Recent Social Trends In Italy 1960 1995:

Recent Social Trends in Italy, 1960-1995 Alberto Martinelli, Antonio M. Chiesi, Sonia Stefanizzi, 1999 Italy remains an enigma for many observers *Recent Social Trends in Italy 1960 1995* the sixth volume from the international Comparative Charting of Social Change program provides a new and convincing schema for its comprehension It shows that three essential institutions have structured and unified Italian society the family the church and political parties While the state remains a weak institution it is important as a regulator of the economy and of society through the welfare state The book which contains a long introduction by Alberto Martinelli on the uneven modernization of Italy shows the usefulness of analysing social change through study of a series of macro social trends These trends range from life style structures to fertility leisure consumption inequality religion and family among others This sixth national profile provides more arguments in favour of a hypothesis of diversification rather than convergence of modern societies As Henri Mendras writes in the preface of the book The more we change the more we remain ourselves that is the conclusion of our comparative research and the Italian study provides further ample proof of it

Recent Social Trends in Canada, 1960-2000 Lance W. Roberts, 2005 Canadian society has changed dramatically since 1960 This work captures the scope and range of these changes through a systematic documentation of seventy eight social trends The introduction summarizes and locates the major waves of change The authors then document each trend in relation to eighteen thematic groups that include age community women labour management stratification social relations the state mobilizing institutions social forces ideologies households lifestyle leisure education integration and attitudes and values In contrast to many recent works and journalistic reports *Recent Social Trends in Canada* concentrates on the trajectory of change rather than on current events It provides a longitudinal context in which unfolding events can be interpreted in a broader historical and international context Comparable volumes in the McGill Queen's Comparative Charting of Social Change series describe similar tendencies in the United States Quebec France Germany Italy Greece Russia and Bulgaria making it possible to situate the Canadian experience in a global context

Recent Social Trends in France, 1960-1990 Michel Forsé, International Research Group on the Comparative Charting of Social Change in Advanced Industrial Societies, 1993 Over the three decades from 1960 to 1990 French society underwent a spectacular transformation due to the baby boom which was particularly broad based and prolonged in France and caused the population to climb by a full one third At the same time the French economy expanded and the pace of modernization picked up with the result that the wealth of the French quadrupled in a single generation The turning point between the reconstruction and development period and the period of profound social change appears to have been 1965 The baby boom was over by then and the production system was shifting in orientation No longer dominated by the growth of basic industries production was now starting to focus on consumer goods and services

Recent Social Trends in Greece, 1960-2000 Dimitris Charalambis, Laura Maratou-Alipranti, Andromachi Hadjiyanni, 2004-02-25 The

newest volume in the Comparative Charting of Social Change series highlights the main elements of demographic social political and economic development in Greece during the period 1960-2000. Based on a systematic analysis of available information and data, this volume provides an overview of Greece's socio-economic profile which changed significantly during the studied period. The collapse of the dictatorship in 1974 and Greece's entry into the European Union (EU) in 1980 have led to a consolidation of democratic institutions and the improvement of living standards. During the 1960s and 1970s, the country experienced high rates of economic development and relatively low unemployment rates. However, this increase in economic development has slowed since the early 1980s, and the unemployment rate has risen, particularly among young people. Consistent with recent social trends in other Western societies, Greek society has become more tolerant and permissive with more diverse and flexible moral norms. However, the prevailing family model remains traditional, and the Greek Orthodox Church continues to have a strong influence on many aspects of Greek society, including social, political, and cultural life. The organization of work also follows traditional patterns, despite the introduction of new and flexible forms of employment. Female participation in the labour market remains relatively low, despite legislation and regulations that promote equality of opportunities between the sexes. Consistent with recent social trends in other Western societies, Greece's population is aging, and the birth rate has stabilized at a relatively low level.

Leviathan Transformed Theodore Caplow, 2002-01-16

The authors, using these goals as a checklist, found that each of the seven states performs well in some areas and badly in others. They discovered that all states approached these goals in a style shaped by their own history and in particular by how they have been affected by the troubles of the twentieth century. Their investigations offer a new, informative way of looking at these nation-states and detail the social and political conditions in each state. Contributors include Theodore Caplow, Salustiano Del Campo (Royal Academy of Political and Social Science, Madrid), Nikolai Genov (Bulgaria Academy of Sciences), Karl Otto Hondrich (Goethe University), Simon Langlois (Universit  de Laval), Alberto Martinelli (University of Milan), and Henri Mendras (OFCE, Paris).

Changing Structures of Inequality Yannick Lemel, Heinz-Herbert Noll, 2002

The international sociological community has engaged recently in a controversial discussion on social inequality. There is a vigorous debate on

whether the traditional concepts of social class and social stratification are still useful Some researchers argue that social classes still offer a key explanation to social inequalities while others challenge the long standing tradition of class analysis New approaches have been proposed to describe recent social changes in the stratification system vanishing middle class two thirds societies cosmographic inequality and classless society among others

Multicultural Variations Lance W. Roberts, Barry Ferguson, Mathias Bös, 2013-02-01 Contrary to mid twentieth century predictions ethnic pluralism has increased dramatically in North America and significantly in Europe Neither the post 9 11 emphasis on international border security nor anti immigration and anti multiculturalism movements have affected the fifty year trend of increasing labour mobility and sustained levels of migration The ethnic pluralism accompanying this powerful trend has fueled academic research and public debate Contributors report on and develop a conceptualization of ethnic social incorporation and multiculturalism in Canada the United States Germany Greece Bulgaria and Italy This group of countries displays a remarkable variety of both ethnic diversity and public policy responses to ethnic social incorporation over the past four decades It includes two countries Canada and the United States built upon very large scale immigration over the course of more than a century two countries Greece and Italy which until recently were characterized by large scale emigration but now are grappling with immigration one country Bulgaria that was until the 1990s insulated from extensive migration and faces a demographic slump and one Germany that has experimented with isolating temporary populations but is now addressing the responsibilities of permanent immigration Multicultural Variations includes national reports describing each of the six countries under investigation and is book ended by introductory and concluding chapters that present a new understanding of and synthesis on multiculturalism that is distinct from either enthusiastic support or ideological critiques Contributors include Mathias B s Philipps Universit t Marburg Germany Antonio Chiesi Universit degli Studi di Milano Italy Jason Edgerton University of Manitoba Canada Barry Ferguson University of Manitoba Canada Nikolai Genov Freie Universit t Berlin Germany Louis Hicks St Mary s College of Maryland USA Paul Kingston University of Virginia USA Laura Maratou Alipranti National Centre for Social Research Athens Greece Lance W Roberts University of Manitoba Canada Sonia Stefanizzi Universit degli Studi di Milano Bicocca Italy and Susanne von Below Johann Wolfgang Goethe Universit t Frankfurt Germany

Solidarity in Health and Social Care in Europe W. Arts,R. Muffels,2013-03-14 OF SOLIDARITY IN UK SOCIAL WELFARE Here then perhaps is a British version of solidarity in social welfare but early there are strong tensions between the powerfully liberal individualistic strands of the British understanding of the functions of the state and the socialistic or communitarian tendency of a commitment to universal welfare provision In the search for the roots of this understanding of welfare we shall survey first the historical background to these tensions in some early British political philosophers starting with Hobbes and ending with Mill We then consider the philosophical and social influences on the Beveridge Report itself and we will trace the emergence of the philosophy of the welfare state in the era following the Second World War Finally we consider the contemporary debate as it relates to the Third Way thinking of New Labour 2 A HISTORICAL SKETCH In the previous section we observed that the philosophy underlying the Beveridge Report could be described as liberal collectivism What are the historical antecedents of this strange amalgam of individualism and collectivism Within the short scope of this chapter any account of the philosophical history must be little more than a sketch but we can perhaps understand most debates in British socio political thought as a continuing dialogue with the well known claim of Thomas Hobbes in Leviathan that all political institutions are founded on egoistic motives

Popular High Culture in Italian Media, 1950-1970 Emma Barron,2018-08-20 When Mona Lisa smiled enigmatically from the cover of the Italian magazine Epoca in 1957 she gazed out at more than three million readers As Emma Barron argues her appearance on the cover is emblematic of the distinctive ways that high culture was integrated into Italy s mass culture boom in the 1950s and 1960s a period when popular appropriations of literature fine art and music became a part of the rapidly changing modern Italian identity Popular magazines ran weekly illustrated adaptations of literary classics Television brought opera from the opera house into the homes of millions Readers wrote to intellectuals and artists such as Alberto Moravia Thomas Mann and Salvatore Quasimodo by the thousands with questions about literature and self education Drawing upon new archival material on the demographics of television audiences and magazine readers this book is an engaging account of how the Italian people took possession of high culture and transformed the modern Italian identity

Globalization, Uncertainty and Late Careers in Society Hans-Peter Blossfeld, Sandra Buchholz, Dirk

Hofäcker, 2006-09-27 Globalization has been strongly shaping and transforming both national economies and individual careers in recent decades These profound changes have had significant consequences for individual careers of men and women both during and after their employment career This impressive new collection focuses on the effects of the globalization process on late midlife workers and the exit from employment a relationship that has up to now mostly been

Religion and Modernity Detlef Pollack, Gergely Rosta, 2017-12-08 This is not a book that provides a new integrated theory of religious change in modern societies but rather one that develops theoretical elements that contribute to the understanding of some contemporary religious developments Most of the approaches in sociology of religion are prone to emphasise either processes of religious decline or of religious upswing For example secularization theory usually includes a couple of relevant factors such as functional differentiation economic affluence or social equality in order to account for religious change However the result of such a theory's empirical analyses seems to be certain in advance namely that the social relevance of religion is decreasing In contrast the religious market model devised by sociologists of religion in the US is inclined to detect everywhere processes of religious upsurge Religion and Modernity An International Comparison avoids a purely theoretically based perspective on religious changes For this reason Detlef Pollack and Gergely Rosta do not begin with theoretical propositions but with questions The authors raise the question of how the social significance of religion in its various facets has changed in modern societies and explain what factors and conditions have contributed to these changes
