

METAPHYSICS DIVISION: JOHN V. FLYNN, *Chairman*.

THE MEANING OF PARTICIPATION IN ST. THOMAS

During the last fifteen years the notion of participation has become more and more the focus of attention on the part of Thomistic historians and metaphysicians. As a result of an important series of studies by European scholars, such as those of Fabro, Geiger, De Finance, De Raeymacker, the very recent work of Arthur Little, the Irish Jesuit, and not a few others, the doctrine of participation has now emerged as one of the central structural pieces of the whole philosophical system of St. Thomas. The same studies also bring out the unmistakable indebtedness of the Angelic Doctor to the Neoplatonic tradition for the main lines of this theory.¹

The consequence has been to force us to revise considerably our estimate of just what constitutes the characteristic "personality," so to speak, of the Thomistic system, both as regards its inner structural unity and its authentic historical relations with its predecessors. When the modern Thomistic revival began under Leo XIII in the latter part of the preceding century, it was the Aristotelian facet of St. Thomas's philosophy which was the first to emerge into the limelight and to occupy the attention of Thomistic historians.² It soon became apparent, however, as independent historical study of both Aristotle and St. Thomas progressed, that the originality of the latter and his independence of Aristotle were considerably greater than had been suspected. The fundamental point of difference was accurately analyzed as lying at the very heart of the metaphysics of being, namely, in the radical shift of equilibrium operated by St. Thomas from form and essence to the act of existence or *esse* as the metaphysical core of every being and the basic unifying perfection of the universe. Perhaps the single figure to whom we owe most both for the scientific justification and the successful propagandizing of this interpretation is Prof. Gilson.³

Van Steenberghen, "L'interprétation de la pensée médiévale au cours du siècle écoulé", in *Scholastica Ratione Historico-Critica Instauranda: Acta Congressus Scholastici Internationalis, 1950* (Rome, 1951), p. 33. Characteristic examples of this period are the classic treatises of De Régnon, *Métaphysique des causes* (Paris, 1886), and especially of A. Farges, *Théorie fondamentale de l'acte et de la puissance, du moteur et du mobile* (Paris, 1886), in which there is not a single mention of the principle of the limitation of act by potency, now recognized as the heart of the Thomistic act-potency theory.

³ For example, in his well-known books, *Le Thomisme*, 5e éd. (Paris, 1944), Chap. I: "Existence et réalité"; and *Being and Some Philosophers* (Toronto, 1950).

Includes a list of members Husserlian Intentionality and Non-Foundational Realism J.J. Drummond,1990-02-28 The rift which has long divided the philosophical world into opposed schools the Continental school owing its origins to the phenomenology of Husserl and the analytic school derived from Frege is finally closing But this closure is occurring in ways both different and in certain respects at odds with one another On the one hand scholars are seeking to rediscover the concerns and positions common to both schools positions from which we can continue fruitfully to address important philosophical issues On the other hand successors to both traditions have developed criticisms of basic assumptions shared by the two schools They have suggested that we must move not merely beyond the conflict between these two modern schools but beyond the kind of philosophy represented in the unity of the two schools and thereby move towards a new postmodern philosophical style On the one hand then and for example Husserl scholarship has in recent years witnessed the development of an interpretation of Husserl which more closely aligns his phenomenology with the philosophical concerns of the analytic tradition In certain respects this should come as no surprise and is long overdue It is true after all that the early Husserl occupied himself with many of the same philosophical issues as did Frege and the earliest thinkers of the analytic tradition Examples include the concept of number the nature of mathematical analysis meaning and reference truth formalization and the relationship between logic and mathematics Dictionary Of Modern American Philosophers John R. Shook,2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought **Practices of Belief: Volume 2, Selected Essays** Nicholas Wolterstorff,2010-02-11 This volume brings together Nicholas Wolterstorff's essays on epistemology written between 1983 and 2008 American Catholic Philosophical Quarterly ,1999 **The Realist Turn** Douglas B. Rasmussen,Douglas J. Den Uyl,2020-08-05 Douglas B Rasmussen and Douglas J Den Uyl maintain that a realist turn namely one in which the natural order is the basis for

individual rights is needed to bring about a proper understanding and defense of liberty They argue that the critical character of individual rights results from their being tethered to metaphysical realism After reprising their explanation and defense of natural rights Rasmussen and Den Uyl explain metaphysical realism and defend it against neo pragmatist objections They show it to be a formidable and preferable alternative to epistemic constructivism and crucial for a suitable understanding of ideal theory Proceedings of the Boston Area Colloquium in Ancient Philosophy John J. Cleary, Gary M. Gurtler, 1998-12 This volume represents some of the activities of the Boston Area Colloquium in Ancient Philosophy from the academic year 1997 98 It contains nine colloquia that were hosted by eight different colleges and universities in the greater Boston area Discussions of the works of Plato dominate this volume with six of the nine colloquia based on Platonic texts Appropriately the colloquia begin with an analysis of division in the ancient atomists Later a study of truth in Aristotle gives a counterpoint to the Platonic interplay of drama and pedagogy or logic and rhetoric examined in papers about the Theaetetus and Symposium A presentation of Proclus s account of evil revisits some of the issues of sophistry and morality discussed in relation to Plato s Republic and Euthydemus Finally the remaining Platonic papers are in a way not about Plato at all but about Socrates and Xanthippe supplementing Platonic dialogues with Xenophon and others Underneath these discussions of ancient texts current modes of philosophy run along providing a score of alternative interpretative schemes This publication has also been published in paperback please click here for details The ACPA in Today's Intellectual World American Catholic Philosophical Association.
