Four Seasons Jane Breskin Zalben, 2011-02-08 Allegra Katz has been playing piano since she was four But these

aren't just any piano lessons. She studies at the Julliard School in New York where careers are being formed or not. Between strict practice schedules, music classes, and regular school, Ally doesn't have time for much else. Sometimes she wishes she could break free, but she's never known any other way. Her parents, a professional violinist and a singer, would kill her if they knew she was thinking about quitting piano, especially her mother. So she keeps on going, but as the months go by, she begins to ask herself: does she even love the piano? Why does she play? And how much longer can she stand the pressure before she breaks.

Driven by Data 2.0 Paul Bambrick-Santoyo, 2019-04-04 The bestselling guide for school leaders updated in a new edition. Data-driven instruction is the philosophy that schools should focus on two simple questions: how do you know if a student is learning? And when they are not, what do you do about it? *Driven by Data 2.0* is a practical guide that answers these questions to empower schools to achieve significant gains in student achievement. Rooted in a proven framework that has been implemented in thousands of schools, the book presents what makes schools successful along with tools to put the framework into place to make data work for your schools. Assess, set the roadmap for learning, Analyze, identify why students struggle, Act, teach more effectively what students need, Build the culture, train and develop your staff so that data-driven instruction can thrive. If you're a K-12 leader, coach, or teacher looking to implement data-driven instruction in your school district, *Driven by Data 2.0* has the tools to train your staff, PD materials, videos of exemplar practice, and all the resources you need to achieve remarkable results.

Probability, Choice, and Reason Leighton Vaughan Williams, 2021-09-15 Much of our thinking is flawed because it is based on faulty intuition. By using the framework and tools of probability and statistics, we can overcome this to provide solutions to many real-world problems and paradoxes. We show how to do this and find answers that are frequently very contrary to what we might expect. Along the way, we venture into diverse realms and thought experiments which challenge the way that we see the world. Features: An insightful and engaging discussion of some of the key ideas of probabilistic and statistical thinking. Many classic and novel problems, paradoxes, and puzzles. An exploration of some of the big questions involving the use of choice and reason in an uncertain world. The application of probability statistics and Bayesian methods to a wide range of subjects including economics, finance, law, and medicine. Exercises, references, and links for those wishing to cross-reference or to probe further. Solutions to exercises at the end of the book. This book should serve as an invaluable and fascinating resource for university, college, and high school students who wish to extend their reading as well as for teachers and lecturers who want to liven up their courses while retaining academic rigour. It will also appeal to anyone who wishes to develop skills with numbers or has an interest in the many statistical and other paradoxes that permeate our lives. Indeed, anyone studying the sciences, social sciences, or humanities on a formal or informal basis will enjoy and benefit from this book.
