Regional Conflict and National Policy Kent A. Price, 2013-11-26 First Published in 2011 This is Volume 9 of fourteen in a set of titles on Policy and Governance Resources for the Future is a non profit organization for research and education in the development conservation and use of natural resources including the quality of the environment The issues of conservation the environment and energy have enormous implications not only in terms of those issues specifically but also for regional conflict in the United States If we are to have any kind of resolution of these issues there must be a sense of equity that everyone is sacrificing equally If there is a perception of inequity then all of the ingredients are there for social unrest This volume explores this issue **Energy Abstracts for Policy Analysis** ,1985-07 **Local Politics and National Policy**

Ken Victor Leonard Hijino, 2017-04-28 This book is about why and how central and local governments clash over important national policy decisions Its empirical focus is on the local politics of Japan which has significantly shaped and been shaped by larger developments in national politics The book argues that since the 1990s changes in the national political arena fiscal and administrative decentralization as well as broader socio economic developments have led to a decoupling of once closely integrated national and local party systems in Japan Such decoupling has led to a breakdown of symbiotic relations between the centre and regions In its place are increasing strains between national and local governments leading to greater intra party conflict inter governmental conflicts and more chief executives with agendas and resources increasingly autonomous of the national ruling party Although being a book primarily focused on the Japanese case the study seeks to contribute to a broader understanding of how local partisans shape national policy making The book theorizes and investigates how the degree of state centralization vertical integration for party organizations and partisan congruence in different levels of government affect inter governmental relations Japan s experience is compared with Germany Canada and the UK to explore sources of multi level policy conflict Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Defining the National Interest Peter Trubowitz, 1998-02-17 The United States has been marked by a highly politicized and divisive history of foreign policy making Why do the nation s leaders find it so difficult to define the national interest Peter Trubowitz offers a new and compelling conception of American foreign policy and the domestic geopolitical forces that shape and animate it Foreign policy conflict he argues is grounded in America s regional diversity The uneven nature of America s integration into the world economy has made regionalism a potent force shaping fights over the national interest As Trubowitz shows politicians from different parts of the country have consistently sought to equate their region s interests with that of the nation Domestic conflict over how to define the national interest is the result Challenging dominant accounts of American foreign policy making Defining the National Interest exemplifies how interdisciplinary scholarship can yield a deeper understanding of the connections between domestic and international change in an era of globalization **Politics**

**and Ideology in Canada** Michael Ornstein, Michael Stevenson, 2003-02-18 Winner of the Harold Adams Innis Prize Politics and Ideology in Canada examines a period of crucial historical change in Canada beginning in the mid 1970s when the crisis of the Keynesian welfare state precipitated a transition to a new political order based on the progressive downsizing of state involvement in the economy and society Using class and ideology as key concepts Michael Ornstein and Michael Stevenson examine this transition in terms of the nature of hegemony and hegemonic crisis and the conditions of political order and instability These concepts guide the interpretation of three large surveys of representative samples of the Canadian public and two unique elite surveys conducted between 1975 and 1981 The surveys cover an exceptionally broad spectrum of political issues including social programs civil and economic rights economic policy foreign ownership labour relations and language issues and sovereignty A wide ranging analysis of public and elite attitudes reveals a hegemonic order through the early 1980s built around public support for the institutions of the Canadian welfare state But there was also widespread public alienation from politics Public opinion was quite strongly linked to class but not to party politics Regional variation in political ideology on a broad range of issues was less pronounced than differences between Quebec and English Canada Much deeper ideological divisions separated the elites with a dramatic polarization between corporate and labour respondents State elites fell between these two though generally more favourable to capital The responses of the business elites reveal the ideological roots of the Mulroney years in support for cuts in social programs free trade privatization and deregulation

**Handbook of Regional Conflict Resolution Initiatives in the Global South** Jeronimo

Delgado-Caicedo, 2022-07-28 During the first half of the twentieth century the international system was largely dominated by the USA and the colonial powers of western Europe After the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics However as it is the norm in the international system power structures are not immutable After the end of the Cold War rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world It is therefore unthinkable to ignore emerging countries such as Russia the People's Republic of China India Brazil or South Africa in the decision making process in today's world order In addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world Argentina Colombia Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan Saudi Arabia Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions previous analyses have focused primarily on the impact that emerging powers have had in their own regions conflict resolution initiatives This volume instead aims to go beyond these analyses and provide new insights regarding the effect that

this stabilising role has on the continental and global positioning of emerging powers In other words this book explores the relation between a country's involvement in conflict resolution initiatives and its positioning in the international system The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives

**Discussing Conflict in Ethiopia** Wolbert Smidt, Kinfu Abraham, 2007 This volume contains the papers presented at the Conference Ethiopian and German Contributions to Conflict Management and Resolution of November 2005 Addis Ababa The aim of this conference was to bring researchers and those working in the practical field of conflict resolution together before the background of renewed internal and international conflict Research in conflict resolution mechanisms is one of the most hopeful fields in modern social sciences Local conflicts can have devastating effects on the state and even involve the international level In turn international conflict can also destabilize society and create new local conflicts However local conflict resolution mechanisms could be of a great importance even within the international scene This volume examines the experiences in Ethiopia and the impact the acquired knowledge could have for future conflict resolution and management

**Migration and Refugee Policies** Ann Bernstein, Myron Weiner, 2002-02-14 Migration and refugee movements are becoming increasingly prominent features of the millennial world Persistent disparities in wealth and job opportunities and continued political conflict and repression impel growing numbers of people to seek work and safety outside their own countries However many governments and their citizens remain reluctant to open their borders to foreigners For this reason in one country after another migration and refugee questions have become politically controversial creating the need for a sound understanding of policy options and their implications This book brings together five international scholars who survey key aspects of the international experience of migration and refugee policies In Part II drawing on the lessons presented by international experience a team of South African experts address the thorny migration and refugee issues confronting that country's new democratic government
