Realism In Green Politics Social Movements And Ecological Reform In Germany:

Realism in Green Politics Helmut Wiesenenthal,1993 This study provides a critique of ecological fundamentalism based on the experience of West German Green politics It proposes structural reforms for achieving sustainable resources in modern societies and advocates political realism as the best way to reconcile social and ecological objects *Ideas and Actions in the Green Movement* Brian Doherty,2005-07-05 The Western green movement has grown rapidly in the last three decades green ministers are in government in several European countries Greenpeace has millions of paying supporters and green direct action against roads GM crops the WTO and neo liberalism have become ubiquitous The author argues that greens share a common ideological framework but are divided over strategy Using social movement theory and drawing on research from many countries he shows how the green movement became more differentiated over time as groups had to face the task of deciding what kind of action was appropriate In the breadth of its coverage and its novel focus on the relationship between green ideas and action this book makes an important contribution to the understanding of green politics

The Left Libertarianism of the Greens Kire Sharlamanov,2023-08-03 This book offers a systematic and multifaceted analysis of the Greens on the levels of political philosophy political concepts social movement political parties and political ideology The originality of the book lies in the determination of the political philosophy of the Greens as left libertarianism Such a determination of the Greens can already be found in the writings of Herbert Kitschelt but while he only makes a cursory mention of it this book offers a detailed elaboration of the points of contact between left libertarianism and the Greens The book also attempts to explain the acceptance of left libertarianism by the Greens with social processes in Western Europe the emergence of a new middle class and post materialist values At the same time the book examines the relationship between the left libertarian political philosophy of the Greens and the organizational structure of the Green parties their relationship to the state and to democracy *Critical Political Studies* Abigail B. "Landscape Imagery, Politics, and Identity in a Divided Germany, 1968-1989" Catherine Wilkins, 2017-07-05 *Landscape Imagery Politics and Identity in a Divided Germany 1968-1989* explores the communicative relationship between German landscape painting and the viewing public that developed in the wake of the student revolutions of the late 1960s

The book demonstrates that contrary to some historical thinking more similarities than differences characterized the sociopolitical concerns of East and West Germans during the late Cold War Era and that it was these shared issues that were reflected in the revival of the Romantic painting genre Catherine Wilkins focuses on recovering the agency of the individual artist and in revising historiography with sensitivity to narration from below Interdisciplinary in nature art historians can benefit from the study's analysis of images and artists not widely known outside of Germany Additionally the consolidation of statistics and data regarding German postwar cultural policy are relevant for political and cultural historians The author contributes to the ongoing multidisciplinary debates regarding Histoire Crois in arguing that a clear dichotomy between East Germany and West Germany did not exist but rather that the residents of both nations shared a concern over some of the same issues of the period and memory studies by using images as primary historical sources able to be employed in the recovery of potentially subversive memory and identity Issues related to gender relations environmentalism and spiritual belief are addressed by Wilkins with appeal for scholars working with those particular themes Poststructuralist and literary theorists as well can find arguments supporting an alternative means of writing history through artworks and private memories
