The Body and the State Cary Federman, 2012-02-01 The writ of habeas corpus is the principal means by which state prisoners many on death row attack the constitutionality of their conviction in federal courts In The Body and the State Cary Federman contends that habeas corpus is more than just a get out of jail free card it gives death row inmates a constitutional means of overturning a jury's mistaken determination of guilt Tracing the history of the writ since 1789 Federman examines its influence on federal state relations and argues that habeas corpus petitions turn legal language upside down threatening the states sovereign judgment to convict and execute criminals as well as upsetting the discourse created by the Supreme Court that the federal state relationship ought not be disturbed by convicted criminals making habeas corpus appeals He pays particular attention to the changes in the discourse over federalism and capital punishment that have restricted the writ's application over time

Medical Sociology:

The nature of medical sociology Graham Scambler, 2005 *Space, Knowledge and Power* Stuart Elden, 2016-04-01 Michel Foucault's work is rich with implications and insights concerning spatiality and has inspired many geographers and social scientists to develop these ideas in their own research. This book, the first to engage Foucault's geographies in detail from a wide range of perspectives, is framed around his discussions with the French geography journal *Hérodote* in the mid 1970s. The opening third of the book comprises some of Foucault's previously untranslated work on questions of space, a range of responses from French and English language commentators, and a newly translated essay by Claude Raffestin, a leading Swiss geographer. The rest of the book presents specially commissioned essays which examine the remarkable reception of Foucault's work in English and French language geography, situate Foucault's project historically, and provide a series of developments of his work in the contemporary contexts of power, biopolitics, governmentality, and war. Contributors include a number of key figures in social spatial theory such as David Harvey, Chris Philo, Sara Mills, Nigel Thrift, John Agnew, Thomas Flynn, and Matthew Hannah. Written in an open and engaging tone, the contributors discuss just what they find valuable and frustrating about Foucault's geographies. This is a book which will both surprise and challenge.

Charity and the London Hospitals, 1850-1898 Keir Waddington, 2000 Drawing on a comparative study of hospital records, *Charity and the London Hospitals* investigates how and why Victorians contributed in order to show that benevolence was rarely amenable to a single form or reason. Whilst charity remained central to the hospitals, *raison d'être* philanthropy's contribution was modified at a financial and administrative level as hospitals shifted from being philanthropic to medical institutions. Why this process occurred and the impact of professionalisation and scientific medicine are assessed.

BOOK JACKET *The Lived Body* Gillian A. Bendelow, Simon J. Williams, 2002-09-11 *The Lived Body* takes a fresh look at the notion of human embodiment and provides an ideal textbook for undergraduates on the growing number of courses on the sociology of the body. The authors propose a new approach, an Embodied Sociology, one which makes embodiment central rather than peripheral. They critically examine the dualist legacies of the past, assessing the ideas of a range of key thinkers from Marx to Freud, Foucault to Giddens, Deleuze to Guattari, and Irigaray to Grosz in terms of the bodily themes and issues they address. They also explore new areas of research, including the fate of embodiment in late modernity, sex, gender, medical technology, and the body, the sociology of emotions, pain, sleep, and artistic representations of the body. *The Lived Body* will provide students and researchers in medical sociology, health sciences, cultural studies, and philosophy with clear, accessible coverage of the major theories and debates in the sociology of the body and a challenging new way of thinking.

Bodies in Revolt Ruth O'Brien, 2013-08-21 *Bodies in Revolt* argues that the Americans with Disabilities Act (ADA) could humanize capitalism by turning employers into care givers, creating an ethic of care in the workplace. Unlike other feminists, Ruth O'Brien bases her ethics not on benevolence but rather on self-preservation. She relies on Deleuze's and Guattari's interpretation of Spinoza and Foucault's conception of corporeal resistance to show how a workplace ethic that is neither communitarian nor

individualistic can be based upon the rallying cry one for all and all for one **Bodies at Risk** Elizabeth E.

Wheatley,2016-12-05 In *Bodies at Risk* Elizabeth Wheatley provides a fascinating ethnography of heart disease She looks at what happens to someone after a heart attack and how they get on with business as usual in the wake of a potentially fatal medical crisis How are daily routines personal identities families friends and careers affected and rearranged after diagnosis and treatment This book examines the unfinished business of having and handling heart disease The research is based on one on one and collective interviews focus groups and participant observation in hospitals cardiac rehabilitation clinics and in people s homes As heart disease is one of the major causes of death in the western world this book is both timely and important It is inspired by and contributes to sociological writing on the body risk experiences of illness and medicalization and will appeal to academics and students in these areas as well as in cultural studies health related consumption health promotion and qualitative health research **Embodied History** Simon P. Newman,2013-03-01 Offering a new view into

the lives and experiences of plebeian men and women and a provocative exploration of the history of the body itself *Embodied History* approaches the bodies of the poor in early national Philadelphia as texts to be read and interpreted Through a close examination of accounts of the bodies that appeared in runaway advertisements and in seafaring almshouse prison hospital and burial records Simon P Newman uses physical details to paint an entirely different portrait of the material circumstances of the poor examining the ways they became categorized in the emerging social hierarchy and how they sought to resist such categorization The Philadelphians examined in *Embodied History* were members of the lower sort a social category that emerged in the early modern period from the belief in a society composed of natural orders and ranks The population of the urban poor grew rapidly after the American Revolution and middling and elite citizens were frightened by these poor bodies from the tattooed professional sailor to the African American runaway with a highly personalized hairstyle and distinctive mannerisms and gestures to the vigorous and lively Irish prostitute who refused to be cowed by the condemnation of others to the hardworking laboring family whose weakened and diseased children played and sang in the alleys In a new republic premised on liberty and equality the rapidly increasing ranks of unruly bodies threatened to overwhelm traditional notions of deference hierarchy and order Affluent Philadelphians responded by employing runaway advertisements the almshouse the prison and to a lesser degree the hospital to incarcerate control and correct poor bodies and transform them into well dressed hardworking deferential members of society *Embodied History* is a compelling and accessible exploration of how poverty was etched and how power and discipline were enacted upon the bodies of the poor as well as how the poor attempted to transcend such discipline through assertions of bodily agency and liberty **The**

Mapping the Present Stuart Elden, 2002-01-01
In a late interview, Foucault suggested that Heidegger was for him the essential philosopher. Taking this claim seriously, *Mapping the Present* assesses the relationship between these two thinkers, particularly on the issue of space and history. It suggests that space and history need to be rethought and combined as a spatial history rather than as a history of space. In other words, space should become not merely an object of analysis but a tool of analysis. The first half of the book concentrates on Heidegger, from the early occlusion of space through the politically charged readings of Nietzsche and Holderlin to the later work on art, technology, and the polis, which accord equal status to issues of spatiality. Foucault's work is then rethought in the light of the

analysis of Heidegger and the project of a spatial history established through re readings of his works on madness and discipline *Ethics of the Body* Margrit Shildrick, Roxanne Mykitiuk, 2005 Essays approach bioethics from postmodernist feminist theoretical perspectives opening it to critiques that question the traditional normative framework
