E. H. Carr and International Relations Charles Jones, 1998-10 E H Carr is widely remembered as an influential theorist of international relations The scourge of inter war idealists he became the best known Briton in a generation of predominantly American political realists But Carr's realism differed greatly from that of his contemporaries a vigorous advocate of social and economic planning and friend of the Soviet Union he stood closer to Lenin than to Morgenthau In this book Charles Jones makes sense of Carr's distinctive form of realism by examining his rhetoric and the reciprocal relationship between theory and policy making in his writings Close attention is paid to the period from 1936 when Carr left the Foreign Office through his subsequent career as a one man foreign ministry at Aberystwyth the Ministry of Information and above all The Times culminating in the final frustration of his schemes for continued British world power in 1947

Scientific Methods of Inquiry for Intelligence Analysis Hank Prunckun, 2014-09-08 Since 9 11 the needs of intelligence agencies as well as the missions they conduct have increased in number size and complexity As such government and private security agencies are recruiting staff to analyze the vast amount of data collected in these missions This textbook offers a way of gaining the analytic skills essential to undertake intelligence work It acquaints students and analysts with how intelligence fits into the larger research framework It covers not only the essentials of applied research but also the function structure and operational methods specifically involved in intelligence work It looks at how analysts work with classified information in a security conscious environment as well as obtain data via covert methods Students are left with little doubt about what intelligence is and how it is developed using scientific methods of inquiry This revised edition of the popular text has been expanded and updated significantly

Impediments to the Prevention and Intervention of Genocide Samuel Totten, 2013 Academics NGOs the United Nations and individual nations are focused on the prevention and intervention of genocide Traditionally missions to prevent or intervene in genocide have been sporadic and under resourced The contributors to this volume consider some of the major stumbling blocks to the avoidance of genocide Bartrop

and Totten argue that realpolitik is the major impediment to the elimination of genocide Campbell examines the lack of political will to confront genocide and Theriault describes how denial becomes an obstacle to intervention against genocide Loyle and Davenport discuss how intervention is impeded by a lack of reliable data on genocide violence and Macgregor presents an overview of the influence of the media Totten examines how the UN Convention on Genocide actually impedes anti genocide efforts and how the institutional configuration of the UN is itself often a stumbling block Addressing an issue that is often overlooked Travis examines the impact of global arms trade on genocide Finally Hiebert examines how international criminal prosecution of atrocities can impede preventive efforts and Hirsch provides an analysis of the strengths weaknesses and effectiveness of major international and national prescriptions developed over the last decade The result is a distinguished addition to Transaction's prestigious Genocide Studies series

The War Puzzle Revisited John A. Vasquez, 2009-07-23 A scientific explanation of the onset and expansion of war and the conditions of peace

The Killing Trap Manus I. Midlarsky, 2005-10-20 The Killing Trap offers a comparative analysis of the genocides politicides and ethnic cleansings of the twentieth century which are estimated to have cost upwards of forty million lives The book seeks to understand both the occurrence and magnitude of genocide based on the conviction that such comparative analysis may contribute towards prevention of genocide in the future Manus Midlarsky compares socio economic circumstances and international contexts and includes in his analysis the Jews of Europe Armenians in the Ottoman Empire Tutsi in Rwanda black Africans in Darfur Cambodians Bosnians and the victims of conflict in Ireland The occurrence of genocide is explained by means of a framework that gives equal emphasis to the non occurrence of genocide a critical element not found in other comparisons and victims are given a prominence equal to that of perpetrators in understanding the magnitude of genocide

International Norms and the Resort to War Gregory A. Raymond, 2020-08-27 This book offers a fresh perspective on timeless questions concerning anarchy and order power and principle and public and private morality by taking a novel approach to the study of the onset of war Rather than looking at the distribution of wealth military might or other material capabilities to explain the onset of war this book focuses instead on how international norms affect the use of military force Critical of the realist assumption that international legal norms are unable to curb hostilities without a powerful central authority to enforce their injunctions it contends that the normative context within which national leaders act sets the tone for world politics by communicating commonly accepted understandings about the limits of permissible action Using quantitative analyses of the relationships between war initiation norms and various types of armed conflict the author calls into question realist beliefs regarding international norms demonstrating that restrictive normative orders reduce the likelihood of war

Methods of Inquiry for Intelligence Analysis Hank Prunckun, 2019-04-12 Few professions have experienced change to the same extent as has intelligence Since the 9 11 attacks the role of intelligence has continued to grow and its mission remains complex Government and private security agencies are recruiting intelligence analysts in ever

higher numbers to process what has become a voluminous amount of raw information and data. Methods of Inquiry for Intelligence Analysis offers students the means of gaining the analytic skills essential to undertake intelligence work and the understanding of how intelligence fits into the larger research framework. It covers not only the essentials of applied research but also the function, structure, and operational methods specifically involved in intelligence work.

The Prevention and Intervention of Genocide Samuel Totten, 2008-03-31. This volume is comprised of over 2,300 annotations on a wide array of issues and topics germane to the subject of preventing the atrocities of genocide and managing these conflicts when they do arise. Samuel Totten brings together in one comprehensive collection the research and findings in various fields such as political science, sociology, history, and psychology to enable specialists in genocide studies, peace studies, and conflict resolution to benefit from the insights of a diverse range of scholars and foster an understanding of how the various components of genocide studies connect. Among the topics included are key conventions, international treaties and covenants, genocide, early warning signals, and forecasting risk, data bases, sanctions, peacekeeping missions, conflict resolution, the International Criminal Court, realpolitik vis-à-vis the issue of genocide prevention and intervention, key non-governmental agencies, key governmental and UN bodies working on these important issues. In addition to the annotations, Totten frames the bibliography with a major essay that introduces the reader to the subject of prevention and intervention of genocide, raising a host of critical issues regarding the strengths, weaknesses, and limitations of various approaches germane to issues of managing these conflicts.
