization of National Administrations Sevasti Chatzopoulou, 2020-09-04 Drawing on comparative politics and social network analysis this book examines how the domestic institutional and organizational settings as well as the network governance patterns determine variation in administrative responses to EU s Common Agricultural Policy CAP in two European Union EU member states Denmark and Greece These two small member states represent the North and South dimensions of the EU The north south dimension in relation to administrative structures respond differently to EU common policies and to Common Agricultural Policy specifically which has not been studied in the Europeanization literature Even though the study of administrative responses to EU common policies is important as it has been especially noticeable during the current financial crisis Europeanisation studies concentrate on either large Western European states France Germany and UK or small Western Northern states These studies produced detailed knowledge on specific countries and policy areas but they ignored the agricultural policy area and the importance of small Southern member states By comparing a small Southern with a small Northern state since the accession to the EU this book aims to fill this gap in the literature Moreover by linking the findings of the two cases to the member states that joined the EU in the 2004 fifth enlargement and in other policy areas it allows a better understanding of similar responses either adaptation or inertia This book represents an important contribution to the theoretical and empirical literature on Europeanisation and the Common Agricultural Policy CAP It systematically tackles an under studied question does Europeanisation of policies lead to administrative change and convergence among the member states The domestic administration of the EU CAP has remained domestically designed and monitored resulting in divergence among the member states and gaps and imbalances in the performance of EU CAP decisions The CAP is of more general interest because it combines regulatory and market intervention policy instruments The analysis proceeds through in depth comparative historical case studies of Denmark and Greece which uses a sophisticated combination of quantitative and qualitative methodologies The authoritative and

informative analysis is structured by a focus on three key domestic factors There is differentiated administration of common policies and while administration succeeds and adapts in one state it does not necessarily do so in others leading to differences in implementation performance This book should provide a stimulus for further research Wyn Grant University of Warwick The last 40 years have been crucial for the European agriculture The Common Agricultural Policy fulfilled its primary objective which led Europeans to shift its objectives and cope with the shortcomings created by the success of the Policy itself manage surpluses and narrow the gap between farmers due to price mechanism as well as adapt the policy following the successive enlargements and follow the developments in the global economy in which we live nowadays Dr Chatzopoulou gives us a very accurate image on how differently actors of the agricultural economy farmers cooperatives and the administrations both in Greece and Denmark behave But also how different is the structure of the sector in these two countries in Denmark almost everything is based upon a consensus where there does not exist a law on cooperatives and where the administration and the sector work together to adapt or to influence the decisions to take at European level On the other hand in Greece farmers struggle to make their voice heard in the absence of professional organizations the cooperatives are bound to work in the framework of a specific and strict law and the administration was not shown very cooperative with the sector These two realities are very well illustrated by the author and many lessons are to be learnt through this study But above all the author gives us a fair idea of how complex is the process of Europeanisation in a Europe Union composed of sovereign member States with different history culture social organization and different legal systems Vaggelis Divaris Former European Commission principal administrator DG Agriculture and Rural Development
