*Regulating International Business Through Codes of Conduct* Raymond J. Waldmann, 1980

**Regulating International Business** Sol Picciotto, Ruth Mayne, 2016-07-27 This timely book points the way towards a new positive regulatory framework for international investment following the failure of the Multilateral Agreement on Investment MAI. It examines the flaws in free market strategies underpinning the recent phase of globalization in particular drawing out the lessons from the MAI which was suspended in October 1998. The authors explore an alternative based on a positive regulatory framework for international business aimed at maximizing the positive contribution to development of foreign investment and minimizing its negative social and environmental impacts. The contributors include academics, researchers for non-governmental organizations and business and trade union representatives writing from a combination of economic, legal and political perspectives. The book combines academic analysis with grass roots and practical experience and suggests concrete policy proposals.

**International Economic Organizations in the International Legal Process** Sergei A. Voitovich, 2023-08-28 Voitovich presents a clear and lucid discussion of the manner and form in which international economic organizations (IEOs) participate in two main stages of the international legal process: law making and law implementation. The book is based on normative instruments and fragments of practice of about fifty IEOs. In order to ensure a proper and timely realization of their normative acts, IEOs exercise a number of law implementing functions which are subject to a thorough comparative examination. The author concludes that existing IEOs, not being ideal institutional models, possess a sufficient arsenal of law implementing instruments to make a considerable impact on the international legal regulations in the economic field. The book will be of interest to academics and economic political scientists.

**The Law of Groups of Companies** Christine Van Den Wyngaert, M. Kruithof, 1991-12 The law and regulations governing groups of enterprises have undergone an amazing development during the last ten to twenty years. The growing attention paid in legal writing to the specific issues raised by the group phenomenon is a direct consequence of the widespread and increasing utilization of separate legal entities to organize business activities whether in the profit or non-profit sector. It is increasingly felt that the traditional approach of today's company law does not provide adequate answers for the questions raised by today's enterprise organization. Few national regulations have paid specific attention to the growth of groups of companies. This does not mean that group law does not exist but rather that it has developed from its roots in judicial case law, administrative practice and in many particular provisions of different statutes. Legal doctrine has paid a great deal of attention to group relationships, often utilizing material originating from other legal systems. At the EEC level a directive on groups of companies has been envisaged but no agreement has been reached on its content. The purpose of the research which resulted in the present publication was to document and orient research by

everyone interested in the study of the law of groups of enterprises The Law of Groups of Companies systematically classifies the wealth of literature which was thus revealed and makes clear that although formal statutes on groups of companies rarely exist the law has been developing and concepts structures and reasoning have kept the minds of many legal writers active This book is a publication of the Studiecentrum Ondernemingsgroepen Centre d Etude des Groupes d Entreprises

Regulating Multinationals in Developing Countries Edwin Mujih, 2016-04-08 Edwin Mujih explores the difficulties associated with regulating multinational companies operating in developing countries with a particular focus on extractive industries The author highlights the need to establish an international legally binding framework to ensure that multinationals operate in a socially responsible manner to protect local communities and the environment Edwin Mujih s analysis reveals that the existing mechanisms for controlling the behaviour of huge multinational entities are of normative force only that these are particularly inadequate and that the notion of corporate social responsibility is only meaningful where behaviour can be legally regulated Regulating Multinationals in Developing Countries features a study of the Chad and Cameroon Oil and pipeline project which highlights the problems arising in countries that have neither the capacity nor the will to effectively regulate those operating within their borders The author has evaluated compliance by the parties with their social and environmental obligations He has found that despite controversy surrounding inadequate regulation of this project in its incipient stages the system that was put in place following huge opposition from the affected communities and from NGOs is worthy of attention and could stand as a model for similar projects elsewhere This first title in Gower s Corporate Social Responsibility Series to approach CSR from a legal perspective provides insight not just into the complexity surrounding efforts to regulate multinationals operating in countries with weak regulatory regimes but also into the fundamental nature of multinational corporations and the debate about different notions of CSR itself **Routledge**

**Handbook of International Environmental Law** Shawkat Alam, 2013 This handbook is an advanced level reference guide which provides a comprehensive and contemporary overview of the corpus of international environmental law IEL

**Corporate Governance** Saleem Sheikh, 2002-03-20 This book critically considers the relationship between directors shareholders and auditors in the corporate governance system Traditionally company law has been primarily based on this tripartite relationship This book comprises a series of contributions from authors who argue that there are wider interests which British company law has largely ignored These include the interests of creditors employees consumers suppliers and the general public The concept of corporate governance is examined with comparative references to the USA and Canada Particular reference is made to the Cadbury Committee and its implications for future company law reform The ethical and sociological dimensions of corporate governance is also fully discussed **Corporate Environmental Accountability in International Law** Elisa Morgera, 2020 This book explores the evolving role of international law in directing and controlling the conduct of business enterprises in particular multinational corporations with respect to the protection of the environment

the sustainable use of natural resources and the respect of inter related human rights It assesses the progress and continuing limitations in the identification of international standards of corporate environmental accountability and responsibility and their implementation by international organizations This assessment shows the extent to which the international community has conceptually and operationally clarified its expectations about acceptable corporate conduct This second edition of Elisa Morgera s book reflects the intensified convergence of international standard setting efforts on corporate environmental accountability with parallel international developments on business and human rights and the environment It also explores the recent emergence of substantive international standards of corporate environmental responsibility which have arisen from a growing number of sectoral guidelines Equally it points to the remaining divergences in the content of international standards of corporate environmental accountability and responsibility which reflect differing views among States of their international obligations to ensure the protection of the environment and the respect of human rights Provided by publisher

**Rethinking International Organisation** Barbara Emadi-Coffin,2003-08-27 The function of the state as a symbol of identity has become increasingly important as major powers of the pre Cold War era have given way to self determination The conventional role of the state has however simultaneously been challenged by the process of globalisation which transcends such national boundaries Barbara Emadi Coffin seeks to explain this contradiction through a radical new theory There are now 37 000 multinational corporations in the world many of which are increasingly seen as being among the new centres of political and economic power Barbara Emadi Coffin analyses the increasing interaction of multinational corporations international organizations and transnational interest groups such as Greenpeace and Amnesty International in processes of the global political economy Using examples of the free trade zones in Korea the UK and the People s Republic of China the author demonstrates these interactions In so doing she challenges prevailing notions surrounding International Organization theory Regulating Transnational Corporations in Domestic and International Regimes Evaristus
