Essays on housing supply, land use regulation and regional labourmarkets Wouter Vermeulen, 2003 **The Impacts of Automotive Plant Closure** Andrew Beer, Holli Evans, 2013-09-13 Economic restructuring has been a notable feature of so called mature industrial economies such as the UK and Australia in the last two decades with deregulation privatisation technological change and globalisation combining to reshape such economies Some industries have grown while others have declined Moreover while overall employment in the UK and Australia has grown many newly created positions require skills not found in the industries shedding labour or are in casualised and low paid occupations Many lesser skilled workers leaving declining industries are therefore at risk of long term unemployment or leaving the workforce entirely Both mental and physical health can be affected after redundancy It is therefore crucial that the measures put in place in many domains of social policy such as formal health policy employment assistance community development housing assistance and so on to adequately address the difficulties confronting this group This volume takes a closer look at the impact of manufacturing notably automotive plant closures in the UK Birmingham and Australia Adelaide in recent years and policy responses to those closures It attempts to tease out differences in policy response and effectiveness and attempts to identify areas where policy could be

made to work better in terms of adjusting to large scale manufacturing change and resulting job losses In so doing it begins for the first time we believe to take a comparative approach to understanding the impact of plant closures and policy responses This book was published as a special issue of Policy Studies **Regional Labor Market Dynamics, Housing, and Migration** Kari Hämäläinen, Petri Bockerman, 2004 This study explores the impact of plant level labor market dynamics and housing markets on gross migration flows The internal and the external reorganizations of regional labor markets are shown to be related An increase in internal turnover of jobs and workers in regional labor markets is found to increase net migration This effect arises mainly from a reduction in out migration Housing markets constitute constraints for migration In particular an increase in regional housing prices and a large share of owner occupancy housing discourages net migration to a region by reducing in migration In contrast the out migration rate remains largely unaffected by housing markets
