It is organized into three main parts. The first part deals with postures emphasizing the idea that engaging in a research process involves taking a different stance from that of a social or professional actor. For example, this may require converting a professional or social question into a research question or reflecting on the use of a social vocabulary in research. The second part concerns practices that is how research is conducted: the definition of a research question based on findings, theoretical exploration and problematization, the production of empirical information and its analysis and restitution. The third and final part concludes by focusing on the diversity of research forms: not only research cultures specific to disciplinary fields and approaches such as action research, collaborative research or research training, but also the design choices in terms of multi-inter or trans-disciplinarity. **Handbook of Research on Operational Quality Assurance in Higher Education for Life-Long Learning** Nuninger, Walter, Châtelet, Jean-Marie, 2019-12-06 Previously, key levers of higher education have seemed to be the learning organization, work-integrated learning, for life-long learning and learner-centered pedagogy. However, funding evolution and the integration of digital tools are changing professional styles and learning behaviors. Nonetheless, the sustainability of higher education requires quality agreements based on ethical, robust and replicable pedagogical approaches. The Handbook of Research on Operational Quality Assurance in Higher Education for Life-Long Learning is a comprehensive scholarly book that focuses on the evolution of the education framework and job market, as well as necessary changes needed in organizations to reply to life-long learning and competency-based training initiatives. Highlighting topics such as digital environment, e-learning and learning analytics, this book is essential for higher education faculty, managers, deans, professionals, administrators, educators, academicians, researchers and policymakers.
