Reason And Chance In Scientific Discovery:

Reason and Chance in Scientific Discovery René Taton, 1962

Reason and Chance in Scientific Discovery.

Translated by A.J. Pomerans Rene Taton, 1962

Scientific Discovery Aharon Kantorovich, 1993-07-01 Kantorovich

analyzes the notion of discovery He views the process as inference and questions whether there is logic or method to discovery He provides an alternative perspective on scientific discovery that explains the difficulties in finding a satisfactory method of discovery Within the framework of evolutionary epistemology discovery is treated as a phenomenon in its own right having psychological and social dimensions Science is viewed as a continuation of the evolutionary process whereby creative discovery plays a role similar to blind mutation in biological evolution From this perspective serendipity and tinkering are key notions in understanding the creative process

Chance Discoveries in Real World Decision Making

Yukio Ohsawa, Shusaku Tsumoto, 2006-12-13 For this book the editors invited contributions from indispensable research areas relevant to chance discovery which has been defined as the discovery of events significant for making a decision and studied since 2000 The chapters contain contributions to identifying rare or hidden events and explaining their significance The methods presented in this book are based on the interaction of human machine and humans living environment

Prematurity in Scientific Discovery Ernest B. Hook, 2002-10-02 In preparing this remarkable book Ernest Hook

persuaded an eminent group of scientists historians sociologists and philosophers to focus on the problem why are some discoveries rejected at a particular time but later seen to be valid The interaction of these experts did not produce agreement on prematurity in science but something more valuable a collection of fascinating papers many of them based on new research and analysis which sometimes forced the author to revise a previously held opinion The book should be enthusiastically welcomed by all readers who are interested in how science works Stephen G Brush co author of *Physics The Human Adventure From Copernicus to Einstein and Beyond* Prematurity and Scientific Discovery contains interesting and insightful papers by numerous well known scientists and scholars It will be of wide interest not only to science studies scholars but also to working scientists and to science literate general readers Thomas Nickles editor of *Scientific Discovery Logic and Rationality*

Chase, Chance, and Creativity James H. Austin, 2003-08-15 A personal story of the ways in which persistence chance and creativity interact in biomedical research This first book by the author of *Zen and the Brain* examines the role of chance in the creative process James Austin tells a personal story of the ways in which persistence chance and creativity interact in biomedical research the conclusions he reaches shed light on the creative process in any field Austin shows how in his own investigations unpredictable events shaped the outcome of his research and brought about novel results He then goes beyond this story of serendipity to propose a new classification of the varieties of chance drawing on his own research and examples from the history of science including the famous accidents that led Fleming to the discovery of penicillin Finally he explores the nature of the creative process considering not only the environmental and

neurophysiological correlates of creativity but also the role of intuition in both scientific discoveries and spiritual quests This updated MIT Press paperback edition includes a new introduction and recent material on medical research creativity and spirituality

Model-Based Reasoning in Scientific Discovery L. Magnani, N.J. Nersessian, Paul Thagard, 2012-12-06 The volume is based on the papers that were presented at the International Conference Model Based Reasoning in Scientific Discovery MBR 98 held at the Collegio Ghislieri University of Pavia Pavia Italy in December 1998 The papers explore how scientific thinking uses models and explanatory reasoning to produce creative changes in theories and concepts The study of diagnostic visual spatial analogical and temporal reasoning has demonstrated that there are many ways of performing intelligent and creative reasoning that cannot be described with the help only of traditional notions of reasoning such as classical logic Traditional accounts of scientific reasoning have restricted the notion of reasoning primarily to deductive and inductive arguments Understanding the contribution of modeling practices to discovery and conceptual change in science requires expanding scientific reasoning to include complex forms of creative reasoning that are not always successful and can lead to incorrect solutions The study of these heuristic ways of reasoning is situated at the crossroads of philosophy artificial intelligence cognitive psychology and logic that is at the heart of cognitive science There are several key ingredients common to the various forms of model based reasoning to be considered in this book The models are intended as interpretations of target physical systems processes phenomena or situations The models are retrieved or constructed on the basis of potentially satisfying salient constraints of the target domain

Methods and Techniques in Business Research, **Science and Its History** Joseph Agassi, 2008-09-16 Professor Joseph Agassi has published his *Towards an Historiography of Science* in 1963 It received many reviews by notable academics including Maurice Finocchiaro Charles Gillispie Thomas S Kuhn Geroge Mora Nicholas Rescher and L Pearce Williams It is still in use in many courses in the philosophy and history of science Here it appears in a revised and updated version with responses to these reviews and with many additional chapters some already classic others new They are all paradigms of the author's innovative way of writing fresh and engaging chapters in the history of the natural sciences

Model-Based Reasoning, Abductive Cognition, Creativity Emiliano Ippoliti, Lorenzo Magnani, Selene Arfini, 2024-11-20 This book discusses how scientific and other types of cognition make use of models abduction and explanatory reasoning in order to produce important innovative and possibly creative changes in theories and concepts Gathering revised contributions presented at the international conference on Model Based Reasoning MBR023 held on June 7-9 2023 in Rome Italy the book addresses various intertwined topics ranging from the epistemology and applications of models also concerning the problem of knowledge production and scientific methodology information visualization experimental methods and design to the analysis of their role in cognition decision making also with respect to social implications The problem of model based cognition is also illustrated taking advantage of recent results regarding problem solving abduction and logic paying attention to a critique of the dominant and received

approaches to the aim of fostering new discussions and stimulate new ideas All in all the book provides researchers and graduate students in the fields of applied philosophy epistemology cognitive science and artificial intelligence alike with an authoritative snapshot of the latest theories and applications of model based reasoning
