Politics Of Warfare The Great Powers In The Twentieth Century:

The Politics of Warfare Stephen J. Cimbala, 1997 The twentieth century is often described as a century of total war ranging from the two World Wars to countless civil wars and terrorist conflicts As the century draws to a close Stephen J Cimbala wonders how the nature of warfare has changed over the years His starting point is a simple observation by Carl von Clausewitz the great Prussian philosopher of war that wars are inseparable from politics The Politics of Warfare explores how Clausewitz stands up against the historic experience of our century and anticipates what we might expect as we enter the next Cimbala admits that wars are still political creatures but he argues that they are often politicized in ways that Clausewitz did not foresee Among the wars Cimbala singles out for study are the two World Wars the Cold War Vietnam and the Gulf War He considers the roles of intelligence special operations and military persuasion He draws mainly though not entirely on U S experience Overall The Politics of Warfare suggests that wars of the largest and smallest kind are the most subject to political and military distortion wars of intermediate scope and stake are more likely to be fought within a proper frame of civil and military reference Written by a seasoned observer of military strategy The Politics of Warfare questions many assumptions about the nature of war Cimbala s conclusions gain added significance in the confused terrain of our post Cold War world

Geopolitics and the Great Powers in the 21st Century C. Dale Walton, 2007-06-11 This book argues that in the twenty first century Eastern Eurasia will replace Europe as the theatre of decision in international affairs and that this new geographic and cultural context will have a strong influence on the future of world affairs For half a millennium the great powers have practised what might be called world politics yet during that time Europe and small portions of the Near East and North Africa strategically vital to Europe were the centres of gravity in international politics

This book argues that the unipolar moment of the post Cold War era will not be replaced by a US China Cold War but rather by a long period of multipolarity in the twenty first century Examining the policy goals and possible military political strategies of several powers this study explains how Washington may play a key role in eastern Eurasian affairs if it can learn to operate in a very different political context Dale Walton also considers the rapid pace of technological change and how it will impact on great power politics Considering India China the US Russia Japan and other countries as part of a multipolar system he addresses the central questions that will drive US policy in the coming decades Geopolitics and the Great Powers in the 21st Century will be of interest to students of international security military history geopolitics and international relations

Managing Babel: The International Legal Protection of Minorities in the Twentieth Century Li-Ann Thio, 2005-01-01 Minority protection is integral to a civilised standard of internal good governance The goal of promoting friendly inter group relations within states highlights the linkages between constitutionalism and the extending reach of international law in shaping domestic governance and structuring relations between the state non state communities and individuals While law per se cannot guarantee the security and integrity of minority groups law and legal institutions play a role in promoting a tolerant and pluralistic environment and a multicultural ethos that appreciates rather than resents ethno cultural diversity This book is a

comprehensive modern study of the important field of international protection of minority rights focusing on 20th century developments. Minority rights regimes which address the issue of group identity and autonomy have essentially been a stabilising force buttressing state survivability in the face of claims to self determination or secession. These serve to promote the peaceful co existence of distinct ethno cultural groups captured by the metaphor of Babel within existing states. Despite overlaps the content of minority protection is more modest than the claim of indigenous groups for collective rights or peoples rights to self determination. As part of the contemporary corpus of human rights norms minority protection may be appreciated as an aspect of the evolving content of the internal dimension of the right to self determination. Chapter 1 introduces some key definitional and conceptual problems in the field of minority protection and presents a brief historical review of international approaches up to 1919. Chapter 2 discusses the League of Nations era. Chapter 3 examines approaches towards minority protection after World War Two as reflected in the drafting of the United Nations Charter and efforts to protect minorities outside the UN regime. In this period discussed in Chapters 4 and 5 minorities issues remained largely submerged within the UN project of promoting universal individual human rights. Chapter 6 addresses the post 1989 revival in minorities issues within the UN. Chapter 7 offers a succinct overview of what might be considered a parallel history with respect to the development of regional human rights schemes and what these afford to minority protection closing with concluding observations. Meticulously researched this volume offers a valuable synthesis of this important but often heart breaking field.
