Alternative Temporalities Teresa Valentini, Angela Weiser, John Zilcosky, 2024-11-30

Alternative temporalities have often emerged as a reaction to the normativizing force of time demonstrating that time can be used as an instrument of power and oppression but also as a means to resist this very oppression Alternative Temporalities draws on analyses of modern literature to examine this often neglected role of time By exploring forms of temporal resistance in artistic representation such as short stories and novels that challenge the imposition of colonial gender or capitalist temporal orders the book reveals how storytelling can be an essential tool in questioning and pushing back against coercive temporal structures The book analyses literary representations of time that challenge dominant temporalities and intersect different disciplines such as gender and sexuality studies trauma and Indigenous studies race and identity and religion It features narrative analyses proposing alternative embodied experiences of time focusing on topics including the temporality of the AIDS affected body the experience of time in prison and slowness in opposition to modern acceleration Ultimately Alternative Temporalities aims to create new theories as well as practices that may foster more diverse and inclusive ways of perceiving and embodying time

Producing Women Michele White, 2015-03-02

Producing Women examines the ways femininity is produced through new media. Michele White considers how women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy and deploy technological processes to reshape their identities and digital characteristics. She studies the means through which women market traditional female roles, are viewed and produce and restructure their gendered, raced, eroticized and sexual identities. Incorporating a range of examples across numerous forms of media including trash, the dress, wedding photography, Internet, how-to instructions about zombie walk brides, nail polish, blogging, DIY crafting and reborn doll production, *Producing Women* elucidates women's production cultures online and the ways that individuals can critically study and engage with these practices.

Cruel Children in Popular Texts and Cultures Monica Flegel, Christopher Parkes, 2018-04-19

This book explores how alarmist social discourses about cruel young people fail to recognize the complexity of cruelty and the role it plays in child agency. Examining representations of cruel young people in popular texts and popular culture, the collected essays demonstrate how gender, race and class influence who gets labeled cruel and which actions are viewed as negative, aggressive and disruptive. It shows how representations of cruel young people negotiate the violence that shadows polite society and how narratives of cruelty and aggression are used to affirm or to deny young people's agency.

Causal Physics Chandrasekhar Roychoudhuri, 2018-09-03 Causal Physics Photons by Non Interactions of Waves redefines the mathematical Superposition Principle as an operational Superposition Effect which is the measurable physical transformation experienced by a detector due to stimulations induced by multiple waves simultaneously acting on the detecting dipoles This light matter interaction process driven model emerges naturally by incorporating the observed properties Non Interaction of Waves NIW and quantized photo detectors needing to fill up their quantum cups with the required quantity of energy from all the stimulating waves around it By not incorporating this NIW property explicitly quantum mechanics failed to extract various embedded realities in the theory while incorporated unnecessary hypotheses like wave particle duality The book utilizes this NIW property to explain all the major optical phenomena diffraction spectrometry coherence without using any self contradictory hypotheses that are prevalent now The book redefines the old ether constituting the space as a stationary Complex Tension Field CTF holding all the energy of the universe no need for Dark Energy or Dark Matter CTF sustains perpetually propagating EM waves as its linear excitations and the particles as self looped localized resonant non linear excitations Tensions are identified by Maxwell then the velocities of emitting and detecting atoms through the CTF contribute to the Doppler shifts separately This calls for re-visiting physical processes behind Hubble Redshift and hence Expanding Universe The success of the book derives from a novel thinking strategy of visualizing the invisible interaction processes named as Interaction Process Mapping Epistemology IPM E This is over and above the prevailing strategy of Measurable Data Modeling Epistemology MDM E The approach inspires the next generation of physicists to recognizing that the foundation of the edifice of physics has not yet been finalized IPM E will stimulate more of us to become technology innovators by learning to emulate the ontologically real physical processes in nature and become more evolution congruent Critical thinkers without expertise in optical science and engineering will appreciate the value of the content by reading the book backward starting from Ch 12 which explains the critical thinking methodology besides giving a very brief summary of the contents in the previous chapters Establishes that abandoning the wave particle duality

actually allows us to extract more realities out of quantum mechanics Illustrates how the discovery of the NIW property profoundly impacts several branches of fundamental physics including Doppler effect and hence the cosmological red shift Summarizes that many ad hoc hypotheses from physics can be removed a la Occam's razor while improving the reality and comprehension of some of the current working theories Demonstrates that our persistent attempts to restore causality in physical theories will be guided by our capability to visualize the invisible light matter interaction processes that are behind the emergence of all measurable data Draws close attention to the invisible but ontological interaction processes behind various optical phenomena so we can emulate them more efficiently and knowledgeably in spite of limitations of our theories Designed as a reference book for general physics and philosophy this optical science and engineering book is an ideal resource for optical engineers physicists and those working with modern optical equipment and high precision instrumentation

The Burglar in the Bin Bag Arthur Goldstuck, 2012-10-01 Arthur Goldstuck South Africa's urban legends guru returns with a definitive guide to the hoaxes and rumours that have terrified and confused South Africans over the last twenty years Why did an estimated 10 000 South Africans go on holiday to Zimbabwe in April 1994 Who exactly decided that needles covered in AIDS infected blood were being left on cinema seats in Cape Town in 1999 How did it come to be reported in several reputable newspapers that the South African government was considering cancelling Christmas in August 2004 Whatever happened to the tornado that was supposed to descend on Johannesburg and Pretoria to devastating effect on 8 October 2007 Did the 100 000 women and children set to be trafficked into South Africa for the 2010 World Cup actually arrive Have you ever cleared your driveway of colour coded rubbish held back from flashing your lights at someone for fear of becoming a victim of a gang initiation rite or forwarded an email about child abduction to your friends and family If so have you ever wondered about the origins of these warnings In this new book Arthur Goldstuck not only traces the evolution of these urban legends but also digs deep into the human psyche to explain why it is that we are drawn into believing and passing on these warnings even when incontrovertible proof exists that they are false **Einstein's**

Unfinished Revolution Lee Smolin, 2019-04-09 A daring new vision of quantum theory from one of the leading minds of contemporary physics Quantum physics is the golden child of modern science It is the basis of our understanding of atoms radiation and so much else from elementary particles and basic forces to the behavior of materials But for a century it has also been the problem child of science it has been plagued by intense disagreements between its inventors strange paradoxes and implications that seem like the stuff of fantasy Whether it's Schrödinger's cat a creature that is simultaneously dead and alive or a belief that the world does not exist independently of our observations of it quantum theory challenges our fundamental assumptions about reality In Einstein's Unfinished Revolution theoretical physicist Lee Smolin provocatively argues that the problems which have bedeviled quantum physics since its inception are unsolved and unsolvable for the simple reason that the theory is incomplete There is more to quantum physics waiting to be discovered Our task if we are to

have simple answers to our simple questions about the universe we live in must be to go beyond quantum mechanics to a description of the world on an atomic scale that makes sense In this vibrant and accessible book Smolin takes us on a journey through the basics of quantum physics introducing the stories of the experiments and figures that have transformed our understanding of the universe before wrestling with the puzzles and conundrums that the quantum world presents Along the way he illuminates the existing theories that might solve these problems guiding us towards a vision of the quantum that embraces common sense realism If we are to have any hope of completing the revolution that Einstein began nearly a century ago we must go beyond quantum mechanics to find a theory that will give us a complete description of nature In Einstein's Unfinished Revolution Lee Smolin brings us a step closer to resolving one of the greatest scientific controversies of our age
