Hoekman, 2004 Abstract Hoekman and Javorcik focus on policies facilitating firm adjustment to globalization They briefly review the effects of trade and investment liberalization on firms focusing on within industry effects They postulate that governments role in supporting the process is to 1 ensure that firms face right incentives to adjust and 2 intervene in areas where market failures are present Their main message is that while many policies could be adopted to address market failures they need to be carefully designed and implemented in a stable macroeconomic environment An institutional infrastructure that supports the functioning of modern markets is most important Proactive support policies of whatever stripe should be subject to cost benefit analysis based on the existence of an identified market failure and monitored for performance and cost effectiveness Transparency and accountability are critical in ensuring that interventions accomplish their intended objectives rather than being vehicles for rent seeking This paper a product of the Trade Team Development Research Group is part of a larger effort in the group to examine the effects of globalization on developing countries World Bank web site Services Trade and Growth Aaditya Mattoo, Liberalizing Trade in Services Bernard M. Hoekman, 2006 Abstract Since the mid 1980s a substantial amount of research has been undertaken on trade in services Much of this is inspired by the World Trade Organization or regional trade agreements especially the European Union but an increasing number of papers focus on the impacts of services sector liberalization This paper surveys the literature focusing on contributions that investigate the determinants of international trade and investment in services the potential gains from greater trade and liberalization and efforts to cooperate to achieve such liberalization through trade agreements It concludes that there is increasing evidence that services liberalization is an important source of potential welfare gains but relatively little research has been done that can inform the design of international cooperation both trade agreements and development assistance so as to more effectively promote development objectives **Research Handbook in International Economic Law** Andrew T.
