Regulating The European Environment:

Regulating the European Environment Thomas Handler, 1994 Environmental regulation imposes strict limits on business activity but it also offers opportunities to gain an advantage in the market and to meet industry compliance requirements Understanding the limitations and the market potential is difficult and time consuming but also important and rewarding Regulating the European Environment cuts straight through the uncertainties It is designed not to be exhaustive but to provide an initial understanding of the general shape of the mass of rules and legislation in Europe and to provide a basis for further detailed analysis of the subject if required

Regulating Europe Giandomenico Majone, 2002-11-01 Regulating Europe explains why economic and social regulation is rapidly becoming the new frontier of public policy and public administration in Europe both at the national and EU levels Statutory regulation implemented by independent regulatory bodies is replacing not only older forms of state intervention but also to some extent the redistributive policies of the welfare state Thus Regulating Europe is an examination of the emergence of the regulatory state as the successor of the Keynesian welfare state of the past Contributions emphasize the parallelism of policy developments at the national and European levels Part one provides the necessary theoretical background including a new model of demand and supply of Community regulation The second part presents a series of case studies of particular regulatory policies and institutions in the UK Germany France Spain and the EU Part three evaluates current policy and institutional developments pointing out how the lack of a tradition of statutory regulation in Europe affects the design of the new institutions Special attention is devoted to the issue of the democratic accountability of expert politically independent agencies a problem which contrary to widespread opinion is as severe at the national level as it is in Brussels It is suggested that the requirements of democratic accountability and of subsidiarity cannot be met by re nationalizing European policies much less by increasing the current level of centralization A more promising solution is the development of regulatory networks closely integrating national and supranational regulators

The third edition of *EU Administrative Law* provides comprehensive coverage of the administrative system in the EU and the principles of judicial review that apply in this area. This revised edition provides important updates on each area covered, including new case law, institutional developments, and EU legislation. These changes are located within the framework of broader developments in the EU. The chapters in the first half of the book deal with all the principal variants of the EU administrative regime. Thus, there are chapters dealing with the history and taxonomy of the EU administrative regime, direct administration, shared administration, comitology, agencies, social partners, and the open method of coordination. The coverage throughout focuses on the legal regime that governs the particular form of administration and broader issues of accountability, drawing on literature from political science as well as law. The focus in the second part of the book shifts to judicial review. There are detailed chapters covering all principles of judicial review, and the discussion of the law throughout is analytical and contextual. It begins with the principles that have informed the development of EU judicial review. This is followed by a chapter dealing with the judicial system and the way in which reform could impact on the subject matter of the book. There are then chapters dealing with competence, access, transparency, process, law, fact, and discretion, rights, equality, legitimate expectations, two chapters on proportionality, the precautionary principle, two chapters on remedies, and the Ombudsman. **European Environment Review**, 1986 **Research Handbook on EU Administrative Law** Carol Harlow, Päivi Leino, Giacinto della Cananea, 2017-02-24. Key chapters written by leading experts across the field engage with important ongoing debates in the field of EU administrative law, focusing on areas of topical interest such as financial markets, the growing security state, and problematic common asylum procedures. In doing so, they provide a summary of what we know, don't know, and ought to know about EU administrative law. Examining the control functions of administrative law and the machinery for accountability, this *Research Handbook* eloquently challenges areas of authoritarian governance such as the Eurozone and security state, where control and accountability are weak, and tackles the seemingly insoluble question of citizen voice and access to policy making. **Environmental Health in International and EU Law** Stefania Negri, 2019-12-09. This book presents a broad overview of the many intersections between health and the environment that lie at the basis of the most crucial environmental health issues, focusing on the responses provided by international and EU law. Consistent with the One Health approach and moving from the relevant international and EU legal frameworks, the book addresses some of the most important issues of environmental health, including the traditional such as pollution of air, water, and soil, and related food safety issues, as well as new and emerging challenges like those linked to climate change, antimicrobial resistance, and electromagnetic fields. Applying an intersectoral

and interdisciplinary approach it also investigates other branches of international and EU law including human rights law investment law trade law energy law and disaster law The work also discusses ethics and intergenerational equity Ultimately the book assesses the degree of effectiveness of the international and EU normative framework and the extent to which the relevant legal instruments contribute to the protection of public health from major environmental hazards The book will be a valuable resource for students academics and policy makers working in the areas of Environmental Health law Global Health law International law and EU law Environmental Disclosure Luigi Lepore, Sabrina Pisano, 2022-12-29 This book provides a description of the state of the art on environmental disclosure illustrating the key theoretical issues the regulatory frameworks and the main standards developed and reporting the results of an empirical analysis on the environmental disclosure released by listed firms Luigi Lepore and Sabrina Pisano begin by analysing the origin and evolution of environmental disclosure They go on to provide a description of the main theoretical frameworks used by scholars explaining the conceptual basis of each theory and describing how the specific theory has been used to explain the company's decision to release environmental disclosure The second part of the book highlights the role and evolution of the European regulatory frameworks emphasising the transition from voluntary to mandatory disclosure and the major standards and guidance developed The book ends by providing a picture of the evolution of sustainability reporting practices in European Union nations over the past two decades This book investigates the critical issues and new directions in environmental disclosure which are currently under examination by regulators and standard setters It will therefore be of great interest to academics and students working in the areas of business and sustainability
