Bagozzi,2015-08-05 Excerpt from Recall Recognition and the Measurement of Memory for Print Advertisements The recall and recognition of people for 95 print ads were examined with an aim toward investigating memory structure and decay processes It was found that recall and recognition do not by themselves measure a single underlying memory state Rather memory is multidimensional and recall and recognition capture only a portion of memory while at the same time reflecting other mental states When interest in the ads was held constant however recall and recognition did measure memory as a unidimensional construct Further an examination of memory over three points in time showed considerable stability The findings are interpreted from the perspective of recent research in cognitive psychology as well as current thinking in consumer behavior and advertising research About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Recall, Recognition, and the Measurement of Memory for Print Advertisements** Richard P.
