CONTRIBUTED BY DR ANTHONY C HEARN THE RAND CORPORATION SANTA MONICA CALIFORNIA REDUCE is a computer program for algebraic computation that IS III world wide use by thousands of scientists engineers and mathematicians Although it traces its beginnings to 1963 until recently it has only been available on main frame computers because of its relatively large resource requirements In 1980 I predicted 1 that by the mid 1980 s it would be possible to obtain personal computers in the 10 000 20 000 range capable of running REDUCE I am therefore delighted to see that machines of the power of the IBM PC can now run this system even though these computers are more modestly priced than my 1980 vision of the personal algebra machine In addition to the need for the more widespread access that personal computers can now provide there has been a longstanding need for a textbook to help the beginning user become better acquainted with the system I am therefore very glad that Dr Rayna has undertaken to write such a book just as the era of the REDUCE personal algebra machine is beginning In order to understand the nature of REDUCE a little history is in order In 1963 I met Dr John McCarthy the inventor of LISP **English Grammar In Use with Answers and CD ROM** Raymond Murphy,2004-04-15 A fully updated version of the world s best selling grammar title **Resources in Education** ,1992-06
