Reasons And Knowledge:

Reasons and Knowledge Marshall Swain, 1981

Rules, Reason, and Self-Knowledge Julia Tanney, 2013-01-08

Tanney challenges not only the cognitivist approach that has dominated philosophy and the special sciences for fifty years but metaphysical empirical approaches to the mind in general. Rules Reason and Self Knowledge advocates a return to the world involving circumstance dependent normative practices where the rational mind has its home. Reason and the Search for Knowledge D. Shapere, 2012-12-06 An impressive characteristic of Dudley Shapere's studies in the philosophy of the sciences has been his dogged reasonableness. He sorts things out with logical care and mastery of the materials and with an epistemological curiosity for the historical happenings which is both critical and respectful. Science changes and the philosopher had better not link philosophical standards too tightly to either the latest orthodox or the provocative upstart in scientific fashions and yet as critic the philosopher must not only master the sciences but also explicate their meanings not those of a cognitive never never land. Neither dreamer nor pedant Professor Shapere has been able to practice the modern empiricist's exercises with the sober and stimulating results shown in this volume. He sees that he can be faithful to philosophical analysis, engage in the boldest rational reconstruction of theories and experimental measurements and faithful too empirically. Faithful we may say to both the direct superhighways and the winding pathways of conceptual evolutions and metaphysical revolutions. Not least Shapere listens to Einstein and Galileo of course but to the workings of the engineers and the scientific apprentices too and to the various philosophers now and of old who have also worked to make sense of what has been learned and how that has happened and where we might go wrong. *Knowledge and Evidence* Paul K. Moser, 1989 Philosophers have sought to define knowledge since the time of Plato. This inquiry outlines a theory of rational belief by challenging prominent skeptical claims that we have no justified beliefs about the external world. *The Self and Self-Knowledge* Annalisa Coliva, 2012-04-19 Investigates philosophical issues to do with the self and self knowledge. It focuses on two main problems: how to account for I thoughts and the consequences that doing so would have for our notion of the self and how to explain subjects ability to know the kind of psychological states they enjoy. *Knowledge First* J. Adam Carter, Emma C. Gordon, Benjamin Jarvis, 2017-11-10 Knowledge First constitutes what is widely regarded as one of the most significant innovations in contemporary epistemology in the past 25 years. Knowledge first epistemology is the idea that knowledge per se should not be analysed in terms of its constituent parts e.g. justification belief but rather that these and other notions should be analysed in terms of the concept of knowledge. This volume features a substantive introduction and 13 original essays from leading and up and coming philosophers on the topic of knowledge first philosophy. The contributors' essays range from foundational issues to applications of this project to other disciplines including the philosophy of mind, the philosophy of perception, ethics and action theory. *Knowledge First Approaches in Epistemology and Mind* aims to provide a relatively open ended forum for creative and original scholarship with the potential to contribute and advance debates.
