Adjusting to Reality Robert Klitgaard, 2021-12-24 Originally published in 1991 Robert Klitgaard's classic book addresses questions of enduring relevance in a lively and insightful way Bribes tribes and markets that fail these are the realities in many developing countries The usual strategies for reform be they capitalist or socialist have failed to address them effectively What is to be done when economic reforms leave the poor behind or when when new constitutions and elections are undercut by inefficient bureaucracies overcentralization and corruption And what to do about persistent ethnic inequalities within developing countries The book provides inspiring examples from around the world as well as analytical frameworks to guide inclusive policy discussion Theorists will enjoy the novel uses of industrial economics the theory of the firm and the economics of discrimination The book highlights overlooked causes of underdevelopment imperfect information and weak information processing in individuals and institutions In the preface the former President of Panama Dr Nicol's Ardito Barletta writes Poverty Klitgaard argues is and should be a principal concern of development strategists but policy makers and analysts will continue to run from pillar to post in their search for a cure unless they can adjust their development schemes to reality The new approach that the author proposes is based on two fundamental principles One is that the proper choice of economic strategies cannot be determined in the abstract but depends on particular circumstances The other is that information is at the heart of problems in the real world of the developing countries Klitgaard offers examples from Bolivia Brazil India Indonesia Malaysia Pakistan Peru and the Philippines to make his point The author suggests creative ways in which the state and citizens themselves can solve their own inevitably unique problems One of the key tasks in Klitgaard's view is to ensure that environments are rich in information This volume offers a broad framework for policy analysis that moves us closer to intelligent solutions to the real problems of the real poor in the modern world
