Regional Planning ... United States. National Resources Planning Board,1936 **Regional Planning** Melville C. Branch,1988-03-08 The literature on regional planning deals mainly with the economic development of depressed areas and urban planning Few works treat regional planning by businesses and fewer still explore its employment by the military Regional Planning corrects this imbalance by providing a unique introduction to the study of region types and their use for planning and operational purposes Written in clear accessible language and utilizing over 70 illustrations Dr Branch describes the many types of regions their use by various fields of study for different purposes and their utilization by civil governments businesses and the military services In addition examples of current practices in regional planning are discusses as well as future potential Regional Planning Kanan Chatterjee,2017-01-01 Region according to the eminent geographers is economically the most gainful administratively the most convenient sectoral and spatial unit where planning is a mere process economic growth is a mere outcome and general welfare is the ultimate goal Whether they were large or small these regions provided the framework for determinist research on the man environment relationship To speak of a region is to understand its past to grasp the attachment to explain its economic political and social functioning in a local and world context it is to address the prospects for its future The regional planner while visualizing the spatial processes attempt to identify the flows that reflect interdependence among the spatial units in terms of economic activities that bind them Thus it is possible to identify in the interrelated spatial sub systems one which acts as the dominant over the others the development of this type of spatial system could be explained in economic terms by factors such as transport cost economics

of scale and agglomeration while the core one emerges as the dominant highest order pole in a hierarchical structure of spatial system For cities and towns planning issues are of two general kinds First there is a need to think ahead to accommodate the city's growth deciding which lands should be built on and when and whether they should be used for residential development for industry or for some more specialized function such as a shopping centre or playing fields Besides definition concept scope objectives and content of regional planning basic principles aspects planning development strategies theories of regional growth and case studies have been emphasized in this study At present the techniques in relation to R S and G I S are widely utilized for the delineation of areal units or regions for planning purposes Various data sets of the area are often used for interpreting and unifying them within G I S and Image Processing environment and analyzing the given data for identifying and delineating the prospective area that may be industrial agricultural urban etc within the selected study area In fact this book identifies many such aspects of development in regional planning which are found to be relevant not only in the present day context but also for the days ahead *Regional Planning ...*, 1936 **Basic thinking in regional planning** F.
