Global Perspectives in the Geography Curriculum Alex Standish, 2008-10-07 For geographers across the globe, this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians. Standish's careful critique shows the necessity of a depoliticised geography curriculum, the irony of which would be that it would ensure that every child could point to Iraq, Iran, and Afghanistan on a map. Prof. Dennis Hayes, Oxford Brookes University, UK. A prescient and critical analysis of the changing face of geography teaching. This book deserves to be widely read and debated. Alex Standish's book puts current trends in geography teaching in historical and critical context. It comprises a forthright and timely defence of geographical education for its own sake. Dr. Jim Butcher, FRSA, Department of Sport Science, Tourism and Leisure, Canterbury Christ Church University. Since the early 1990s, educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts, ideas, and skills to a more ethics-based subject concerned with the promotion of environmentalism, cultural diversity, and social justice. In this book, the new approach is critically examined within a historical and ideological context, addressing a number of fundamental questions: Should geography be used as a tool for the delivery of citizenship ideals? How does this affect the intellectual and moral value of geographical education for young people? If the state and teachers are taking more responsibility for the values, attitudes, and emotional responses of students, how will they learn to develop these qualities for themselves? If global perspectives shift the focus of education from learning about the outside world to learning about the self, what is its vision of social progress and conception of social change? This book advocates a return to liberal models of education, arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live. A vital resource for teachers and student teachers alike. *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself.

Navigating the Tension Between Sovereignty and Self-Determination in Postcolonial Africa Philip C. Aka, 2024-01-16 This book addresses the unique challenges faced by Africa

regarding peaceful self determination Unlike other regions Africa has seen limited success in nonviolent self determination campaigns Since 1989 only three African nations Namibia Eritrea and South Sudan have joined the UN after enduring prolonged and violent struggles for independence In a world characterized by constant change border alterations typically require armed conflicts in postcolonial Africa In response to this disconcerting trend the book offers pragmatic blueprints for achieving peace emphasizing constitutional approaches to navigate the delicate balance between sovereignty and self determination The work delves into the complexities of five self determination struggles spanning three African countries providing valuable insights into the challenges faced It distils six critical lessons from these case studies and presents fourteen blueprint proposals tailored to address the unique dynamics of postcolonial Africa where reconciling sovereignty and self determination remains a pressing concern

Reconnecting Lives to the Land Allison Hayes-Conroy, 2007 It proposes that researchers use agriculture as a framework for discussion debate and dialogue on issues of environmental economic and cultural significance The dialogue on agriculture that the book advances also questions whether current discourses within the environmental community are bound to exclusive ideologies and are thus flawed as means of all inclusive dialogue Jacket
