Discovering American Regionalism David Miller, Jen Nelles, 2018-07-17 Regions are difficult to govern; coordinating policies across local jurisdictional boundaries in the absence of a formal regional government gives rise to enormous challenges. Yet some degree of coordination is almost always essential for local governments to effectively fulfill their responsibilities to their citizens. State and local governments have over time awkwardly and with much experimenting developed common approaches to regional governance. In this revolutionary new book authors David Miller and Jen Nelles offer a new way to conceptualize those common approaches: Regional Intergovernmental Organizations (RIGOs) that bring together local governments to coordinate policies across jurisdictional boundaries. RIGOs are not governments themselves but as Miller and Nelles demonstrate they do have a measure of political authority that allows them to quietly and sometimes almost invisibly work to further regional interests and mitigate cross boundary irritations. Providing a new conceptual framework for understanding how regional decision making has emerged in the U.S., this book will provoke a new and rich era of discussion about American regionalism in theory and practice. *Discovering American Regionalism* will be a future classic in the study of intergovernmental relations, regionalism and cross boundary collaboration.

Planning Canadian Regions Gerald Hodge, Ira M. Robinson, 2007-10-01 *Planning Canadian Regions* is the first book to consolidate the history, evolution, current practice and future prospects for regional planning in Canada. As planners grapple with challenges wrought by globalization, the evolution of massive new city regions and the pressures of sustainable and community development, a deeper understanding of Canada's approaches is invaluable. Hodge and Robinson identify the conceptual and historical foundations of regional planning and propose a new planning paradigm that emphasizes regional governance and greater inclusiveness and integration of physical planning with planning for economic sustainability and natural ecosystems.
