Regional Cohesion And Competition In The Age Of Globalization:

Regional Cohesion and Competition in the Age of Globalization Hirotada Kōno, Peter Nijkamp, Jacques Poot, 2000
This text discusses issues including the impact and implications of European expansion as well as developments in the Asia Pacific region. It also examines the driving forces, backgrounds, obstacles, and opportunities for regions to become powerful global players. The work contains much empirical material and is supported by a thorough investigation of the theory and methodology of policy strategies for the positioning of regions in the new global economy. Regional Competition Peter W.J. Batey, Peter Friedrich, 2013-03-14. Many parts of the world are currently experiencing the outcome of processes of economic integration, globalization, and transformation. Technological advances in telecommunications and in transport facilities have opened up new possibilities for contracts and exchanges among regions. External effects among regions have increased in importance. As a result, competition among regions has intensified. Except for some pioneering work by regional scientists and scholars of public finance and economics, the phenomenon of regional competition has yet to attract the attention it warrants despite its importance for policy making. The present volume is intended to remedy this neglect by providing high level contributions to the three main topics of the book: the theory of regional competition, methods of analysis of regional competition, and policies of regional competition. *International Encyclopedia of Human Geography*, 2009-07-16.
