Regulating International Business Beyond Liberalization:

Regulating International Business Sol Picciotto, Ruth Mayne, 2016-07-27 This timely book points the way towards a new positive regulatory framework for international investment following the failure of the Multilateral Agreement on Investment MAI. It examines the flaws in free market strategies underpinning the recent phase of globalization in particular drawing out the lessons from the MAI which was suspended in October 1998. The authors explore an alternative based on a positive regulatory framework for international business aimed at maximizing the positive contribution to development of foreign investment and minimizing its negative social and environmental impacts. The contributors include academics, researchers, for non governmental organizations and business and trade union representatives writing from a combination of economic, legal and political perspectives. The book combines academic analysis with grass roots and practical experience and suggests concrete policy proposals.

Regulating Multinationals in Developing Countries Edwin Mujih, 2016-04-08 Edwin Mujih explores the difficulties associated with regulating multinational companies operating in developing countries with a particular focus on extractive industries. The author highlights the need to establish an international legally binding framework to ensure that multinationals operate in a socially responsible manner to protect local communities and the environment. Edwin Mujih's analysis reveals that the existing mechanisms for controlling the behaviour of huge multinational entities are of normative force only; that these are particularly inadequate and that the notion of corporate social responsibility is only meaningful where behaviour can be legally regulated. *Regulating Multinationals in Developing Countries* features a study of the Chad and Cameroon Oil and pipeline project which highlights the problems arising in countries that have neither the capacity nor the will to effectively regulate those operating within their borders. The author has evaluated compliance by the parties with their social and environmental obligations. He has found that despite controversy surrounding inadequate regulation of this project in its incipient stages, the system that was put in place following huge opposition from the affected communities and from NGOs is worthy of attention and could stand as a model for similar projects elsewhere. This first title in Gower's Corporate Social Responsibility Series to approach CSR from a legal perspective provides insight not just into the complexity surrounding efforts to regulate multinationals operating in countries with weak regulatory regimes but also into the fundamental nature of multinational corporations and the debate about different notions of CSR itself.

The Multinational Firm Glenn Morgan, Peer Hull Kristensen, Richard Whitley, 2003 In contrast to the traditional view of multinational firms as cohesive rational actors maximizing the use of resources across national boundaries, the contributors to this volume argue that they are complex social arenas where competing groups draw on resources from their own socially embedded locations in developing new transnational social relationships. As firms seek to manage across national and institutional boundaries, they stretch their existing capacities and routines and develop new sets of transnational social relationships through different groups competing and cooperating. These processes occur at a number of levels which

are explored in different empirical settings Firstly at the level of governance multinational firms may develop conflicts between investors from different national contexts e g between the arms length orientation of Anglo Saxon institutional investors and the more committed orientation of investors in certain European and Asian contexts The tension between opening the firm up for foreign investors in order to have access to more and cheaper capital and the consequent effects on management strategy is explored in a number of chapters Secondly at the level of coordinating activities across different sites multinationals may encourage competition between plants in different countries as well as seeking to transfer best practices The result may be pressure on managers and employees in certain plants to give up traditional practices and employment rights Thirdly multinational firms operate in environments where other forms of coordinating international business activity may also occur e g cartels or the creation of international regulatory activity They therefore compete for the regulatory space in complex political environments that will enable them to prosper

Regulating Global Corporate Capitalism Sol Picciotto, 2011-05-12 This analysis of how multi level networked governance has superseded the liberal system of interdependent states focuses on the role of law in mediating power and shows how lawyers have shaped the main features of capitalism especially the transnational corporation It covers the main institutions regulating the world economy including the World Bank the IMF the WTO and a myriad of other bodies and introduces the reader to key regulatory arenas corporate governance competition policy investment protection anti corruption rules corporate codes and corporate liability international taxation avoidance and evasion and the campaign to combat them the offshore finance system international financial regulation and its contribution to the financial crisis trade rules and their interaction with standards especially for food safety and environmental protection the regulation of key services telecommunications and finance intellectual property and the tensions between exclusive private rights and emergent forms of common and collective property in knowledge

Global Business Regulation John Braithwaite, Peter Drahos, 2000-02 This book confronts the question of how the regulation of business has shifted from national to global institutions Based on interviews with 500 international leaders in business and government this book examines the role played by global institutions such as the WTO IMF and the World Bank as well as various NGOs and significant individuals The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision making bodies that would otherwise be dominated by concentrated economic interests

This book explores the persistence of the governance gap with respect to the human rights impacting conduct of transnational extractive corporations operating in zones of weak governance The authors launch their account with a fascinating case study of Talisman Energy s experience in Sudan informed by their own experience as members of the 1999 Canadian Assessment Mission to Sudan Harker Mission Drawing on new governance reflexive law and responsive law theories the authors assess legal and other non binding governance mechanisms that have emerged since that time including the UN Guiding Principles on Business and Human Rights They conclude that such mechanisms are incapable of systematically preventing human rights violating behaviour by transnational corporations or of assuring accountability of these actors or recompense for victims of such violations The authors contend that home state regulation while not a silver bullet has a crucial role to play in regulating such conduct They pick up where UN Special Representative John Ruggie s Guiding Principles on Business and Human Rights left off and propose an innovative robust and adaptable template for strengthening the regulatory framework of home states Their model draws insights from the theoretical literature leverages existing public private transnational national soft and hard regulatory tools and harnesses the specific strengths of state based governance This book will be of interest to academics policy makers students civil society and business leaders

Non-State Actors and International Law Andrea

Bianchi,2017-03-02 The expression non state actors has become part and parcel of the common parlance of international lawyers Together with the traditional subjects of international law such as states and international organizations non state actors play an important role in international law making law adjudication and law enforcement processes Although the subjects actors discourse takes place in a variety of contexts most of the time the relevant narrative merely describes how different actors participate in the legal process in any given area Little attention has been drawn to the theoretical discourse about non state actors and its relation to the doctrine of the subjects of international law Whether the solution lies in relativizing the subjects or rather in subjectivizing the actors remains open to doubt The constant swing of the pendulum from the normative to the descriptive mesmerizes the observer but hardly hides the struggle for determining who may legitimately and authoritatively perform legally relevant acts on the international scene **The New Legal Realism:**
