Post-Hegemonic Regionalism in the Americas Jose Briceno-Ruiz, Isidro Morales, 2017-01-20 Regionalism in Latin America and the Caribbean has experienced transformations over the last few years After more than a decade of a hegemonic model based solely on free market principles the regional and global transformation that occurred in the first decade of the new millennium modified the way of understanding economic development and the insertion of regional blocs in global affairs Old initiatives have been reconsidered new schemes have emerged and new principles going beyond trade issues have modified the norms and processes of regional economic integration This book reviews these recent transformations to depict and explain the new trends shaping regional blocs and cooperation in the Americas

The European Union and Europe's New Regionalism Boyka M. Stefanova, 2017-10-24 This book presents a new approach to studying the European Union's regional and global relevance It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project its enlargement neighborhood and mega regional policies The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward looking process of region building to an open selective system of global interactions

Exploring the New South American Regionalism (NSAR) Ernesto Vivares, 2016-04-15 The events and processes that have taken place in the last decade in South America have given way to one of the most interesting regional phenomena under a global crisis and within a changing world order From the traditional status of Washington's backyard and reign of economic and political stability South America has increasingly turned into a region marked by a heterodox development in the light of other dominant regional tendencies of development the European Union NAFTA and the Asia Pacific The political economic nature of the new South American regionalism NSAR is far from echoing the dominant interpretations about it which reflects the major regional projects today Given the reach and scope of the existing literature on the topic of the NSAR there is an important gap concerning its academic exploration in relation to its nature of development political economic complexity challenges and orientations In this sense this book explores from a wider and pluralist political economic perspective the developmental dimensions of the NSAR within a changing hemispheric and world order in transformation It analyses a set of specific debates regionalism in the Americas then and now social and economic development and regional integration and organized crime intelligence and defence An in depth and critical reflection on the complex and heterogeneous path of regionalization taking place in South America from different perspectives and in key issues of regional development

Regionalism in Hard Times Mario Telò,2016-09-01 Brexit confirms that the EU is not a super state in the making but rather an advanced regional organization This book bridges the gap between EU studies and international relations by providing a student friendly presentation of regional multidimensional cooperation among neighbouring states and societies its four epochs and relevant variations and similarities across five continents its interplay with globalization and the changing post hegemonic and post Cold War international order This text secondly focuses on the question of regionalism in hard times whether the global financial crisis and multipolar power politics are leading to more competitive and political forms of instrumental regionalism and interregionalism in Europe East Asia and the Americas It does this by addressing the political and strategic dimensions of changing regional interregional arrangements and their current and potential impact on global governance notably on trade and security challenges

Cooperation and Hegemony in US-Latin American Relations Andrew R. Tillman,2016-03-29 This edited volume revisits the idea of the Western Hemisphere First articulated by Arthur P Whitaker in 1954 but with origins in the

earlier work of Herbert E Bolton it is the idea that the peoples of this Hemisphere stand in a special relationship to one another which sets them apart from the rest of the world Whitaker 1954 For most scholars of US Latin American relations this is a curious concept They often conceptualize US Latin American relations through the prism of realism and interventionism While this volume does not deny that the United States has often acted as an imperial power in Latin America it is unique in that it challenges scholars to re think their preconceived notions of inter American relations and explores the possibility of a common international society for the Americas especially in the realm of international relations Unlike most volumes on US Latin American relations the book develops its argument in an interdisciplinary manner bringing together different approaches from disciplines including international relations global and diplomatic history human rights studies and cultural and intellectual history

Region-Building in Africa Daniel H. Levine, Dawn Nagar, 2016-05-19 This landmark book is the first of its kind to assess the challenges of African region building and regional integration across all five African sub regions and more than five decades of experience considering both political and economic aspects Leading scholars and practitioners come together to analyze a range of entwined topics including the theoretical underpinnings that have informed Africa's regional integration trajectory the political economy of integration including the sources of different waves of integration in pan Africanism and the reaction to neo liberal economic pressures the complexities of integration in a context of weak states and the informal regionalization that often occurs in borderlands the increasing salience of Africa's relationships with rising extra regional economic powers including China and India and comparative lessons from non African regional blocs including the EU ASEAN and the Southern Common Market A core argument of this book running through all chapters is that region building must be recognized as a political project as much as if not more than an economic one successful region building in Africa will need to include the complex political tasks of strengthening state capacity including states capacity as developmental states that can actively engage in economic planning resolving long standing conflicts over resources and political dominance improving democratic governance and developing trans national political structures that are legitimate and inclusive

Redefining Regional Power in International Relations Miriam Prys, 2012-05-04 This book examines the concept of regional power in international relations Using the emerging powers of India and South Africa as the case studies it explores how regional powers simultaneously differ and share common features The book develops a method to classify and evaluate different types of regional powers and applies this typology to contemporary case studies of India and South Africa Regional power is often expected to have a positive influence on region specific problems of conflict economic deprivation and political instability In reality an achievement expectations gap can be seen in many regional powers which can be analysed and understood through observable variation in regional power The author discovers that in addition to the management of the internal regional order regional powers have to establish individuality whilst fitting into the global international environment altering both regional dynamics and creating variance in the level of control within the region Elucidating concepts and definitions this book is an accessible and in depth study that both introduces key concepts and provides a framework for the future study of regional power in international relations Redefining Regional Power in International Relations will be of interest to students and scholars of regionalism and international relations The Rise of Post-Hegemonic Regionalism Pía Riggirozzi, Diana Tussie, 2012-01-06 This book offers a timely analysis and a novel and nuanced argument about post neoliberal models of regional governance in non European contexts It provides the first in depth empirically driven analysis of current models of regional governance in Latin America that emerged out of the crisis of liberalism in the region It contributes to comparative studies of the contemporary global political economy as it advances current literature on the topic by analysing distinctive overlapping and conflicting trajectories of regionalism in Latin America The book critically explores models of transformative regionalism and specific dimensions articulating those models beyond neoliberal consensus building As such it contests the overstated case of integration as converging towards global capitalism It provides an analytical framework that not only examines the what how who and why in the emergence of a specific form of regionalism but sets the ground for addressing two relevant questions that will push the study of regionalism further What factors enable or constrain how transformative a given regionalism is or can be with respect to the powers and policies of states encompassed by it and What factors govern how resilient a given regionalism is likely to be under changing political and economic conditions **Transnational Activism and National Movements in Latin America** Eduardo Silva, 2013-08-21

During the 1990s as widespread perception spread of declining state sovereignty activists and social movement organizations began to form transnational networks and coalitions to pressure both intergovernmental organizations and national governments on a variety of issues Research has focused on the formation of these transnational networks campaigns and coalitions their objectives strategies and tactics and their impact Yet the issue of how participation in transnational networks influences national level mobilization has been little analyzed What effects has the experience of social movement organizations at the transnational scale had for the development at the national scale This volume addresses this significant gap in the literature on transnational collective action by building on approaches that stress the multi level characteristics of transnational relations Edited by noted Latin American politics scholar Eduardo Silva the contributions focus on four distinct themes to which the empirical chapters contribute Building a Transnational Relations Approach to Multi Level Interaction Transnational Relations and Left Governments North South and South South Linkages and The Normalization of Labor Bridging the Divide will add considerably to empirical knowledge of the ways in which transnational and national factors dynamically interact in Latin America Additionally the mid range theorizing of the empirical chapters along with the mix of positive and negative cases raises new hypotheses and questions for further study *Latin American Foreign Policies in the New World Order* Carlos Fortin, Jorge Heine, Carlos Ominami, 2023-02-07 Latin America with 8 percent of the world s population and 30 percent of the world s deaths from COVID 19 is Ground Zero of the pandemic The region has also had the world s worst economic performance in this period Moreover it is presently caught in the Second Cold War that is emerging between the United States and China In this context the active non alignment option constitutes an imaginative and creative way out of the current crisis *The Oxford Handbook of Comparative Regionalism* Tanja A. Civil Society Regionalization in Southern Africa Andréas Godsäter,2016-05-12 This book investigates civil society regionalization in Southern Africa The point of departure is the study of new regionalism which refers to the wave of regional integration globally since the 1980s However whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes important gaps remain in particular the relatively scant emphasis given to civil society This particularly relates to regions in the global South including Southern Africa The overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in Southern Africa both empirically and from a theoretical perspective through analysing the cases of trade and HIV AIDS The study finds that CSOs can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization through framing issues and to a less extent making identities regional Furthermore the book enhances knowledge of the heterogeneous nature of civil society regionalization Lastly it is demonstrated that going regional is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in Southern Africa

Power Relations and Comparative Regionalism Min-hyung Kim,James A. Caporaso,2021-07-29 Three trends have dominated the political economy of integration during the last two decades globalization economic nationalism and regionalization This book explores comparative regional integration focusing on both intra regional integration and relations among regions in the context of power The most common focus of integration studies has been on the logic of cooperation but there is another logic of integration power The relevance of power today is represented by the relations within the Eurozone especially between creditors and debtors By the same line of reasoning

integration in Asia cannot ignore the respective roles of China Japan and Korea nor the unresolved disputes about Taiwan Hong Kong and the islands in the South China Sea This edited volume addresses the role of power in regional integration in three contexts 1 the role of hegemonic external actors the US and China in regional integration 2 the role of core states within regions Germany China Japan and Brazil and 3 the role of noncore states smaller and middle range powers Italy and Greece in Europe South Korea and Malaysia in Asia and Argentina Colombia Uruguay and Paraguay in Latin America This book will benefit students and scholars of international relations and comparative political economy especially those with an interest in integration studies and comparative regionalism
