Stevens, 2013-11-11 The idea for compiling a book on coccidioidomycosis first began to take shape in my mind in 1976 at an annual meeting of the Coccidioidomycosis Study Group see Chapter 23 in Palo Alto In my discussions with the chairman Demosthenes Pappagianis we agreed that considerable data had accumulated in the almost 20 years since the publication of Marshall Fiese's landmark book Coccidioidomycosis Charles C Thomas Springfield Ill 1958 Pappagianis encouraged me to consider writing a new book Also about this time my Stanford colleague Tom Merigan was collaborating in assembling a series of texts on infectious diseases and he added his encouragement to that of Pappagianis I planned to enlist the collaboration of my

colleagues for the multiauthored work I had conceived to encompass the various facets of coccidioidomycosis. The more I worked the more I appreciated the effort that had gone into the Fiese book. I hope the final product is a useful, readable and comprehensive text and reference source for this disease and a worthy successor to the Fiese book. This volume places greater emphasis on the basic science background of present clinical experience and attempts to examine critically the data base and how it fits with recommendations made in the clinical literature. In some of the contributed chapters I made virtually no changes; in others I battered them to fit my preconceptions.

TOP 200 TALLARIDA, 2013-11-11 **Topics in**

Topicals R. Marks, 2012-12-06 Substances that are applied to the skin to heal it make it feel better or improve its appearance have much in common. They can all do damage to the skin as well as perform the task for which they were designed. They and the substances they contain are all absorbed through the skin to a greater or lesser extent. In addition, all these agents are constructed in the same general way. For these reasons, it seems odd and uneconomical to consider topical pharmaceuticals, toiletry products and cosmetics separately. This was the reasoning behind the holding of a small symposium of workers involved with one or another aspect of the formulation of substances destined for application to the skin. Several aspects of the subject are covered in this book, which is based on the symposium and the contents should be of interest to all who are concerned with the prescription, assessment or formulation of topical agents.

9. 1. Acne Caused and Treated by Topical Agents
W. J. CUNLIFFE

The four main aetiological factors involved in the development of acne are: 1. an elevated sebum excretion rate; 2. ductal hyperkeratinization; 3. an abnormality of microbial function; 4. host inflammatory response. Although opinions differ on both sides of the Atlantic, most authorities in the United Kingdom believe that increased sebum excretion rate is the main drive to acne, there being a definitive relationship between the severity of the acne and the seborrhoea of this disease.

Rook's Textbook of Dermatology Tony Burns, Stephen M. Breathnach, Neil Cox, Christopher Griffiths, 2008-04-15

The late Arthur Rook established the Textbook of Dermatology as the most comprehensive work of reference available to the dermatologist and it enjoys instant name recognition. Each subsequent edition has been expanded as the subject has developed and the book remains the ultimate source of clinical information for the trainee and practising dermatologist alike. Rook's Textbook of Dermatology covers all aspects of skin disease from basic science through pathology and epidemiology to clinical practice. Long recognized for its unparalleled coverage of diagnosis, this clinical classic earned its reputation as a definitive source of information. New features of this Seventh Edition include: Two new Editors, Neil Cox and Christopher Griffiths, join the team. Every chapter is updated and several are completely rewritten from scratch. Completely new chapter on AIDS and the Skin. Traditional emphasis on diagnosis preserved. More coverage of treatment in each of the disease specific chapters.
